

Exam 2V0-11.25 Cram Questions, Real 2V0-11.25 Question

If you buy our Software version of the 2V0-11.25 study questions, you can enjoy the similar real exam environment for that this version has the advantage of simulating the real exam. In addition, the software version of our 2V0-11.25 learning guide is not limited to the number of the computer. As long as you use it on the Windows system, then you can enjoy the convenience of this version brings. So do not hesitate and buy our Software version of 2V0-11.25 Preparation exam, you will benefit a lot from it.

You can avail all the above-mentioned characteristics of the desktop software in this web-based VMware 2V0-11.25 practice test. While you appear in the VMware 2V0-11.25 real examination, you will feel the same environment you faced during our VMware 2V0-11.25 practice test.

Quiz Useful VMware - 2V0-11.25 - Exam VMware Cloud Foundation 5.2 Administrator Cram Questions

This is a mutually beneficial learning platform, that's why our 2V0-11.25 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test 2V0-11.25 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success. Respect the user's choice, will not impose the user must purchase the 2V0-11.25 Study Materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying exams.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

An administrator is preparing to deploy VMware Aria Suite Lifecycle using SDDC Manager. Which three are prerequisites for deploying Aria Suite Lifecycle? (Choose three.)

- A. Ensure that the NTP and DNS settings specified in SDDC Manager are valid for all management components.
- B. Ensure the VMware Software Install Bundle for VMware Aria Suite Lifecycle is in the local bundle repository.
- C. Verify that the password for the admin(local user account meets the complexity requirements.
- D. Ensure that a custom SSL certificate specifying the FQDN of the appliance is available.
- E. Ensure that the Application Virtual Networks have been configured.

Answer: A,B,D

Explanation:

Ensure that a custom SSL certificate specifying the FQDN of the appliance is available: A custom SSL certificate for the FQDN of the Aria Suite Lifecycle appliance is required for secure communication between components.

Ensure that the NTP and DNS settings specified in SDDC Manager are valid for all management components:

Accurate NTP and DNS settings are crucial for time synchronization and proper domain resolution in the environment.

Ensure the VMware Software Install Bundle for VMware Aria Suite Lifecycle is in the local bundle repository: The required software bundle must be available in the local repository to ensure successful deployment.

NEW QUESTION # 108

An administrator is managing a VMware Cloud Foundation (VCF) environment. To support virtual machine backup using a third-party tool, the administrator has been tasked with assigning a service account (srvbackup01) access to the Production Virtual Machine (VM) folder and all child objects. The company security policy dictates that only the minimum required permissions must be assigned to service accounts to ensure they can function as designed.

Which three actions should the administrator take in the vSphere Client to complete the objective? (Choose three.)

- A. Assign the backup_service role to the srvbackup01 user on the Production VM folder and propagate to all child objects.
- B. Select the necessary privileges for the backup_service role.
- C. Assign the backup_service role to the srvbackup01 user on the Production VM folder only.
- D. Assign the Administrator role to the srvbackup01 user on the Production VM folder and propagate to all child objects.
- E. Clone the Administrator Role to create the backup_service role.
- F. Create a new Role called backup_service.

Answer: A,B,F

Explanation:

You need a dedicated backup_service role to tailor permissions.

Populate that role with only the required privileges for backup operations.

Assign the backup_service role to srvbackup01 on the Production VM folder and enable propagation so all child VMs inherit those minimal permissions.

NEW QUESTION # 109

An administrator is tasked with troubleshooting an issue where some VMs are not appearing in the vCenter inventory after a recent migration to a new vSphere environment.

Which two components should the administrator examine to resolve this issue? (Choose two.)

- A. The storage policies applied to the VMs.
- B. The vSphere permissions assigned to the VMs.
- C. The compatibility of the VM hardware version with the new vSphere environment.
- D. The network settings of the new vSphere environment.
- E. The registration status of the VMs in the new vSphere environment.

Answer: C,E

Explanation:

If the hardware version of the virtual machines is incompatible with the new vSphere environment, the VMs may not appear or may fail to register properly. Ensuring compatibility between the VM hardware version and the vSphere environment is essential for successful VM migration.

If the VMs are not correctly registered in the new vSphere environment after migration, they won't show up in the vCenter inventory.

Checking the registration status helps to identify if this is the issue.

NEW QUESTION # 110

An administrator is unable to log in to the SDDC Manager UI on their local workstation. After entering the correct URL, the login page does not load and the administrator is unable to enter their credentials in order to view the SDDC Manager inventory. They confirm that the SDDC Manager appliance responds to a ping command from their local workstation against both its FQDN and IP address.

After checking the VM console of the SDDC Manager appliance in the management vCenter UI, they determine that the operating system is online and they can log in to it with the relevant administrator level accounts.

What two actions could the administrator take whilst logged in to the SDDC Manager VM via the VM console to help identify the root cause of the UI not loading? (Choose two.)

- A. Verify the health of the SDDC Manager services using the command `sos --get-vcf-services-summary`.
- B. Perform a restart of the network adapter using the command `systemctl restart`.
- C. Perform a restart of the services using the command `systemctl restart`.
- D. Verify that there is free disk space remaining using the command `df -h`.
- E. Verify that port 80 is open and listening for connections using the command `netstat`.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the VMware Cloud Foundation 5.2 Administration Guide and troubleshooting documentation, when the SDDC Manager UI does not load even though the appliance is reachable and online, administrators should check both the health of services and the system resources. Here's the detailed reasoning and exact documentation extracts:

Option C: Verify the health of the SDDC Manager services using the command `sos --get-vcf-services-summary`.

Official documentation states:

"You can check the status of SDDC Manager services by running the `sos` command on the SDDC Manager VM. This command provides a summary of all SDDC Manager services and their current state. If any service is stopped or unhealthy, this may prevent the UI from loading." Reference:

Option E: Verify that there is free disk space remaining using the command `df -h`.

Official documentation specifies:

"If the SDDC Manager appliance runs out of disk space, the UI and related services may become unresponsive. Use the `df -h` command to check for available disk space on the appliance." Why Not the Other Options?

Option A: Port 80 is not used for the SDDC Manager UI; the UI listens on port 443 (HTTPS).

Option B and D: Restarting the network adapter or services without first identifying the root cause is not a recommended troubleshooting step according to the official documentation.

Summary:

The administrator should check the SDDC Manager services health (C) and ensure there is free disk space (E) on the appliance, as recommended by the VMware official documentation for troubleshooting UI access issues in VMware Cloud Foundation 5.2.

NEW QUESTION # 111

A Cloud Administrator has been tasked with verifying all of the prerequisites are in place prior to deploying VMware Aria Suite Lifecycle. The following information has been provided for the Aria Suite Lifecycle implementation:

hostname: lcm

domain: vcf.company.com

IP address: 10.0.0.150 /24

IP gateway: 10.0.0.1

Which three items must the Cloud Administrator ensure are available prior to deploying VMware Aria Suite Lifecycle? (Choose three.)

- A. A DNS PTR Record for 10.0.0.1 that points to lcm.vcf.company.com
- B. A DNS A Record for lcm.vcf.company.com that points to 10.0.0.150
- C. The IP address for the Standalone Tier 1 Load Balancer for VMware Aria components is prepared
- D. A CA-signed SSL certificate for Aria Suite Lifecycle added to SDDC Manager
- E. Connectivity between Application Virtual Networks, Management Network, and network services (DNS and NTP)

Answer: B,C,E

NEW QUESTION # 112

.....

As is known to us, the leading status of the knowledge-based economy has been established progressively. It is more and more important for us to keep pace with the changeable world and improve ourselves for the beautiful life. So the 2V0-11.25 certification has also become more and more important for all people. Because a lot of people long to improve themselves and get the decent job. In this circumstance, more and more people will ponder the question how to get the 2V0-11.25 Certification successfully in a short time. And our 2V0-11.25 exam questions will help you pass the 2V0-11.25 exam for sure.

Real 2V0-11.25 Question: <https://www.dumpsking.com/2V0-11.25-testking-dumps.html>

VMware Exam 2V0-11.25 Cram Questions But I think few of you know the advantages after getting certificates, Through looking at the demos the clients can understand part of the contents of our 2V0-11.25 study materials, the form of the questions and answers and our software, then confirm the value of our 2V0-11.25 study materials, VMware Exam 2V0-11.25 Cram Questions This dump is very update.

To achieve that organization, you must assign the tasks of creating, 2V0-11.25 editing, reviewing, and testing assets to diverse specialists, who produce finished web assets to be deployed to production.

2025 VMware First-grade 2V0-11.25: Exam VMware Cloud Foundation 5.2 Administrator Cram Questions

Many people have gained good grades after using our 2V0-11.25 real dumps, so you will also enjoy the good results, But I think few of you know the advantages after getting certificates.

Through looking at the demos the clients can understand part of the contents of our 2V0-11.25 Study Materials, the form of the questions and answers and our software, then confirm the value of our 2V0-11.25 study materials.

This dump is very update, In order to cater your needs to pass exam successfully our 2V0-11.25 study guide have the ability do that and improve your aspiration about core knowledge, Which means our VMware 2V0-11.25 guide torrent materials abound with useful knowledge you are always looking for.

2V0-11.25 practice test and 2V0-11.25 exam preparatory have three versions: the PDF version, the software version and the online version, which can meet your needs during your 2V0-11.25 exam preparation.
