

Exam 300-420 Papers, Associate 300-420 Level Exam

BONUS!!! Download part of DumpsValid 300-420 dumps for free: https://drive.google.com/open?id=1mqPfyZ6cftgow_eljr9B5vtugemsYQX1

Candidates who participate in the Cisco practice exam should first choose our latest braindumps pdf. It will help you pass test with 100% guaranteed. Besides, our 300-420 exam prep can help you fit the atmosphere of actual test in advance, which enable you to improve your ability with minimum time spent on 300-420 Dumps PDF and maximum knowledge gained.

The Cisco 300-420 exam consists of 60-70 questions and lasts for 90 minutes. The questions are designed to test the candidate's ability to design and implement enterprise networks using Cisco technologies. 300-420 exam is based on real-world scenarios and requires the candidate to demonstrate their ability to solve complex network design problems.

To prepare for the Cisco 300-420 Certification Exam, candidates can take various training courses offered by Cisco, such as the Designing Cisco Enterprise Networks (ENSLD) training course. Candidates can also use study materials such as practice exams, study guides, and online resources to prepare for the exam.

Use 300-420 Exam Questions [2025]-Forget About Failure

DumpsValid Cisco 300-420 preparation material is a comprehensive solution for Cisco 300-420 test preparation, with a variety of features aimed to help you earning the 300-420. The 300-420 test is a required step in getting the Designing Cisco Enterprise Networks certification badge. With DumpsValid, you will get access to Cisco 300-420 Actual Questions that will allow you to focus on important concepts and prepare for the Cisco exam in a short period of time.

Cisco 300-420 Certification Exam is a comprehensive test that evaluates the candidates' knowledge and skills in designing Cisco Enterprise Networks. 300-420 exam is part of the Cisco Certified Design Professional (CCDP) certification program and is designed for IT professionals who want to validate their expertise in designing complex enterprise network solutions.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q239-Q244):

NEW QUESTION # 239

An engineer must design an in-band management solution for a customer with branch sites. The solution must allow remote management of the branch sites using management protocols over an MPLS WAN. Queueing is implemented at the remote sites using these classes:

- Class1 equals voice traffic
- Class2 equals mission-critical traffic
- Class3 equals default traffic

How must the solution prioritize the management traffic over the WAN?

- A. Mark the traffic with DSCP CS2 and map into Class2 with a minimum bandwidth assigned by reducing the bandwidth available to Class3
- B. Mark the traffic with DSCP EF and map into Class1 with a minimum bandwidth assigned by reducing the bandwidth available to Class2.

- C. Mark the traffic with DSCP CS6 and map into Class1 with a minimum bandwidth assigned by reducing the bandwidth available to Class2
- D. Mark the traffic with DSCP CS1 and map into Class2 with a minimum bandwidth assigned by reducing the bandwidth available to Class3.

Answer: A

NEW QUESTION # 240

How are wireless endpoints registered in the HTDB in a Cisco SD-Access architecture?

- A. Border nodes first register endpoints and then update the HTDB
- B. Fabric edge nodes update the HTDB based on CAPPWAP messaging from the AP
- C. Fabric APs update the HTDB with the clients' EID and RLOC
- D. Fabric WLCs update the HTDB as new clients connect to the wireless network

Answer: D

Explanation:

Fabric WLC

Both fabric WLCs and non-fabric WLCs provide AP image and configuration management, client session management, and mobility services. Fabric WLCs provide additional services for fabric integration such as registering MAC addresses of wireless clients into the **host tracking database** of the fabric control plane nodes during wireless client join events and supplying fabric edge node RLOC-association updates to the HTDB during client roam events.

NEW QUESTION # 241

Drag and drop the model-driven telemetry considerations from the left onto the modes they apply to on the right.

uses a transient connection	Dial-In Mode
no need to open ports for inbound management traffic	
anycast and load-balancing	Dial-Out Mode
single channel (config and streaming)	

Answer:

Explanation:

uses a transient connection	Dial-In Mode
no need to open ports for inbound management traffic	
anycast and load-balancing	Dial-Out Mode
single channel (config and streaming)	

NEW QUESTION # 242

How are wireless endpoints registered in the HTDB in a Cisco SD-Access architecture?

- A. Border nodes first register endpoints and then update the HTDB
- B. Fabric edge nodes update the HTDB based on CAPPWAP messaging from the AP
- C. Fabric APs update the HTDB with the clients' EID and RLOC
- **D. Fabric WLCs update the HTDB as new clients connect to the wireless network**

Answer: D

Explanation:

NEW QUESTION # 243

A company is planning to open two new branches and allocate the 2a01:c30:16:7009::3800/118 IPv6 network for the region. Each branch should have the capacity to accommodate maximum of 200 hosts. Which two networks should the company use? (Choose two.)

- A. 2a01:0c30:0016:7009::3c00/120
- **B. 2a01:0c30:0016:7009::3b00/120**
- **C. 2a01:0c30:0016:7009::3a00/120**
- D. 2a01:0c30:0016:7009::3a80/121
- E. 2a01:0c30:0016:7009::3b00/121

Answer: B,C

Explanation:

Network range for 2a01:c30:16:7009::3800/118

2a01:0c30:0016:7009:0000:0000:0000:3800-

2a01:0c30:0016:7009:0000:0000:0000:3bff

Network Range for 2a01:0c30:0016:7009::3a00/120

2a01:0c30:0016:7009:0000:0000:0000:3a00-

2a01:0c30:0016:7009:0000:0000:0000:3aff

Network range for 2a01:0c30:0016:7009::3b00/120

2a01:0c30:0016:7009:0000:0000:0000:3b00-

2a01:0c30:0016:7009:0000:0000:0000:3bff
