You will get the AZ-140 certification as well if you choose our exam guide.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q170-Q175):

NEW QUESTION # 170

You have an Azure Virtual Desktop host pool named Pool1, an application named App1, and an Azure file share named Share1. You need to ensure that you can publish App1 to Pool1 by using MSIX app attach.

Which four actions should you perform in sequence before you publish App1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Create an MSIX image.

Generate a signing certificate.

Upload the MSIX package to Share1.

Generate an encryption certificate.

Create an MSIX package.

Upload the MSIX image to Share1.

Answer:

Explanation:

Answer Area

Generate a signing certificate.

Create an MSIX package.

Create an MSIX image.

Upload the MSIX image to Share1.

- 1 - Generate a signing certificate.
- 2 - Create an MSIX package.
- 3 - Create an MSIX image.
- 4 - Upload the MSIX image to Share1.

NEW QUESTION # 171

You have an Azure virtual machine named VM1 that runs Windows 10 Enterprise multi-session.

You plan to add language packs to VM1 and create a custom image of VM1 for a Windows Virtual Desktop host pool.

You need to ensure that modern apps can use the additional language packs when you deploy session hosts by using the custom image.

Which command should you run first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

-TaskPath "\\Microsoft\Windows\AppxDeploymentClient\" -TaskName

Disable-ScheduledTask
Enable-ScheduledTask
New-ScheduledTask
Start-AppBackgroundTask

"License Validation"
"Pre-staged app cleanup"
"RemoteFXvGPUDisableTask"

Answer:

Explanation:

NEW QUESTION # 172

You create a new Remote App application group with two applications and assign the users to the application group. But you came to know that the applications are not available to the users.

What will you do to resolve the issue?

- A. By making the users refresh the Remote Desktop Application
- B. By changing the two applications from Start Menu to File Path
- C. By updating the Remote Desktop applications to the latest version
- D. By adding the Remote app application group to a workspace

Answer: D

NEW QUESTION # 173

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts. Pool1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE- Each correct selection is worth one point.

Answer:

Explanation:

Service updates will be applied to Pool1 [answer choice].

- once every 30 days
- as soon as the updates are released
- once every 30 days
- once the updates are generally available

New user connections will be [answer choice].

- connected to the session host that has the highest number of existing connections and has not reached the maximum session limit
- connected to the session host that has the highest number of existing connections and has not reached the maximum session limit
- evenly distributed across all available hosts
- rejected once five sessions are established

NEW QUESTION # 174

You have an Azure Virtual Desktop host pool named Pool1 and an Azure Storage account named storage1. Pool1 and storage1 are in the same Azure region.

The current network utilization of the session hosts during peak hours is 95%.

You plan to use FSLogix profile containers stored in storage1 for users that connect to Pool1.

You need to configure the session hosts and storage1 to minimize network latency when loading and updating profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

For storage1:

- Configure network routing.
- Configure a private endpoint.
- Configure the storage account type.

For the session hosts:

- Enable Write Accelerator.
- Increase the Virtual machine size.
- Add additional network adapters.

Answer:

Explanation:

For storage1:

- Configure network routing.
- Configure a private endpoint.
- Configure the storage account type.

For the session hosts:

- Enable Write Accelerator.
- Increase the Virtual machine size.
- Add additional network adapters.
