Latest C_S4EWM_2023 Test Notes | C_S4EWM_2023 Pass Guide

As is known to us, the high pass rate is a reflection of the high quality of C_S4EWM_2023 study torrent. The more people passed

their exam, the better the study materials are. There are more than 98 percent that passed their exam, and these people both used our C_S4EWM_2023 Test Torrent. We believe that our C_S4EWM_2023 test torrent can help you improve yourself and make progress beyond your imagination. If you buy our C_S4EWM_2023 study torrent, we can make sure that our study materials will not be let you down.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q35-Q40):

NEW QUESTION # 35
What can you control with an activity area? Note: There are 2 correct answers to this question.

- A. The warehouse order creation rules to be used
- B. The interim bin for layout-oriented storage control
- C. The area in which a resource will work in the warehouse
- D. The doors that can be connected to a staging area

Answer: A,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Activity areas in SAP EWM manage warehouse operations. Option A ("The warehouse order creation rules to be used") is correct as WOCRs can be linked to activity areas, and option D ("The area in which a resource will work in the warehouse") is correct because resources are assigned tasks within specific activity areas, both configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Order > Define Creation Rules. Option B (doors) is yard-related, and option C (interim bin) is POSC-specific.

NEW QUESTION # 36
What can you do with evaluation points?

- A. Use them to measure the efficiency of your warehouse.
- B. Influence which items shall be picked first.
- C. Influence which warehouse order is assigned to a resource.
- D. Influence the search sequence of storage types, storage sections, and bin types.

Answer: D

NEW QUESTION # 37
Which stock removal strategy can be realized with either packaging specifications or the alternative unit of measure (AUoM)? Note: There are 2 correct answers to this question.

- A. Large/small quantities
- B. Stringent FIFO
- C. Partial quantities first
- D. Fixed bin

Answer: A,C

Explanation:
The following stock removal strategies can be implemented using either packaging specifications or the alternative unit of measure (AUoM):
* Large/Small Quantities (C):
* This strategy allows the system to distinguish between large and small quantities for stock removal.
* Packaging specifications or AUoM can define thresholds for selecting appropriate stock.
* Partial Quantities First (D):
* This strategy prioritizes removing partial quantities before full quantities.
* Packaging specifications or AUoM ensure that the system selects stock accordingly.
Incorrect Options:
* A: Stringent FIFO (First In, First Out) is based on date and time but does not rely on packaging specifications or AUoM.
* B: Fixed bin is a location-based strategy unrelated to packaging specifications or AUoM.

References:
* SAP EWM Documentation: Stock Removal Strategies
* SAP Help Portal: Configuration of Packaging Specifications and AUoM

NEW QUESTION # 38
Which distribution methods can you use to replicate delivery documents from an SAP ERP system to SAP Extended Warehouse Management? Note: There are 2 correct answers to this question.

- A. Core Interface (CIF) distribution mode
- B. Immediate distribution at document creation
- C. Manual distribution
- D. Distribution via Post Processing Framework (PPF) actions

Answer: B,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Replication of delivery documents from SAP ERP to EWM relies on integration methods. Option C ("Distribution via Post Processing Framework (PPF) actions") is correct because PPF actions in ERP trigger the creation and transfer of delivery documents to EWM, configured in SPRO: Logistics Execution > Extended Warehouse Management Integration > PPF Actions. Option D ("Immediate distribution at document creation") is correct as it allows real-time replication upon saving the delivery in ERP via qRFC, set up in the output control. CIF (A) is used for master data, not deliveries, and manual distribution (B) is not a standard automated method in EWM integration.

NEW QUESTION # 39
What do you need to configure before you can create warehouse tasks for an outbound delivery order or an inbound delivery?
Note: There are 2 correct answers to this question.

- A. Putaway control indicator or stock removal control indicator
- B. Warehouse process types
- C. Warehouse order creation rules
- D. Warehouse process type determination

Answer: B,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Creating warehouse tasks in SAP EWM requires foundational configuration. Option B ("Warehouse process type determination") is correct because it defines how the system assigns a process type (e.g., putaway, picking) to a delivery item, configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type Determination. Option D ("Warehouse process types") is correct as it specifies the process flow (e.g., "PICK" for picking), set up in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option A (indicators) influences task execution but isn't a prerequisite for creation, and option C (order creation rules) applies to warehouse orders, not tasks directly.

NEW QUESTION # 40
......

Before you decide to get the C_S4EWM_2023 exam certification, you may be attracted by the benefits of C_S4EWM_2023 credentials. Get certified by C_S4EWM_2023 certification means you have strong professional ability to deal with troubleshooting in the application. Besides, you will get promotion in your job career and obtain a higher salary. If you want to pass your SAP C_S4EWM_2023 Actual Test at first attempt, C_S4EWM_2023 pdf torrent is your best choice.
