## Complete Exam 200-901 Guide | Amazing Pass Rate For 200-901: DevNet Associate Exam | Trusted Pass 200-901 Guide

We attach importance to candidates' needs and develop the 200-901 practice materials from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our 200-901 practice materials, you only need to spend a total of 20-30 hours to deal with exams, because our 200-901 practice materials are highly targeted and compiled according to the syllabus to meet the requirements of the exam. As long as you follow the pace of our 200-901 practice materials, you will certainly have unexpected results.

## Cisco DevNet Associate Exam Sample Questions (Q403-Q408):

### NEW QUESTION # 403

Before which process is code review performed when version control is used?

- A. committing code
- B. checkout of code
- C. branching code

- D. merge of code

**Answer: D**

Explanation:

Code review is typically performed before the merge of code in a version control system. This process involves examining code changes to ensure they meet the required standards, are free of bugs, and align with the project's goals. The review usually happens after code has been committed to a feature branch but before it is merged into the main branch. This helps maintain the integrity of the main branch and ensures that any issues are caught early. More information can be found in best practices for code review.

#### NEW QUESTION # 404

A developer is developing a web application that uses username and password to authenticate to the next service. The user credentials must be available at any time in the application. The developer must choose and implement a secure method of storing the authentication credentials that are used in the automation code.

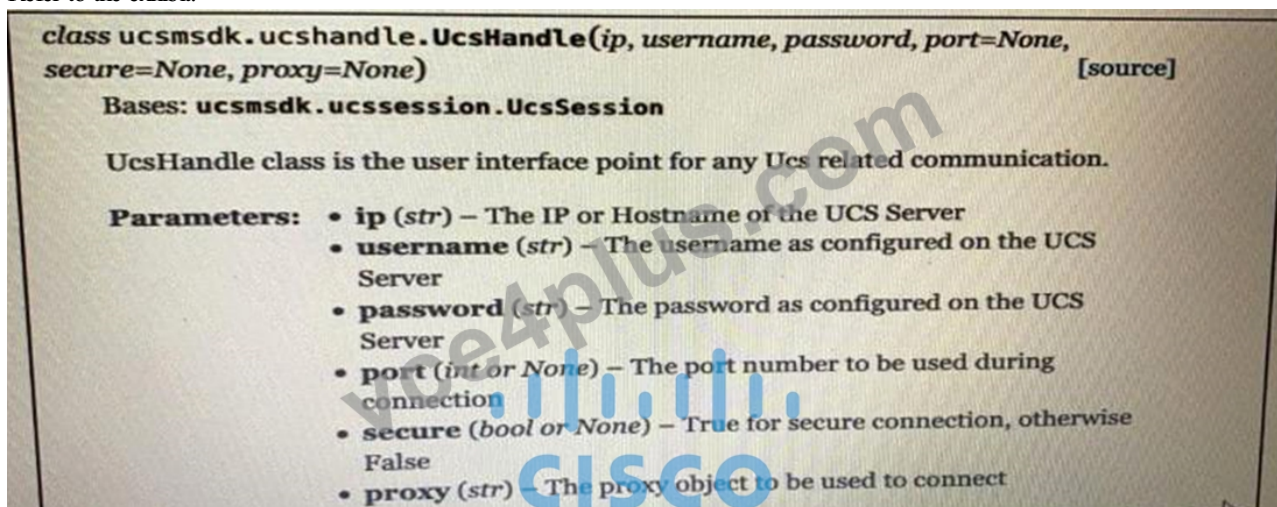

Which password handling method must be used to minimize the security risk?

- A. Store the username and password in a separate configuration file.
- B. Store the passwords in a dictionary.
- C. Store the username and password in a vault.
- D. Store the username and password in code.

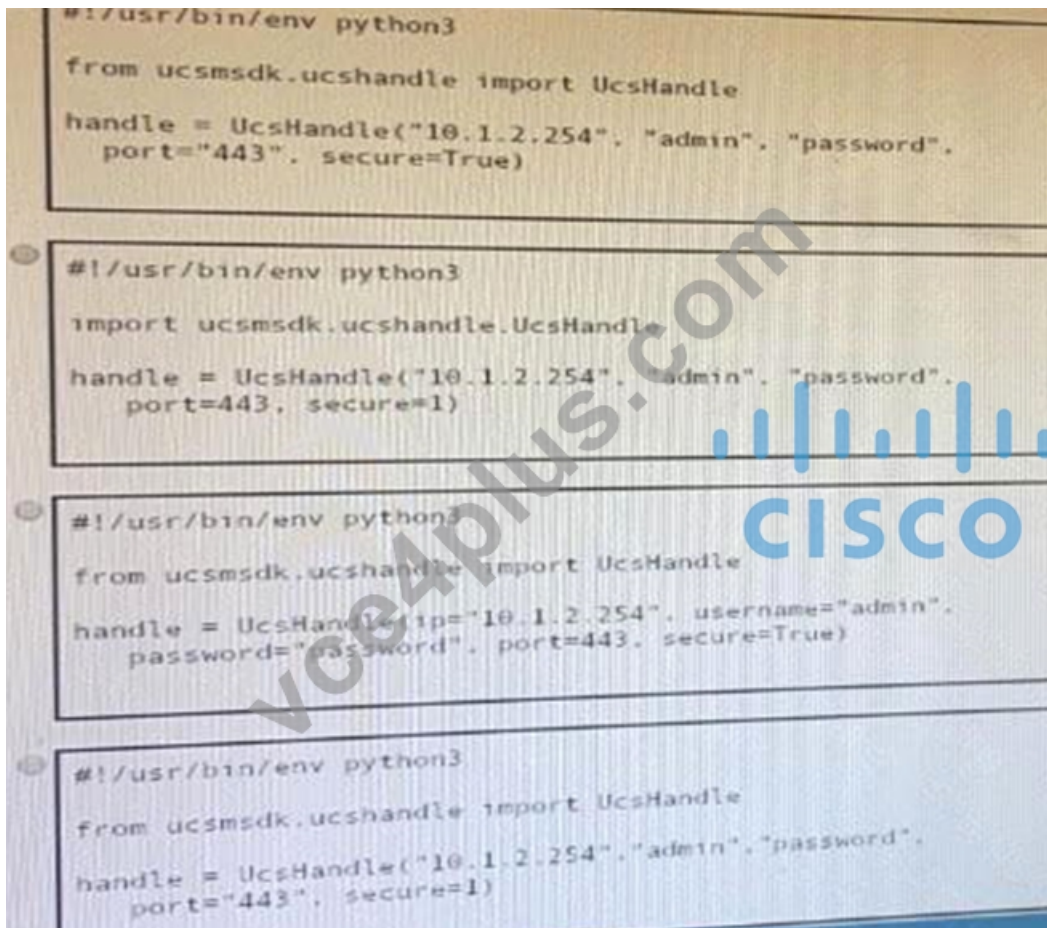

**Answer: C**

#### NEW QUESTION # 405

Refer to the exhibit.

Given the API documentation for the UCS SDK python class, UcsHandle, which code snippet creates a handle instance?

- A. Option D
- B. Option A
- **C. Option B**
- D. Option C

**Answer: C**

#### NEW QUESTION # 406

Which action is taken by switch port enabled for PoE power classification override?

- A. If a switch determines that a device is using less than the minimum configured power, it assumes the device has failed and disconnects it.
- **B. If a monitored port exceeds the maximum administrative value for power, the port is shutdown and err- disabled.**
- C. When a powered device begins drawing power from a PoE switch port, a syslog message is generated.
- D. As power usage on a PoE switch port is checked, data flow to the connected device is temporarily paused.

**Answer: B**

Explanation:

Section: Network Fundamentals

Explanation/Reference: [https://www.cisco.com/c/en/us/td/docs/switches/lan/catalyst6500/ios/12-2SX/configuration/guide/book/power\\_over\\_ethernet.pdf](https://www.cisco.com/c/en/us/td/docs/switches/lan/catalyst6500/ios/12-2SX/configuration/guide/book/power_over_ethernet.pdf)

#### NEW QUESTION # 407

A developer is writing an application that a REST API and the application requires a valid from the API which element of the response is used in the conditional check?

- A. URL
- B. Body

- C. Link
- D. Headers
- E. Status code

**Answer: E**

Explanation:

When a developer is writing an application that interacts with a REST API, the status code of the response is a critical element used in conditional checks. The status code provides information about the success or failure of the request. Common status codes include:

200: OK (The request was successful).

201: Created (The resource was successfully created).

400: Bad Request (The server could not understand the request due to invalid syntax).

401: Unauthorized (Authentication is required and has failed or has not been provided).

404: Not Found (The requested resource could not be found).

By checking the status code, the application can determine if the request was successful and handle errors appropriately.

## NEW QUESTION # 408

.....

If you buy the 200-901 learning materials from our company, we are glad to provide you with the high quality 200-901 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the 200-901 Learning Materials from our company. If you decide to buy the 200-901 study question from our company, you will receive a lot beyond your imagination.
