Exam C-SEC-2405 Question | Official C-SEC-2405 Practice Test

If you spare only a few days for exam preparation, our C-SEC-2405 learning materials can be your best choice for your time and money. With our C-SEC-2405 exam questions, you can not only pass exam in the least time with the least efforts but can also secure a brilliant percentage. And we will find that our C-SEC-2405 Study Guide is the most effective exam materials. We can claim that with our C-SEC-2405 training engine for 20 to 30 hours, you can pass the exam with ease.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 2	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 3	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

Features of Three Formats SAP C-SEC-2405 Exam Questions

The second format is a web-based format that can be accessed from browsers like Firefox, Microsoft Edge, Chrome, and Safari. It means you don't need to download or install any software or plugins to take the SAP Certified Associate - Security Administrator practice test. The web-based format of the SAP C-SEC-2405 Certification Exams practice test supports all operating systems. The third and last format is desktop software format which can be accessed after installing the software on your SAP Certified Associate - Security Administrator (C-SEC-2405) Windows Pc or Laptop. These formats are built especially for the students so they don't stop preparing for the SAP Certified Associate - Security Administrator (C-SEC-2405) certification.

SAP Certified Associate - Security Administrator Sample Questions (Q64-Q69):

NEW QUESTION # 64
Which code does the authority-check return when a user does NOT have any authorizations for the authorization object checked?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 65
When creating PFCG roles for SAP Fiori access, what is included automatically when adding a catalog to the menu of a back-end PFCG role? Note: There are 2 correct answers to this question.

- A. The IWSV TADIR service definitions from the catalog.
- B. The IWSG TADIR service definitions from the catalog.
- C. The start authorizations and the authorization default values for each IWSV TADIR service definitions in the catalog.
- D. The start authorizations and the authorization default values for each IWSG TADIR service definitions in the catalog.

Answer: A,C

Explanation:
When adding a catalog to the menu of a back-end PFCG role for SAP Fiori access in SAP S/4HANA, the system automatically includes specific components to ensure proper authorization. The start authorizations and authorization default values for each IWSV (SAP Gateway Business Suite Enablement-Service) TADIR service definitions in the catalog are automatically added, providing the necessary permissions for OData services associated with Fiori apps. Additionally, the IWSV TADIR service definitions themselves are included, ensuring that the role contains the technical service entries required for the apps in the catalog to function. These automatic inclusions simplify role maintenance by aligning authorizations with the catalog's content. IWSG (SAP Gateway Service Groups Metadata) definitions are related to service group metadata, not typically included in back-end role menus, making options A and B incorrect. This automation ensures that Fiori apps are accessible to authorized users without manual configuration of complex service authorizations, enhancing efficiency and security.

NEW QUESTION # 66
Under which of the following conditions can you merge authorizations for the same object during role maintenance? Note: There are 2 correct answers to this question.

- A. The activation status of a manual authorization must match the status of the changed authorizations.
- B. The maintenance status of the changed authorizations must match the status of a manual authorization.
- C. The activation status and the maintenance status of the authorizations must NOT match.
- D. The activation status and the maintenance status of the authorizations must match.

Answer: A,D

Explanation:
* Context:Merging authorizations in SAP role maintenance ensures that multiple authorizations for the same object are harmonized.
* Solution Descriptions:
* B:Matching activation and maintenance statuses ensures consistent merging.
* D:Manual authorizations can be merged only if their activation status matches the changed authorizations.
SAP Security References:
* SAP Role Maintenance (PFCG) Documentation
* SAP Authorization Management Guide

NEW QUESTION # 67

What is the authorization object required to define the start authorization for an SAP Fiori legacy Web Dynpro application?

- A. S_TCODE
- B. S_SDSAUTH
- C. S_SERVICE
- D. S_START

Answer: D

NEW QUESTION # 68

Which of the following rules does SAP recommend you consider when you define a role-naming convention for an SAP S/4HANA on-premise system?Note: There are 3 correct answers to this question.

- A. Role names are system language-independent
- B. Role names can be no longer than 30 characters
- C. Role names are system language-dependent
- D. Role names can be no longer than 20 characters
- E. Role names must NOT start with "SAP"

Answer: A,B,E
