

Exam ANS-C01 Dumps - ANS-C01 Updated Demo

What's more, part of that PassTestking ANS-C01 dumps now are free: <https://drive.google.com/open?id=1SqpcFdnVngHIZ85zLb4IQGHZHR575Sw>

Once you decide to take Amazon ANS-C01 practice questions from PassTestking then consider your money secure. PassTestking is the only reliable brand that regularly updates AWS Certified Advanced Networking Specialty Exam ANS-C01 exam products. We have a team of competent employees who update Amazon ANS-C01 exam preparation material on daily basis according to the exam syllabus. So, you don't need to get worried. You can try a free demo of all ANS-C01 practice question formats before purchasing. Furthermore, PassTestking offers a 100% money-back guarantee. If you don't pass the AWS Certified Advanced Networking Specialty Exam ANS-C01 exam after using our product then you can claim a refund and we will refund you as soon as possible.

As a responsible company with great reputation among the market, we trained our staff and employees with strict beliefs to help you with any problems about our ANS-C01 Learning materials 24/7. Even you have finished buying our ANS-C01 Study Guide with us, we still be around you with considerate services. In a word, our service will offer you the best help on Our ANS-C01 exam quiz. Just click on the contact button, you will receive our service.

ANS-C01 Updated Demo - ANS-C01 Accurate Answers

We can conclude this post with the fact that to clear the AWS Certified Advanced Networking Specialty Exam (ANS-C01) certification exam, you need to be prepared before, study well, and practice. You cannot rely on your luck to score well in the ANS-C01 exam. You have to prepare with PassTestking real Amazon ANS-C01 Exam Questions to clear the ANS-C01 test in one go. You will also receive up to 365 days of free updates and ANS-C01 dumps pdf demos. Purchase the AWS Certified Advanced Networking Specialty Exam (ANS-C01) practice tests today and get these amazing offers.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q149-Q154):

NEW QUESTION # 149

A company is running an online game on AWS. The game is played globally and is gaining popularity. Users are reporting problems

with the game's responsiveness. Replay rates are dropping, and the company is losing subscribers. Game servers are located in the us-west-2 Region and use an Elastic Load Balancer to distribute client traffic.

The company has decided to deploy game servers to 11 additional AWS Regions to reduce the round-trip times of network traffic to game clients. A network engineer must design a DNS solution that uses Amazon Route 53 to ensure that user traffic is delivered to game servers with an optimal response time.

What should the network engineer do to meet these requirements?

- A. Create Route 53 records for the Elastic Load Balancers in each Region. Specify a weighted routing policy. Calculate the weight by using the number of clients in each Region.
- B. Create Route 53 records for the Elastic Load Balancers in each Region. Specify a multivalue answer routing policy. Test latency from the game client, and connect to the server with the best response.
- **C. Create Route 53 records for the Elastic Load Balancers in each Region. Specify a latency routing policy. Set the Region to the Region where the Elastic Load Balancer is deployed.**
- D. Create Route 53 records for the Elastic Load Balancers in each Region. Specify a geolocation routing policy. Set the location to the Region where the Elastic Load Balancer is deployed.

Answer: C

NEW QUESTION # 150

A company is deploying a new web application that uses a three-tier model with a public-facing Network Load Balancer and web servers in an Amazon VPC. The application servers are hosted in the company's data center. There is an AWS Direct Connect connection between the VPC and the company's data center.

Load testing results indicate that up to 100 servers, equally distributed across multiple Availability Zones, are required to handle peak loads. The Network Engineer needs to design a VPC that has a /24 CIDR assigned to it.

How should the Engineer allocate subnets across three Availability Zones for each tier?

Response:

- A. Network Load Balancer: /28 per subnet
Web: /27 per subnet
- B. Network Load Balancer: /28 per subnet
Web: /25 per subnet
- C. Network Load Balancer: /29 per subnet
Web: /26 per subnet
- **D. Network Load Balancer: /28 per subnet
Web: /26 per subnet**

Answer: D

NEW QUESTION # 151

Which Amazon Route 53 routing policy would be the most appropriate for directing users to application resources that offer payment in their local currency?

Response:

- A. Weighted
- B. Latency-based
- C. Failover
- **D. Geolocation**

Answer: D

NEW QUESTION # 152

You are architecting an HPC solution in AWS. The system consists of a cluster of EC2 instances that require low-latency communications between them.

Which method should you use to set up a cluster to meet these requirements?

Response:

- A. Launch Amazon EC2 instances with the largest available number of cores and RAM. Attach all instances to an Amazon

EBS PIOPS volume. Implement a shared memory system across all instances in the cluster, using this shared EBS volume to minimize latency of communication.

- B. Choose an EC2 instance type that offers enhanced networking. Attach a 10-Gbps non-blocking elastic network interface to the instances. Configure the elastic network interface to optimize network performance to reduce latency.
- **C. Create a placement group. Choose an EC2 instance type compatible with placement groups for the cluster. Launch instances for the cluster in the placement group.**
- D. Create a VPC with one subnet in a single Availability Zone. Keep the size of the subnet equal to the number of instances required in the cluster. Launch instances for the cluster in this small subnet to guarantee low-latency network performance.

Answer: C

NEW QUESTION # 153

Which two strategies may be used to guarantee that only the appropriate persons get items?

(Select two.)

Response:

- **A. Signed cookies**
- B. Signed biscuits
- **C. Signed URLs**
- D. Signed SSLs

Answer: A,C

NEW QUESTION # 154

.....

Do you want to pass exam 100% one-shot? Do you want to get certification fast? Amazon ANS-C01 actual test question is a good way. If you study hard, 20-40 hours' preparation will help you pass exam. Once you clear ANS-C01 exam and obtain certification you will have a bright future. You have a great advantage over the other people. Amazon ANS-C01 Actual Test questions have effective high-quality content and cover at least more than 88% of the real test questions. Looking for the best exam preparation, ours is the best.
