

Exam 1Z1-771 Answers, 1Z1-771 Practice Exam

NCCER Test Practice Exam Questions with 100% Correct Answers

Ropebanding Correct Answer In a guardrail system, the guardrails can be made of any of the following EXCEPT:

- a) pipe
- b) chain
- c) ropebanding
- d) cable

9.6 ohms Correct Answer If the potential across the circuit is 48 volts and the current is 5 amps the resistance of the circuit is:

- a) 4.8 ohms
- b) 9.6 ohms
- c) 48.0 ohms
- d) 96.0 ohms

8' Correct Answer A UL listed rod type grounding electrode must have a MINIMUM length of:

- a) 6'
- b) 8'
- c) 10'
- d) 20'

3 Correct Answer What is the MINIMUM number of overload sensing units required for all three phase motors?

- a) 0
- b) 1
- c) 2
- d) 3

90-degrees Correct Answer In a circuit of pure capacitance, the current leads the voltage by an angle of:

- a) 30-degrees
- b) 45-degrees
- c) 90-degrees
- d) 180-degrees

Circular mil Correct Answer The standard unit for measuring the cross-sectional area of wire is the:

- a) circular mil
- b) square mil
- c) round mil
- d) radial mil

Candidates are looking for valid 1Z1-771 questions which belong to 1Z1-771 urgently. If you need valid exam questions and answers, our high quality is standing out. We are confident that our 1Z1-771 training online materials and services are competitive. Every year we spend much money and labor relationship on remaining competitive. We are trying to offer the best high passing-rate 1Z1-771 Training Online materials with low price. Our exam materials will help you pass exam one shot without any doubt.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 2	<ul style="list-style-type: none">• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.

Topic 3	<ul style="list-style-type: none"> Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 4	<ul style="list-style-type: none"> Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 5	<ul style="list-style-type: none"> Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 6	<ul style="list-style-type: none"> Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 7	<ul style="list-style-type: none"> Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 8	<ul style="list-style-type: none"> Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 9	<ul style="list-style-type: none"> Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 10	<ul style="list-style-type: none"> Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 11	<ul style="list-style-type: none"> Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 12	<ul style="list-style-type: none"> Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 13	<ul style="list-style-type: none"> Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 14	<ul style="list-style-type: none"> Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 15	<ul style="list-style-type: none"> Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 16	<ul style="list-style-type: none"> Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.

100% Pass Quiz Oracle - 1Z1-771 - Exam Oracle APEX Cloud Developer Professional Answers

The design of our 1Z1-771 guide training is ingenious and delicate. Every detail is perfect. For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study 1Z1-771 exam questions in a concise and undisturbed environment. In addition, you will find a lot of small buttons, which can give you a lot of help. Some buttons are used to hide or show the answer. What's more important is that we have spare space, so you can take notes under each question in the process of learning 1Z1-771 Study Tool. When you start, there will be a timer to help you to time, so that you can finish the problem within the prescribed time and it can create an environment. If you are satisfied with our 1Z1-771 exam questions, you can make a choice to purchase them.

Oracle APEX Cloud Developer Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which statement is true about Theme Styles?

- A. Theme Styles control the layout of a webpage.
- B. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.
- C. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.

Answer: C

Explanation:

Theme Styles define visual themes in APEX:

A . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" in Shared Components > Theme Styles allows runtime selection (e.g., via a dropdown in the app UI), letting users switch between styles (e.g., "Vita" to "Vita - Dark").

B . Control layout: False; layout is managed by templates and regions; Theme Styles handle colors, fonts, etc.

C . "Is Current" depends on "Read Only": False; "Is Current" marks the default style, independent of "Read Only" (which locks editing).

Technical Insight: Public styles require multiple defined styles and a UI component (e.g., Dynamic Action) to expose the switcher.

Use Case: Offering light/dark mode options to users.

Pitfall: Without a switcher, "Is Public" has no visible effect.

NEW QUESTION # 25

There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- A. Removing P1_SALARY from the validation Associated Item.
- B. Setting Value Required to Yes on P1_SALARY.
- C. Setting Display Location to Inline in Notification

Answer: C

Explanation:

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

NEW QUESTION # 26

Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX_PWA.HAS_PUSH_SUBSCRIPTION
- B. APEX_PWA.PURGE_QUEUE
- C. APEX_PWA.PUSH_QUEUE

Answer: C

Explanation:

The APEX_PWA package manages Push Notifications:

B . APEX_PWA.PUSH_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes).

Example: APEX_PWA.PUSH_QUEUE; ensures a "Meeting now!" alert goes out instantly.

A . APEX_PWA.HAS_PUSH_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.

C . APEX_PWA.PURGE_QUEUE: Clears the queue, discarding unsent messages, not sending them

Technical Insight: PUSH_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.

Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.

Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

NEW QUESTION # 27

Which statement is true about the Link Column attributes of an Interactive Report?

- A. If you select Link Column, it is always displayed as the last column in the report.
- B. A Link Column cannot be sorted, hidden, or moved by an end user.
- C. It is not possible to include a custom target in Link Column.
- D. It is not possible to exclude Link Column.

Answer: D

Explanation:

The Link Column in an Interactive Report adds a clickable link to each row. The true statement is:

It is not possible to exclude Link Column: Once defined in the report attributes, the Link Column is mandatory and cannot be hidden or excluded via end-user controls (e.g., Column Management). It's always rendered unless removed by the developer.

Custom target: False; custom targets (e.g., URLs, pages) can be defined.

Always last column: False; its position is configurable.

Cannot be sorted/hidden/moved: False; end users can sort or move it, though hiding is restricted.

This behavior ensures consistent navigation in reports.

NEW QUESTION # 28

Which two AI Service Providers are supported by Oracle APEX?

- A. Jarvis
- B. OpenAI
- C. OCI Generative AI
- D. DOC Document Generator pre-built function

Answer: B,C

Explanation:

Oracle APEX integrates with external AI service providers to power features like Generative AI and text generation. The supported providers are:

OpenAI: A widely recognized AI provider offering models like GPT, integrated via API keys for tasks such as text generation, summarization, or SQL authoring in APEX.

OCI Generative AI: Oracle Cloud Infrastructure's native AI service, optimized for Oracle ecosystems, providing secure, scalable AI capabilities directly within the OCI environment.

DOC Document Generator: This is not an AI service provider; it's a hypothetical or misnamed option unrelated to APEX's AI integration.

Jarvis: While a fictional AI (e.g., from Iron Man), it's not a real provider supported by APEX.

These integrations require configuration in the Instance Administration settings, including credentials and endpoints, enabling APEX

to leverage cutting-edge AI for app development and runtime features.

NEW QUESTION # 29

.....

The Oracle 1Z1-771 exam material is getting updated on a daily basis according to the real Oracle 1Z1-771 exam questions so that the students don't face any issues while preparing themselves for the Oracle APEX Cloud Developer Professional (1Z1-771) certification exam and pass it with ease. We guarantee our customers that they will pass 1Z1-771 exam on the first try with our given 1Z1-771 exam material.
