

Exam 1z0-1046-25 Overview - 1z0-1046-25 Reliable Exam Tips

Although the Oracle 1z0-1046-25 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our Oracle 1z0-1046-25 Study Materials, you will cope with it like a piece of cake. So our 1z0-1046-25 learning questions will be your indispensable practice materials during your way to success.

Do you want to find a fast way to step towards your dreams? We can help you by providing the latest and best useful 1z0-1046-25 pdf torrent to guarantee your success in Oracle 1z0-1046-25 test certification. We keep our 1z0-1046-25 vce torrent the latest by checking the newest information about the updated version every day. Add the latest topics into the 1z0-1046-25 Dumps, and remove the useless questions, so that your time will be saved and study efficiency will be improved.

Exam 1z0-1046-25 Overview - 100% Pass Quiz Oracle First-grade 1z0-1046-25 Reliable Exam Tips

This is a printable 1z0-1046-25 PDF dumps file. The 1z0-1046-25 PDF dumps enables you to study without any device, as it is a portable and easily shareable format, thus you can study 1z0-1046-25 dumps on your preferred smart device such as your smartphone or in hard copy format. Once downloaded from the website, you can easily study from the Oracle 1z0-1046-25 Exam Questions compiled by our highly experienced professionals as directed by the Oracle exam syllabus.

Oracle Global Human Resources Cloud 2025 Implementation Professional Sample Questions (Q158-Q163):

NEW QUESTION # 158

Challenge 2

Manage Legal Entity

Scenario

The newly acquired company that manufactures spring hinges for spectacles in Michigan will be its own legal entity. You need to create a legal entity for this company.

Task

Create a legal entity in the HCM system that will be its own Payroll Statutory Unit, where:

The name of the legal entity is X Cloud vision

The identifier is XCLDVIS

The legal address is, as previously created

The EIN or TIN is 93654213X

The Legal Reporting Unit Registration Number is 1212321X

Answer:

Explanation:

See the solution in Explanation below.

Explanation:

This task requires creating a legal entity in Oracle Global Human Resources Cloud for a newly acquired company, X Cloud Vision, that manufactures spring hinges for spectacles in Michigan. The legal entity must also be its own Payroll Statutory Unit (PSU), with specific details provided: name, identifier, legal address (previously created), EIN/TIN, and Legal Reporting Unit Registration Number. Below is a verified, step-by-step solution based on Oracle's official documentation, ensuring accuracy and compliance with the system's functionality as of the latest releases.

Step-by-Step Solution Step 1: Log in to Oracle Fusion Applications
* Action: Log in to Oracle Fusion Applications using a user account with privileges such as Application Implementation Consultant or HCM Application Administrator. These roles grant access to the Setup and Maintenance work area.

* Explanation: The Setup and Maintenance work area is the central hub for configuration tasks, including managing legal entities. The user must have permissions to access the Workforce Structures functional area and the Manage Legal Entity task. Roles like Application Implementation Consultant include the necessary privileges (e.g., Manage Legal Entity duty role).

* Verification: Oracle documentation confirms that setup tasks require specific security roles, and the Manage Legal Entity task is restricted to authorized users.

Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Security for Setup Tasks.

Step 2: Navigate to Setup and Maintenance

Action:

From the Oracle Fusion Applications home page, click the Navigator icon (hamburger menu) in the top-left corner.

Under the Tools section, select Setup and Maintenance.

Explanation: The Setup and Maintenance work area provides access to all implementation and configuration tasks, organized by functional areas. This is the entry point for accessing the Manage Legal Entity task.

Verification: Oracle's user interface consistently places Setup and Maintenance under the Navigator's Tools section, as confirmed in both Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Setup and Maintenance Overview.

Step 3: Select the Workforce Structures Functional Area and Locate the Task Action:

In the Setup and Maintenance work area, click the Functional Area dropdown and select Workforce Structures.

In the task list, locate Manage Legal Entity by scrolling or using the search bar (type "Manage Legal Entity").

Click the Go to Task icon (typically a play button or arrow) next to Manage Legal Entity to open the task.

Explanation: The Workforce Structures functional area includes tasks related to organizations, including legal entities. The Manage Legal Entity task is designed to create and manage legal entities, including their attributes and associations. Using the search bar ensures quick access if the task list is extensive.

Verification: Oracle documentation lists Manage Legal Entity under Workforce Structures, accessible via the Setup and Maintenance UI in both Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Manage Legal Entity.

Step 4: Initiate Creation of a New Legal Entity

Action:

On the Manage Legal Entity page, click the Create button (typically a plus sign (+) or labeled "Create" in the Redwood interface).

This opens the Create Legal Entity page for entering the legal entity details.

Explanation: The Manage Legal Entity page displays a searchable list of existing legal entities. The Create action starts the process of adding a new legal entity, opening a form where details like name, identifier, and address can be entered.

Verification: Oracle's UI for managing legal entities includes a Create button, as confirmed in documentation and Redwood interface updates (24C and later).

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Creating Legal Entities.

Step 5: Enter the Legal Entity Details

Action: On the Create Legal Entity page, enter the following details as provided in the scenario:

Name: Enter X Cloud Vision.

Legal Entity Identifier: Enter XCLDVIS.

Country: Select United States from the dropdown list.

Legal Address: Search for and select the previously created address: 900 Main St, Dearborn Heights, Wayne, Michigan 48127.

Click the Search icon (magnifying glass) in the Legal Address field.

Enter Dearborn Heights or 900 Main St in the search criteria and click Search.

Select the address and click OK.

EIN or TIN: Enter 93654213X.

Legal Reporting Unit Registration Number: Enter 1212321X.

Organization Type: Select Legal Employer (as the legal entity is a company with employees).

Effective Start Date: Enter 04/15/2025 (current date, unless the acquisition date is specified; adjust if a specific date is required).

Payroll Statutory Unit: Check the box for Payroll Statutory Unit or select Yes to designate the legal entity as its own PSU.

Explanation:

Name: The legal entity name must be X Cloud Vision, matching the scenario exactly for identification.

Legal Entity Identifier: XCLDVIS is a unique code for the legal entity, used in system processes and reporting.

Country: United States is required, as the address is in Michigan.

Legal Address: The address (900 Main St, Dearborn Heights, Wayne, Michigan 48127) was created in a previous task (Question 142) and must be selected to link it to the legal entity. The search ensures the correct address is used.

EIN or TIN: 93654213X is the Employer Identification Number or Tax Identification Number, used for tax reporting.

Legal Reporting Unit Registration Number: 1212321X identifies the legal reporting unit for compliance purposes.

Organization Type: Legal Employer is appropriate, as the company employs workers (implied by manufacturing operations).

Effective Start Date: Oracle uses effective dating to track legal entity validity. The current date (04/15/2025) is used unless otherwise specified.

Payroll Statutory Unit: Designating the legal entity as a PSU ensures it handles its own payroll reporting and compliance, as required by the scenario. This creates a PSU automatically tied to the legal entity.

Verification: Oracle documentation specifies mandatory fields (e.g., Name, Country, Address) and optional fields (e.g., EIN/TIN) for legal entity creation. The Payroll Statutory Unit option is explicitly supported, and the provided details align with US legal entity requirements.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Legal Entity Fields.

Step 6: Configure Additional Settings (if prompted)

Action:

Jurisdiction: If prompted, select United States, Michigan as the jurisdiction for compliance with state regulations.

Payroll Statutory Unit Details: If a PSU section appears, confirm the PSU name (defaults to X Cloud Vision) and ensure the EIN or TIN and Registration Number are carried over.

Primary Legal Address: Verify that 900 Main St, Dearborn Heights, Wayne, Michigan 48127 is marked as the primary legal address (typically automatic).

Explanation:

Jurisdiction: Michigan is the appropriate jurisdiction for a US-based company in Dearborn Heights.

PSU Details: Creating a PSU requires minimal additional input, as the legal entity's details (e.g., EIN/TIN) are reused.

Primary Legal Address: Oracle requires at least one primary address for compliance; the selected address fulfills this role.

Verification: Oracle documentation confirms that PSU creation can be integrated with legal entity setup, and jurisdiction and address settings are standard fields.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section:

Payroll Statutory Units.

Step 7: Save the Legal Entity

Action:

After entering all details, click Save and Close (or Save if further edits are needed).

If prompted, confirm the creation of the legal entity and PSU.

Explanation: Saving creates the legal entity and, if selected, the associated PSU in the system. The Save and Close button finalizes the task, while Save allows additional configurations (e.g., adding more addresses).

Oracle validates mandatory fields before saving.

Verification: Oracle's UI includes Save and Save and Close options for legal entity creation, as confirmed in documentation for both responsive and Redwood interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Saving Legal Entities.

Step 8: Verify the Legal Entity Creation

Action:

Return to the Manage Legal Entity page.

In the search criteria, enter X Cloud Vision or XCLDVIS and click Search.

Confirm that the new legal entity appears with the details:

Name: X Cloud Vision

Identifier: XCLDVIS

Legal Address: 900 Main St, Dearborn Heights, Wayne, Michigan 48127

EIN or TIN: 93654213X

Legal Reporting Unit Registration Number: 1212321X

Payroll Statutory Unit: Yes

Effective Start Date: 04/15/2025

Optionally, verify the PSU by navigating to the Manage Payroll Statutory Units task and searching for X Cloud Vision.

Explanation: Verification ensures the legal entity and PSU were created correctly. Searching by name or identifier confirms the record's accuracy and checks for errors. Checking the PSU separately validates its creation if required.

Verification: Oracle documentation emphasizes verifying setup tasks by searching created records, and the Manage Legal Entity page supports detailed searches.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Searching Legal Entities.

Detailed Explanation

Purpose of Legal Entity: A legal entity represents a registered organization for compliance, tax, and payroll purposes. X Cloud Vision as a legal employer and PSU ensures it handles its own workforce and reporting obligations.

Payroll Statutory Unit: Designating the legal entity as a PSU means it acts as the entity responsible for payroll calculations and statutory reporting (e.g., W-2 forms in the US). This aligns with the scenario's requirement for independence.

Legal Address Integration: The address (900 Main St, Dearborn Heights, Wayne, Michigan 48127) links the legal entity to its physical or registered location, critical for compliance. The prior creation of this address (Question 142) ensures it is available for selection.

EIN/TIN and Registration Number: The EIN/TIN (93654213X) and Legal Reporting Unit Registration Number (1212321X) are unique identifiers for tax and reporting, formatted as per US requirements.

Redwood Interface: In the Redwood interface (24C and later), the Manage Legal Entity page may feature enhanced UI elements (e.g., streamlined forms, inline validation), but the core fields and steps remain consistent with the responsive interface.

Effective Dating: The effective start date ensures the legal entity is active from the specified date, supporting future changes (e.g., address updates).

Key Considerations

Accuracy: All details (X Cloud Vision, XCLDVIS, 93654213X, 1212321X) must be entered exactly as provided to avoid errors in reporting or compliance.

Address Availability: The legal address must exist in the system (from Question 142). If not found, revisit the Manage Legal Addresses task to create it first.

PSU Creation: Checking the PSU box automatically creates a PSU linked to the legal entity, reusing the provided EIN/TIN and registration number unless overridden.

Security: Only users with the Manage Legal Entity privilege can perform this task. Role mismatches require administrative intervention.

Jurisdiction: Selecting United States, Michigan ensures compliance with state-specific regulations, though it may be optional in some configurations.

Potential Challenges and Solutions

Access Denied: If the user lacks the Manage Legal Entity privilege, an error occurs. Solution: Assign the Application Implementation Consultant role via Security Console.

Address Not Found: If the address (900 Main St) is missing, the system prevents saving. Solution: Create the address using the Manage Legal Addresses task (as per Question 142) before proceeding.

Duplicate Identifier: If XCLDVIS already exists, an error occurs. Solution: Search for the identifier first; if it exists, coordinate with the implementation team to resolve conflicts.

Redwood UI Variations: The Redwood interface may use different button labels (e.g., Add instead of Create) or layouts. Solution: Follow field prompts and ensure all required fields are completed.

PSU Configuration: If PSU creation prompts additional fields, use default values derived from the legal entity unless specified. Solution: Confirm EIN/TIN and registration number alignment.

NEW QUESTION # 159

As a consultant in your company, you are required to set up names and details of schools, colleges, universities, and so on, so that users can select from this list when entering their qualifications such as degrees. Identify the correct setup task in Functional Setup Manager > Define Workforce Profiles.

- A. Define Talent Profile Content > Manage Content Subscribers
- **B. Define Talent Profile Content > Manage Educational Establishments**
- C. Define Talent Profiles > Manage Profile Types
- D. Define Talent Profile Content > Manage Profile Content Items

Answer: B

Explanation:

In Oracle Global Human Resources Cloud, educational establishments (schools, universities) are maintained as part of the talent profile to support qualification tracking.

Option A: "Manage Profile Content Items" defines specific content (e.g., skills), not educational institutions.

Option B: "Manage Content Subscribers" controls access to content, not the list itself.

Option C: "Manage Profile Types" defines profile structures, not specific data like institutions.

Option D: Correct. "Manage Educational Establishments" under Define Talent Profile Content allows setup of a selectable list of schools, colleges, and universities for qualifications.

The correct answer is D, per "Implementing Global Human Resources" on workforce profiles.

References: Oracle Global Human Resources Cloud - Implementing Global Human Resources, Chapter 13: Workforce Profiles.

NEW QUESTION # 160

A multinational construction company, headquartered in London, has operations in five countries. It has its major operations in the UK and US and small offices in Saudi Arabia, UAE, and India. The company employs 3,000 people in the UK and US and 500 people in the remaining locations. The entire workforce in India falls under the Contingent Worker category. How many Legislative Data Groups (LDGs), divisions, legal employers, and Payroll Statutory Units (PSUs) need to be configured for this company?

- A. Four LDGs (UK, US, India, and one for Saudi Arabia and UAE combined), five divisions (one for each country), four legal employers (all except India), and five PSUs.
- **B. Five LDGs (one for each country), four divisions (UK, US, India, and one for Saudi Arabia and UAE combined), five legal employers, and four PSUs (all except India).**
- C. Five LDGs (one for each country), four divisions (UK, US, India, and one for Saudi Arabia and UAE combined), two legal employers and PSUs (US and UK only, because the workforce is very small in the other countries).
- D. Five LDGs, five divisions, five legal employers, and five PSUs.

Answer: B

Explanation:

In Oracle Global Human Resources Cloud, enterprise structures like LDGs, divisions, legal employers, and PSUs are configured based on legislative, operational, and payroll needs.

LDGs: One per country (UK, US, Saudi Arabia, UAE, India) due to distinct legislative requirements (e.g., labor laws, tax rules), totaling 5.

Divisions: Operationally, the company can group Saudi Arabia and UAE into one division due to their small size, alongside UK, US, and India, totaling 4 divisions.

Legal Employers: Each country typically requires a legal employer for employees (UK, US, Saudi Arabia, UAE). India's contingent workers still require a legal employer for compliance, totaling 5.

PSUs: Payroll Statutory Units are needed for payroll processing. India's contingent workers may not require a PSU if payroll is not processed (common for contingent workers), so 4 PSUs (UK, US, Saudi Arabia, UAE).

Option A: Incorrect; combining Saudi Arabia and UAE into one LDG ignores separate legislative needs.

Option B: Incorrect; only 2 legal employers and PSUs overlook small offices' compliance needs.

Option C: Incorrect; 5 PSUs assume India needs payroll, which isn't typical for contingent workers.

Option D: Correct: 5 LDGs, 4 divisions, 5 legal employers, 4 PSUs.

The correct answer is D, per "Implementing Global Human Resources" on enterprise structures.

References: Oracle Global Human Resources Cloud - Implementing Global Human Resources, Chapter 2: Enterprise Structures.

NEW QUESTION # 161

You hired an employee on January 1, 2015. This employee got married on June 12, 2015. You received a request from the employee on July 11, 2015, to change their last name from the date of the marriage. You changed the last name of the employee as requested on the same day. What effective start date for this new employee is displayed by the system as of August 15, 2015?

- A. July 11, 2015
- B. August 15, 2015
- C. January 1, 2015
- **D. June 12, 2015**

Answer: D

Explanation:

In Oracle Global Human Resources Cloud, the "effective start date" for an employee typically refers to the start date of their person record or a specific change, depending on context. Here, the question involves a name change backdated to the marriage date, and we need the effective start date displayed as of August 15, 2015.

Option A: July 11, 2015, is the date the change was requested and processed. However, the name change was applied retroactively to the marriage date, not this transaction date.

Option B: Correct. June 12, 2015, is the marriage date, and the request was to update the last name effective from that date. In Oracle HCM, when you update a person's name with an effective date (via Manage Person or a similar task), the system records this as the effective start date of the name change. As of August 15, 2015, the system displays the name change effective from June 12, 2015, reflecting the backdated update.

Option C: January 1, 2015, is the hire date and the initial effective start date of the person record. However, the name change overrides this for the specific attribute (last name), and the question implies the effective date tied to the update.

Option D: August 15, 2015, is the "as of" date, not an effective start date for any change or the employee's record.

The correct answer is B, as the effective start date of the name change is June 12, 2015, per "Using Global Human Resources" on managing person data with effective dating.

References: Oracle Global Human Resources Cloud - Using Global Human Resources, Chapter 8: Person Management.

NEW QUESTION # 162

An organization uses the Previous Employment content type to capture relevant employment details of employees. What do you do to make this content type available in other applications?

- A. Do nothing. After the content type is created, it is available for use in all applications.
- B. Make sure it is a non-free-form content type.
- **C. Specify a Subscriber Code for the content type.**
- D. Make sure it is a free-form content type.

Answer: C

Explanation:

Full Detailed in Depth Explanation:

Content types in Oracle HCM Cloud (e.g., Previous Employment) store structured data like employment history. To share them across applications (e.g., Recruiting, Talent Management), a specific setup is required.

Option A ("Specify a Subscriber Code for the content type") is correct. In the "Manage ContentTypes" task, assigning a Subscriber Code (e.g., RECRUIT for Recruiting) makes the content type accessible to that application. Without this, it remains restricted to its originating module (e.g., Core HR). This is detailed in the

"Implementing Global Human Resources" guide under content type configuration.

Option B ("Do nothing") is incorrect; content types are not automatically shared across applications.

Option C ("Make sure it is a non-free-form content type") and Option D ("Make sure it is a free-form content type") are irrelevant; the type (free-form or structured) does not determine cross-application availability.
