SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q20-Q25):

NEW QUESTION # 20

What is a point-to-point connection option using Web Services? Please choose the correct answer.

- A. E-Commerce software
- B. Top rated
- C. WS-RM
- D. Hybris delivers

Answer: C

NEW QUESTION # 21

What can initiate the creation of a forwarding agreement quotation?

Note; There are 2 correct answers to this question

- A. Freight agreement
- B. CRM opportunity
- C. Forwarding agreement quotation assignment
- D. Freight agreement request for quotation (RFQ)

Answer: B,C

NEW QUESTION # 22

Which of the following can be used as origin of condition? Note: There are 2 correct answers to this question.

- A. BRFplus decision table
- B. Determination class
- C. Direct business object access
- D. Data crawler

Answer: A,C

Explanation:

In SAP S/4HANA Transportation Management, conditions are used to determine objects or settings based on specific rules.

According to the SAP documentation, the origins of conditions include:

* Direct business object access (A): Conditions can directly access business objects (e.g., freight orders or freight units) to retrieve data for rule evaluation, such as determining a freight agreement based on attributes like source location.

* BRFplus decision table (C): BRFplus (Business Rule Framework plus) decision tables are used as a condition origin to define complex rules in a tabular format, enabling dynamic determination of objects like rate tables or carriers.

The other options are incorrect:

* Determination class (B) is not a valid origin for conditions; it may be used in custom coding but not in standard condition configuration.

* Data crawler (D) is used for extracting data for reporting or analytics, not as a condition origin for rule determination.

SAP Help Portal: Transportation Management - Conditions Configuration ().

NEW QUESTION # 23

What is launched using output determination. Output condition records are configured to allow messages to be sent? Please choose the correct answer.

- A. Manage complex pricing
- **B. The transfer of the sales order**
- C. Challenges with ease and reliability
- D. Payment Resolution

Answer: B

NEW QUESTION # 24

You have fixed-price contracts with your carriers. The carriers have guaranteed availability for all of your transports. How can you streamline the subcontracting process?

- A. Use tendering with the Peer-to-Peer Tendering - No Response Required type
- B. Use carrier selection with the Automatic Tendering option
- **C. Use tendering with the Broadcast Tendering - First Acceptable Offer type**
- D. Use carrier selection with the Assign Best Carrier option

Answer: C

Explanation:

In SAP S/4HANA Transportation Management, when carriers have fixed-price contracts and guaranteed availability, the subcontracting process can be streamlined by using tendering with the Broadcast Tendering

- First Acceptable Offer type (C). According to the SAP documentation, this tendering method sends the freight order to multiple carriers simultaneously, and the first carrier to accept the offer is assigned, leveraging the guaranteed availability and fixed prices to expedite the process without requiring complex evaluations.

The other options are incorrect:

* Assign Best Carrier (A) involves evaluating carriers based on criteria like cost or priority, which is unnecessary with fixed-price contracts and guaranteed availability.

* Automatic Tendering (B) automates tendering but does not specifically streamline the process for guaranteed carriers.

* Peer-to-Peer Tendering - No Response Required (D) sends the freight order directly to one carrier without expecting a response, which is less efficient than broadcasting to leverage the first acceptance.
