

Exam 350-601 Voucher, Exam 350-601 Consultant

DOWNLOAD the newest Prep4sureExam 350-601 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=12UKcoLd7wY1IxKdUwhUT0PJ4DRuK930j>

It is very convenient for you to use the online version of our 350-601 real test. If you realize convenience of the online version, it will help you solve many problems. On the one hand, the online version is not limited to any equipment. You are going to find the online version of our 350-601 Test Prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our 350-601 study materials, you don't need to worry about no WLAN network.

The Cisco 350-601 exam tests the candidate's ability to implement and configure data center technologies, including network, compute, storage network, automation, security, and application optimization. It covers various technologies such as Cisco Nexus switches, Cisco ACI, Cisco UCS, Cisco HyperFlex, and Cisco Intersight. 350-601 Exam also tests the candidate's knowledge of troubleshooting, scripting, and automation tools. To achieve success in the exam, the candidates need to have a deep understanding of data center technologies, industry best practices, and hands-on experience with Cisco products.

Exam 350-601 Consultant & Valid 350-601 Exam Sample

You can practice all the difficulties and hurdles which could be faced in an actual Cisco exam. It also assists you in boosting confidence and reducing problem-solving time. The Pass4future designs 350-601 desktop-based practice software for desktops, so you can install it from a website and then use it without an internet connection. You only need an internet connection to verify the license of the products. No other plugins are required to employ it.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q100-Q105):

NEW QUESTION # 100

Refer to the exhibit.

A network engineer must configure port E1/31- 32 to forward only storage server traffic of VLAN 200 on Cisco fabric interconnects A and B. Port E1/31- 32 is not reserved for any other traffic. Which port type must be configured to accomplish this goal?

- A. uplink
- B. FCoE storage
- **C. FCoE uplink**
- D. unified uplink

Answer: C

Explanation:

The FCoE uplink port type is designed to carry Fibre Channel over Ethernet traffic, which is typically used for storage server communication. Configuring port E1/31-32 as FCoE uplinks will ensure that only storage server traffic for VLAN 200 is forwarded, aligning with the requirement to dedicate these ports solely for storage traffic

NEW QUESTION # 101

Which configuration must be used to boot a Cisco UCS C-Series Server using iSCSI?

- A. Configure eth0 as an initiator and configure the VLAN as a trunk.
- B. Configure a vNIC as an initiator and target using the IQN and LUN ID.
- C. Set up eth1 as the target and use the remote IQN.
- **D. Implement an iSCSI adapter using the initiator IQN name.**

Answer: D

NEW QUESTION # 102

An engineer must configure Protocol Independent Multicast on two Cisco Nexus 9000 Series Switches. The engineer must ensure that the chosen rendezvous point (RP) uses a mapping agent and only supports one RP per multicast group. Which type of RP must be used on both switches to meet these requirements?

- A. static
- **B. Auto-RP**
- C. Anycast-RP
- D. bootstrap router

Answer: B

Explanation:

Auto-RP (Automatic Rendezvous Point) is the correct choice because it:

1. Uses a Mapping Agent

The Auto-RP mechanism designates a Mapping Agent that dynamically learns and advertises the RP information to all multicast routers in the network.

2. Supports One RP per Multicast Group

Auto-RP ensures that only one RP is chosen per multicast group, preventing conflicts and providing stability.

NEW QUESTION # 103

An engineer implements an ACI fabric and must implement microsegmentation of endpoints within the same IP subnet using a network-based attribute. The attribute mapping must allow IP subnet independence. Which attribute must be selected?

- A. IP
- **B. Tag**
- C. Custom
- D. MAC address

Answer: B

Explanation:

The attribute that must be selected to implement microsegmentation of endpoints within the same IP subnet using a network-based attribute that allows IP subnet independence is the Tag attribute. The Tag attribute is a user-defined attribute that can be assigned to endpoints based on any criteria, such as location, function, or security level. The Tag attribute can be used to create microsegmentation policies in ACI, which define the rules for communication between endpoints within the same or different bridge domains. The Tag attribute enables IP subnet independence, which means that the microsegmentation policies are not tied to the IP subnet of the endpoints, and can be applied across different subnets or even different fabrics. The Tag attribute also simplifies the management and scalability of microsegmentation policies, as it does not require the use of IP addresses or MAC addresses to identify endpoints. References :=

NEW QUESTION # 104

A network administrator must configure an extra keyring in Cisco UCS Manager. The key must provide a high level of encryption and secure authentication when users use the web interface. Which configuration command set must be applied to meet these requirements?

```

❑ set https keyring kring7984
  set https cipher-suite-mode secure
  set https ssl-protocol tls1-2
  commit-buffer

● set https keyring kring7984
  set https cipher-suite-mode secure
  set https tls-protocol tls1-2
  commit-buffer

● set https keyring kring7984
  set https cipher-suite-mode high
  set https ssl-protocol tls1-2#
  commit-buffer

❑ set https keyring kring7984
  set https cipher-suite-mode high
  set https tls-protocol tls1-2
  commit-buffer

```

- A. Option A
- B. Option B
- **C. Option C**
- D. Option D

Answer: C

Explanation:

https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/ucs-manager/CLI-User-Guides/Admin-Management/3-1/b_Cisco_UCS_Manager_CLI_Administration_Mgmt_Guide_3_1/b_Cisco_UCS_Manager_CLI_Administration_Mgmt_Guide_3_1_chapter_0110.html

"cipher-suite-mode secure" is invalid command.

"Cipher-suite-mode high" is valid command.

"tls-protocol tls1-2" is invalid command.

"Ssl-protocol tls1-2" is valid command.

UCS-A# **scope system**

UCS-A /system # **scope services**

UCS-A /system/services # **enable https**

UCS-A /system/services* # **set https port 443**

Warning: When committed, this closes all the web sessions.

UCS-A /system/services* # **set https keyring kring7984**

UCS-A /system/services* # **set https cipher-suite-mode high**

UCS-A /system/services* # **set https ssl-protocol tls1-2**

UCS-A /system/services* # **commit-buffer**

UCS-A /system/services #

NEW QUESTION # 105

.....

Prep4sureExam can not only achieve your dreams, but also provide you one year of free updates and after-sales service. The answers of Prep4sureExam's exercises is 100% correct and they can help you pass Cisco Certification 350-601 Exam successfully. You can free download part of practice questions and answers of Cisco certification 350-601 exam online as a try.
