Latest AD0-E725 Test Report - AD0-E725 Boot Camp

Before the clients purchase our AD0-E725 study practice guide, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our AD0-E725 exam materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our AD0-E725 useful test guide and the discounts. You can have a comprehensive understanding of our AD0-E725 useful test guide after you see this information.

Adobe Commerce Developer Expert Sample Questions (Q18-Q23):

NEW QUESTION # 18

A client recently started using the new Adobe Live Search functionality. They report an issue with content from the website, such as CMS blocks, not returning with the search result.

A Developer is asked to investigate because the client wants this content to be part of the data pool of Live Search. How should the Developer respond to the client?

- A. Extend the class `Magento\LiveSearchAdapter\Model\Attribute\Metadata`.

- B. Advise the client to enable content for Live Search from admin panel.
- C. Share documentation regarding the limitations of Live Search.

Answer: C

NEW QUESTION # 19

A Developer working on an Adobe Commerce Cloud project encounters an issue with the database service that requires investigation. To troubleshoot the issue, the Developer decides to securely access the cloud services from the local machine to directly interact with the services and run diagnostic commands.

Which command step is required to achieve this?

- A. Use the `magento-cloud service:connect` command to access the cloud services.
- B. Use the `magento-cloud tunnel:open` command to access the cloud services.
- C. Use the `php bin/magento cloud:tunnel:connect` command to access the cloud services.

Answer: B

Explanation:

To securely access services (such as MySQL, Redis, Elasticsearch) running in Adobe Commerce Cloud, developers must use the tunnel feature. The correct command is:

`magento-cloud tunnel:open`

This opens a secure tunnel from the local machine to the remote cloud environment services.

A is incorrect; there is no `cloud:tunnel:connect` Magento command.

B is incorrect; `service:connect` is not a valid Cloud CLI command.

C is correct.

Reference:

Adobe Commerce Cloud CLI - Tunnel to services

NEW QUESTION # 20

A Developer is tasked with extending the GraphQL capabilities of a client's Adobe Commerce project by adding custom attributes to the product query.

Which step should the Developer take to correctly implement this GraphQL customization?

- A. Extend the `ProductInterface` by creating a `schema.graphqls` file in the custom module's `etc` directory.
- B. Add new attributes in the Adobe Commerce admin panel to reflect the additions.
- C. Add `aroundGetList` and `afterGetList` plugins to the `ProductRepositoryInterface` to reflect the new attributes.

Answer: A

Explanation:

The correct way to extend GraphQL is to extend the schema via `schema.graphqls`.

Define new fields for `ProductInterface`.

Provide a resolver class to return the attribute values.

B is incorrect: adding attributes in admin does not automatically expose them in GraphQL.

C is incorrect: repository plugins affect service contracts, not GraphQL schema definitions.

Reference:

Adobe Commerce DevDocs - Extend GraphQL schema

NEW QUESTION # 21

An Adobe Commerce Developer is tasked to frequently send data to a third-party API. The API utilizes a JSON Web Token (JWT) that expires every hour. The developer decides to store the JWT in a custom cache.

Which step should the Developer take to implement this new custom cache type correctly?

- A. Define the custom cache type in the `di.xml`, ensuring the cache model implements `CacheInterface`.
- B. Define the custom cache type in `cache.xml` with a unique name and instance.
- C. Define the custom cache type directly in `system.xml` at the website level.

Answer: B

Explanation:

To create a custom cache type in Adobe Commerce:

Define the cache type in etc/cache.xml with a unique ID and class instance.

This ensures Magento recognizes the cache type and allows managing it with cache commands.

Option A is incorrect; DI configuration is not where cache types are defined.

Option C is wrong; system.xml defines admin configurations, not cache types.

Reference:

Adobe Commerce DevDocs - Custom cache types

NEW QUESTION # 22

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost.

How should the Developer implement this task functionality?

- **A. Register new Source Selection Algorithms (SSA) via di.xml and implement SourceSelectionInterface.**
- B. Configure Distance Priority Algorithm and implement PlaceReservationsForSalesEventInterface.
- C. Use Source Priority Algorithm and utilize GetSourceSelectionAlgorithmList.

Answer: A

Explanation:

To customize how inventory sources are prioritized, developers must create a new Source Selection Algorithm (SSA). This is done by registering a new SSA in di.xml and implementing SourceSelectionInterface. This allows developers to define rules such as shipping address proximity or delivery cost.

B is partially correct: Distance Priority Algorithm exists, but implementing PlaceReservationsForSalesEventInterface is not the right way to customize selection logic.

C Source Priority Algorithm is fixed (based on predefined priority), not custom.

Reference:

Adobe Commerce DevDocs - Inventory Source Selection Algorithm

Official Documentation Extracts:

"To customize source selection behavior, implement a custom Source Selection Algorithm (SSA). The algorithm must implement SourceSelectionInterface and be registered via dependency injection (di.xml)." - Adobe Commerce DevDocs: Custom Source Selection Algorithm

"Adobe Commerce provides default SSAs: Source Priority Algorithm and Distance Priority Algorithm.

Custom SSAs can be created to satisfy specific business requirements such as delivery costs." - Adobe Commerce Inventory Management Guide

NEW QUESTION # 23

.....

Please believe that our company is very professional in the research field of the AD0-E725 study materials, which can be illustrated by the high passing rate of the examination. Despite being excellent in other areas, we have always believed that quality and efficiency should be the first of our AD0-E725 study materials. For study materials, the passing rate is the best test for quality and efficiency. There may be some other study materials with higher profile and lower price than our products, but we can assure you that the passing rate of our AD0-E725 Study Materials is much higher than theirs.
