SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q34-Q39):

NEW QUESTION # 34
What do you control with an activity area? Note: There are 2 correct answers to this question.

- A. The stock search sequence during warehouse task creation for picking
- B. The doors that can be connected to a staging area

- C. The size or volume of a warehouse order
- D. The area in which a resource will work in the warehouse

Answer: A,C

NEW QUESTION # 35
What is defined with the preparation time in the warehouse order creation rule?

- A. The time required by an employee to prepare the processing of the warehouse order
- B. The time required by the system for the picking strategy
- C. The time required by the wave for the creation process
- D. The time required by the resource until it reaches the storage type

Answer: A

Explanation:
Preparation Time in Warehouse Order Creation Rule
* Employee Preparation Time (D): Reflects the time required for workers to get ready for processing the warehouse order, such as collecting tools or moving to the work area.
Excluded Options
* A (Resource Reach Time): Preparation time does not directly account for the time taken to reach storage types.
* B (System Picking Time): Picking strategy time is separate from preparation time.
* C (Wave Creation Time): Wave processing time is managed independently.
SAP S/4HANA Cloud Private Edition Reference
* Check Warehouse Order Creation Rules and Parameters in SAP EWM documentation.

NEW QUESTION # 36
Which of the following are characteristics of tailored measurement services? Note: There are 2 correct answers to this question.

- A. They can be used for the SAP Business Warehouse.
- B. They are based on calculated measurement services.
- C. They use basic measurement services for the key figures.
- D. They can be displayed in the graphical warehouse layout.

Answer: B,C

NEW QUESTION # 37
You want to use Labor Management. For which combination must you activate Labor Management?

- A. Warehouse number and internal process step
- B. Warehouse number and processor
- C. Warehouse number and labor activity
- D. Warehouse number and warehouse process type

Answer: D

Explanation:
Labor Management (LM) in SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (EWM) is a functionality designed to plan, manage, and monitor workforce activities within a warehouse. It helps optimize labor resources by tracking activities, calculating planned durations, and measuring performance. To activate and utilize Labor Management effectively, specific configuration settings must be defined in the system. The correct combination for activation involves the warehouse number and the warehouse process type, as these two elements together determine the scope and nature of warehouse processes where labor activities are tracked.
Step-by-Step Explanation:
Understanding Labor Management in SAP EWM
Labor Management is an advanced feature in SAP EWM that enables warehouse managers to plan labor requirements, monitor execution, and evaluate performance. It integrates with warehouse processes to provide insights into resource utilization.
In SAP S/4HANA Cloud Private Edition, EWM Labor Management is embedded and leverages warehouse-specific configurations

to function correctly.

Key Configuration Elements for Labor Management

Warehouse Number: This is the highest organizational unit in SAP EWM, representing a physical or logical warehouse. All processes and activities within EWM are tied to a specific warehouse number.

Warehouse Process Type: This defines the type of process executed in the warehouse (e.g., goods receipt, picking, putaway, packing). It categorizes the tasks performed and links them to specific activities that Labor Management can track.

Labor Management requires these two elements to be combined because they collectively identify the scope of operations and the specific processes where labor activities need to be planned and monitored.

Activation of Labor Management

To activate Labor Management, you must enable it at the warehouse level and specify which processes within that warehouse will utilize LM. This is done in the SAP EWM configuration under Labor Management settings.

In the SAP Easy Access menu, navigate to Extended Warehouse Management > Settings > Labor Management > Activate Labor Management. Here, you specify the warehouse number and link it to relevant warehouse process types.

The activation is not tied to labor activity, internal process step, or processor alone, as these are subsequent elements used in execution rather than activation.

Why "Warehouse Number and Warehouse Process Type" is Correct

Warehouse Number: Determines the warehouse where Labor Management will be applied. Without specifying the warehouse, the system cannot scope the labor activities.

Warehouse Process Type: Defines the specific processes (e.g., picking, putaway) within the warehouse that require labor tracking. This ensures that Labor Management is activated only for relevant processes, making it granular and process-specific.

Together, they form the foundational combination for enabling Labor Management, as documented in SAP EWM configuration guides and help documentation.

Evaluation of Other Options

A . Warehouse number and labor activity: Labor activity (e.g., picking, walking) is defined later in the Labor Management process to calculate durations and performance. It is not part of the initial activation combination.

B . Warehouse number and internal process step: Internal process steps (e.g., verification, transport) are detailed sub-steps within a process type and are not directly used to activate Labor Management at a high level.

D . Warehouse number and processor: A processor (worker or resource) is an operational entity executing tasks, not a configuration element for activating Labor Management. Processors are assigned after LM is activated.

SAP S/4HANA Cloud Private Edition, EWM References

SAP Help Portal: The official documentation under "SAP Extended Warehouse Management > Labor Management > Configuration" specifies that Labor Management activation requires settings at the warehouse level and association with process types. Refer to the section on "Activating Labor Management" for detailed steps.

What's New in SAP S/4HANA 2023 FPS03: The introduction of Predictive Labor Demand Planning (LDP) reinforces the linkage between warehouse processes and labor tracking, emphasizing process types as a key element (SAP Community Blog, Feb 27, 2025).

SAP Learning: Courses like "SAP S/4HANA Cloud Private Edition, Extended Warehouse Management" (C_S4EWM_2023) highlight configuration dependencies on warehouse number and process type for LM activation.

Conclusion

The combination of warehouse number and warehouse process type is the verified answer because it aligns with SAP EWM's configuration logic for enabling Labor Management. This combination ensures that labor tracking is scoped to a specific warehouse and its relevant processes, providing a structured foundation for subsequent LM functionalities like task assignment and performance evaluation.

NEW QUESTION # 38

Your customer wants to use batch management in SAP Extended Warehouse Management (SAP EWM). When do you have to create a batch during the inbound process?

- A. Before the inbound delivery is created in SAP ERP
- B. Before the goods receipt is posted in SAP EWM
- C. Before the inbound delivery is distributed from SAP ERP to SAP EWM
- D. Before the inbound delivery is created in SAP EWM

Answer: A

NEW QUESTION # 39

......

To make sure that our candidates can learn the C-S4EWM-2023 praparation materials in the least time with the least efforts, they have compiled all of the content to be contained in the shortest possible number of C-S4EWM-2023 exam questions. Additionally, the C-S4EWM-2023 exam questions and answers have been designed on the format of the real exam so that the candidates learn it without any extra effort. We have carefully considered every aspects for our customers. And our C-S4EWM-2023 Practice Braindumps are perfect in every detail.

Reliable C-S4EWM-2023 Learning Materials: https://www.dumpkiller.com/C-S4EWM-2023_braindumps.html

To increase your chances of passing SAP's certification, we offer multiple formats for braindumps for all C-S4EWM-2023 exams at Dumpkiller, SAP C-S4EWM-2023 exam dumps certification will not only improve the quality of your resume, but it can open the door to new opportunities for employment, In addition, we will provide discount in some important festivals, we assure you that you can use the least amount of money to buy the best SAP Reliable C-S4EWM-2023 Learning Materials Reliable C-S4EWM-2023 Learning Materials - SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management exam dumps in our website.
