Three User-Friendly Learning Formats

We provide study materials in various formats to suit different learning styles:

 **PDF Composition** – Study on any device, anytime, anywhere.

 **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.

 **Web-Based Drill Test** – No installation required—practice directly from your browser.

P.S. Free & New 1Z0-771 dumps are available on Google Drive shared by PDFDumps: <https://drive.google.com/open?id=1xh9xYPYPQOGxkTBcls8XfqEITKsUEFO>

Our Oracle 1Z0-771 exam dumps will assist you in preparing for the actual Oracle 1Z0-771 exam. Our Oracle 1Z0-771 practice test software allows you to customize the difficulty level by decreasing the time duration of Oracle 1Z0-771 Practice Exam, Which will help you to test yourself and make you capable of obtaining the Oracle 1Z0-771 certification with high scores.

If you have a strong desire to get the Oracle certificate, our 1Z0-771 study materials are the best choice for you. At present, the certificate has gained wide popularity. So the official test syllabus of the 1Z0-771 exam begins to become complicated. So you must accept professional guidance. After all, lots of people are striving to compete with many candidates. Powerful competitiveness is crucial to pass the 1Z0-771 Exam. Maybe you think that our 1Z0-771 study materials cannot make a difference. But you must know that if you do not have a try, your life will never be improved. It is useless that you speak boast yourself but never act. Please muster up all your courage. No one will laugh at a hardworking person. Our 1Z0-771 study materials are your good study partner.

Questions 1Z0-771 Pdf - 1Z0-771 Free Sample Questions

Do you want to have 1Z0-771 exam training materials which can save you time and effort? Then you can choose PDFDumps. Our 1Z0-771 exam training materials will provide you with free update service as long as one year. You will get the latest updated 1Z0-771 Exam Training materials. We guarantee that after you purchase our 1Z0-771 exam dumps, if you fail the 1Z0-771 exam certification, we will give a full refund.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 2	<ul style="list-style-type: none"> Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 3	<ul style="list-style-type: none"> Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 4	<ul style="list-style-type: none"> Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 5	<ul style="list-style-type: none"> Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 6	<ul style="list-style-type: none"> Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 7	<ul style="list-style-type: none"> Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 8	<ul style="list-style-type: none"> Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 9	<ul style="list-style-type: none"> Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 10	<ul style="list-style-type: none"> Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 11	<ul style="list-style-type: none"> Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 12	<ul style="list-style-type: none"> Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 13	<ul style="list-style-type: none"> Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.

Topic 14	<ul style="list-style-type: none"> • Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.

Oracle APEX Cloud Developer Professional Sample Questions (Q30-Q35):

NEW QUESTION # 30

The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.
- B. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.
- C. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.

Answer: C

Explanation:

By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering: Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.

Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.

Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here. This adjustment enhances the user experience by providing instant feedback.

NEW QUESTION # 31

Which three statements are true about Data Workshops in Oracle APEX?

- A. You can load data into a new or existing table.
- B. You can load or unload a single table at a time.
- C. You can unload data from a new or existing table.
- D. You can load or unload multiple tables at a time.

Answer: A,B,C

Explanation:

Data Workshop in SQL Workshop is a powerful tool for importing/exporting table data:

B . You can load or unload a single table at a time: The wizard focuses on one table per operation. For loading, you upload a file (e.g., CSV) and map it to a single table; for unloading, you select one table to export (e.g., EMP to CSV). This granularity ensures precision and simplicity.

C . You can unload data from a new or existing table: Unloading (exporting) works on any table in the schema, whether newly created (e.g., via Quick SQL) or pre-existing (e.g., DEPT). The "Unload" option generates a file (e.g., CSV, JSON) from the table's data.

D . You can load data into a new or existing table: Loading supports creating a new table from the uploaded file (e.g., CSV defines NEW_EMP) or appending/overwriting an existing one (e.g., EMP). The wizard prompts for table creation or selection.

A . You can load or unload multiple tables at a time: False; Data Workshop processes one table per wizard run. Multiple tables require separate operations or custom SQL scripts.

Technical Insight: Loading uses APEX_DATA_LOADING internally, parsing files into rows, while unloading leverages APEX_DATA_EXPORT. For example, uploading emp.csv with "Create New Table" generates a table with inferred columns.

Use Case: Migrating EMP data from a legacy system (CSV) into APEX, then exporting it later for analysis.

Pitfall: Multi-table operations need SQL Scripts or external tools like SQL Developer.

NEW QUESTION # 32

An application includes a form on the EMPLOYEES table. You must limit the P1_MANAGER page item so users can select a single employee name and ID from the corresponding manager ID in the same table. Which item type can be used to display

P1_MANAGER?

- A. Switch
- **B. Popup LOV**
- C. Checkbox

Answer: B

Explanation:

The requirement is to allow users to pick a single employee (name and ID) from a list tied to the MANAGER_ID column in the EMPLOYEES table, implying a dynamic, searchable selection:

A . Popup LOV: This item type displays a popup window with a searchable list of values, sourced from a SQL query (e.g., `SELECT ename, empno FROM employees WHERE empno IN (SELECT DISTINCT manager_id FROM employees)`). It returns a single value (e.g., EMPNO) while displaying the name, perfectly meeting the need for a single selection from a related dataset.

B . Switch: A toggle (Yes/No), unsuitable for selecting from a list of employees.

C . Checkbox: Allows multiple selections, conflicting with the "single employee" requirement.

Practical note: Popup LOVs enhance usability with filtering and pagination, ideal for large employee lists, and support returning the ID while showing the name.

NEW QUESTION # 33

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. AI Assistant Name
- **B. Welcome Message**
- C. Initial Prompt

Answer: B

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

NEW QUESTION # 34

Which statement is true about Theme Styles?

- **A. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.**
- B. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.
- C. Theme Styles control the layout of a webpage.

Answer: A

Explanation:

Theme Styles define visual themes in APEX:

A . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" in Shared Components > Theme Styles allows runtime selection (e.g., via a dropdown in the app UI), letting users switch between styles (e.g., "Vita" to "Vita - Dark").

B . Control layout: False; layout is managed by templates and regions; Theme Styles handle colors, fonts, etc.

C . "Is Current" depends on "Read Only": False; "Is Current" marks the default style, independent of "Read Only" (which locks editing).

Technical Insight: Public styles require multiple defined styles and a UI component (e.g., Dynamic Action) to expose the switcher.

Use Case: Offering light/dark mode options to users.

Pitfall: Without a switcher, "Is Public" has no visible effect.

NEW QUESTION # 35

.....

As everybody knows, competitions appear ubiquitously in current society. In order to live a better life, people improve themselves by furthering their study, as well as increase their professional 1Z0-771 skills. With so many methods can boost individual competitiveness, people may be confused, which can really bring them a glamorous work or brighter future? We are here to tell you that a 1Z0-771 Certification definitively has everything to gain and nothing to lose for everyone.
