NEW QUESTION # 259

When troubleshooting a data integration issue, what information from the job logs can help pinpoint the problem?

- A. The frequency of scheduled reports
- B. User activity logs
- C. Time taken for each data transformation step
- D. The number of roles assigned to the job

Answer: C

Explanation:

The job logs contain detailed information about the time taken for each data transformation step, which can help pinpoint where performance issues or errors are occurring.

NEW QUESTION # 260

What is a key benefit of global period mappings?

- A. It provides standardized period mapping across all data integrations
- B. It schedules data loads based on the fiscal year
- C. It automatically adjusts periods based on user input
- D. It creates new periods for historical data

Answer: A

Explanation:

Global period mappings ensure that period mappings are standardized across all data integrations, reducing the need for application-specific configurations.

NEW QUESTION # 261
