

# Exam 1z0-1110-25 Materials, Valid 1z0-1110-25 Test Guide

DOWNLOAD the newest PDF4Test 1z0-1110-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1jHXCMGMzaBOcDEJl5zBBdmzXHAEB-je2>

our company is determined to help provide the most accurate 1z0-1110-25 Exam Questions and help more people get the 1z0-1110-25 certificate successfully. Our company has a long history of 10 years in designing 1z0-1110-25 study materials and enjoys a good reputation across the globe. Now we can be the leader in this exam field and have a large number of regular customers from different countries. We are looking forward to your joining in us.

The pressure is not terrible, and what is terrible is that you choose to evade it. You clearly have seen your own shortcomings, and you know that you really should change. Then, be determined to act! Buying our 1z0-1110-25 exam questions is the first step you need to take. Only with our 1z0-1110-25 Practice Guide, then you will totally know your dream clearly and have enough strength to make it come true. Our 1z0-1110-25 learning materials have become a famous brand which can help you succeed by your first attempt.

## Valid 1z0-1110-25 Test Guide - 1z0-1110-25 Reliable Exam Dumps

PDF4Test Oracle 1z0-1110-25 exam dumps are the best reference materials. PDF4Test test questions and answers are the training materials you have been looking for. This is a special IT exam dumps for all candidates. PDF4Test pdf real questions and answers will help you prepare well enough for Oracle 1z0-1110-25 test in the short period of time and pass your exam successfully. If you don't want to waste a lot of time and efforts on the exam, you had better select PDF4Test Oracle 1z0-1110-25 Dumps. Using this certification training dumps can let you improve the efficiency of your studying so that it can help you save much more time.

## Oracle 1z0-1110-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>OCI Data Science - Introduction &amp; Configuration: This section of the exam measures the skills of Machine Learning Engineers and covers foundational concepts of Oracle Cloud Infrastructure (OCI) Data Science. It includes an overview of the platform, its architecture, and the capabilities offered by the Accelerated Data Science (ADS) SDK. It also addresses the initial configuration of tenancy and workspace setup to begin data science operations in OCI.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Create and Manage Projects and Notebook Sessions:</b> This part assesses the skills of Cloud Data Scientists and focuses on setting up and managing projects and notebook sessions within OCI Data Science. It also covers managing Conda environments, integrating OCI Vault for credentials, using Git-based repositories for source code control, and organizing your development environment to support streamlined collaboration and reproducibility.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Use Related OCI Services:</b> This final section measures the competence of Machine Learning Engineers in utilizing OCI-integrated services to enhance data science capabilities. It includes creating Spark applications through OCI Data Flow, utilizing the OCI Open Data Service, and integrating other tools to optimize data handling and model execution workflows.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Apply MLOps Practices:</b> This domain targets the skills of Cloud Data Scientists and focuses on applying MLOps within the OCI ecosystem. It covers the architecture of OCI MLOps, managing custom jobs, leveraging autoscaling for deployed models, monitoring, logging, and automating ML workflows using pipelines to ensure scalable and production-ready deployments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Implement End-to-End Machine Learning Lifecycle:</b> This section evaluates the abilities of Machine Learning Engineers and includes an end-to-end walkthrough of the ML lifecycle within OCI. It involves data acquisition from various sources, data preparation, visualization, profiling, model building with open-source libraries, Oracle AutoML, model evaluation, interpretability with global and local explanations, and deployment using the model catalog.</li> </ul>

## Oracle Cloud Infrastructure 2025 Data Science Professional Sample Questions (Q32-Q37):

### NEW QUESTION # 32

What is the minimum active storage duration for logs used by Logging Analytics to be archived?

- A. 60 days
- B. 15 days
- **C. 30 days**
- D. 10 days

**Answer: C**

Explanation:

Detailed Answer in Step-by-Step Solution:

\* Objective: Determine minimum log storage duration before archiving in Logging Analytics.

\* Understand Logging Analytics: Logs are active before archival.

\* Evaluate Options:

\* A: 60 days-Too long for minimum.

\* B: 10 days-Too short.

\* C: 30 days-Standard minimum-correct.

\* D: 15 days-Not OCI's default.

\* Reasoning: 30 days is OCI's documented minimum active period.

\* Conclusion: C is correct.

OCI documentation states: "Logs in Logging Analytics remain active for a minimum of 30 days (C) before archiving, ensuring availability for analysis." B and D are shorter, A is longer-only C matches OCI's policy.

Oracle Cloud Infrastructure Logging Analytics Documentation, "Log Retention".

### NEW QUESTION # 33

Which CLI command allows the customized conda environment to be shared with co-workers?

- **A. odsc conda publish**
- B. odsc conda clone
- C. odsc conda install
- D. odsc conda modify

**Answer: A**

Explanation:

Detailed Answer in Step-by-Step Solution:

- \* Objective: Share a custom conda environment in OCI Data Science.
- \* Understand Commands: OCI provides odsc CLI for environment management.
- \* Evaluate Options:
  - \* A: clone duplicates an environment locally-not for sharing.
  - \* B: publish uploads the environment to Object Storage for team access-correct.
  - \* C: modify doesn't exist as a standard command.
  - \* D: install sets up an environment locally-not for sharing.
- \* Reasoning: Sharing requires publishing to a shared location (Object Storage), which publish achieves.
- \* Conclusion: B is the correct command.

The OCI Data Science CLI documentation states: "Use odsc conda publish to package and upload a custom conda environment to an Object Storage Bucket, making it accessible to other users." clone (A) is for local duplication, modify (C) isn't valid, and install (D) is for local setup-not sharing. B is the designated sharing mechanism.

Oracle Cloud Infrastructure Data Science CLI Reference, "odsc conda publish".

### NEW QUESTION # 34

What is a conda environment?

- A. A system that manages package dependencies
- B. A collection of kernels
- C. An environment deployment system on Oracle AI
- **D. An open-source environment management system**

**Answer: D**

Explanation:

Detailed Answer in Step-by-Step Solution:

- \* Define Conda: Conda is a widely used tool for managing packages and environments in data science.
- \* Evaluate Options:
  - \* A: Partially true-Conda manages dependencies, but it's broader (an environment system).
  - \* B: Incorrect-Kernels (e.g., Jupyter) are separate; Conda manages environments.
  - \* C: Correct-Conda is an open-source tool for creating isolated environments with specific packages.
  - \* D: Incorrect-Not specific to Oracle AI; it's a general tool.
- \* Reasoning: C captures Conda's full scope as an open-source system, beyond just dependency management (A).
- \* Conclusion: C is the most accurate.

OCI documentation describes Conda as "an open-source package and environment management system that allows data scientists to create isolated environments with specific versions of Python and libraries." A is too narrow, B misaligns with kernel concepts, and D ties it incorrectly to Oracle AI. C aligns with Conda's official definition and OCI's usage.

Oracle Cloud Infrastructure Data Science Documentation, "Conda Environments Overview".

### NEW QUESTION # 35

During a job run, you receive an error message that no space is left on your disk device. To solve the problem, you must increase the size of the job storage. What would be the most efficient way to do this with Data Science Jobs?

- A. Your code using too much disk space. Refactor the code to identify the problem
- B. Edit the job, change the size of the storage of your job, and start a new job run
- C. On the job run, set the environment variable that helps increase the size of the storage
- **D. Create a new job with increased storage size and then run the job**

**Answer: D**

Explanation:

Detailed Answer in Step-by-Step Solution:

- \* Objective: Efficiently increase storage for an OCI Job.
- \* Understand Jobs: Storage (block volume) is set at job creation, not dynamically adjustable.
- \* Evaluate Options:

- \* A: False-Jobs can't edit storage post-creation; it's fixed.
- \* B: False-No environment variable adjusts storage size.
- \* C: True-Create a new job with larger storage (e.g., 200 GB) and run it.
- \* D: False-Refactoring code is inefficient compared to increasing storage.
- \* Reasoning: C is the standard OCI process for adjusting resources.
- \* Conclusion: C is correct.

OCI documentation states: "Storage size for a Data Science Job is specified during job creation (e.g., block volume size). To increase it, create a new job with a larger storage configuration and initiate a new run." Editing (A) isn't supported, variables (B) don't apply, and refactoring (D) avoids the issue-only C is efficient.

Oracle Cloud Infrastructure Data Science Documentation, "Jobs - Storage Configuration".

### NEW QUESTION # 36

You want to write a Python script to create a collection of different projects for your data science team. Which Oracle Cloud Infrastructure (OCI) Data Science interface would you use?

- **A. The OCI Software Development Kit (SDK)**
- B. OCI Console
- C. Command Line Interface (CLI)
- D. Mobile App

**Answer: A**

Explanation:

Detailed Answer in Step-by-Step Solution:

- \* Objective: Choose an interface for a Python script to manage projects.
- \* Evaluate Options:
- \* A: OCI SDK-Python-based, scriptable-correct.
- \* B: Console-GUI, not scriptable.
- \* C: CLI-Command-based, not Python-native.
- \* D: Mobile App-Not for scripting.
- \* Reasoning: A enables programmatic project creation.
- \* Conclusion: A is correct.

OCI documentation states: "Use the OCI Python SDK (A) to programmatically manage Data Science resources, like creating projects, via Python scripts." B, C, and D don't support Python scripting-only A fits.

Oracle Cloud Infrastructure SDK Documentation, "Data Science API".

### NEW QUESTION # 37

.....

After passing the Oracle 1z0-1110-25 certification exam, you can take advantage of a number of extra benefits. With the correct concentration, commitment, and 1z0-1110-25 exam preparation, you could ace this Oracle Cloud Infrastructure 2025 Data Science Professional 1z0-1110-25 test with ease. PDF4Test is a trusted and leading platform that is committed to preparing the Oracle 1z0-1110-25 exam candidates in a short time period.
