## PDF C\_SIGDA\_2403 VCE | C\_SIGDA\_2403 Knowledge Points

To pass the C\_SIGDA\_2403 exam is not an easy task. It is a challenging exam. However, proper planning and preparation with C\_SIGDA\_2403 exam questions can enable you to pass the C\_SIGDA\_2403 exam easily. As far as the SAP C\_SIGDA\_2403 Practice Test are concerned, these C\_SIGDA\_2403 Practice Test questions are designed and verified by SAP C\_SIGDA\_2403

exam trainers. So you rest assured that with C\_SIGDA\_2403 exam real questions you can pass SAP Certified Associate - Process Data Analyst - SAP Signavio C\_SIGDA\_2403 exam easily.

## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q25-Q30):

### NEW QUESTION # 25

In the context of a workflow, what is a case?

- A. Different variants of the same workflow
- **B. A one-time run of a workflow**
- C. A specific action to be performed in the workflow
- D. A process template used as a workflow

**Answer: B**

### NEW QUESTION # 26

Which Process Performance Indicator categories are most relevant when striving to identify automation potential? Note: There are 2 correct answers to this question.

- A. Backlog
- **B. Exceptions**
- **C. Automation rate**
- D. Master data

**Answer: B,C**

Explanation:

Identifying automation potential in SAP Signavio Process Intelligence involves analyzing Process Performance Indicators (PPIs) that highlight repetitive or error-prone tasks suitable for automation. The SAP Signavio Process Intelligence User Guide specifies:

\* Exact Extract: "When assessing automation potential, key Process Performance Indicator categories include:

\* Exceptions: Metrics related to errors, deviations, or manual interventions, which indicate tasks that could be automated to reduce human error.

\* Automation Rate: Measures the proportion of tasks or cases that are already automated, helping identify opportunities to increase automation in low-automation areas." (SAP Signavio Process Intelligence User Guide, section on "Process Performance Indicators for Automation").

\* Explanation:

\* Option A (Exceptions): Exceptions, such as error rates or manual corrections, signal tasks that are prone to human error or inefficiency, making them prime candidates for automation to improve reliability and speed. For example, frequent manual overrides in an order processing step could be automated.

\* Option D (Automation rate): The automation rate PPI shows the current level of automation in a process, allowing analysts to identify steps or processes with low automation rates that could benefit from robotic process automation (RPA) or workflow automation.

\* Option B (Master data) is incorrect because master data issues (e.g., inconsistent customer records) are related to data quality, not directly to automation potential, though they may indirectly affect automation outcomes.

\* Option C (Backlog) is incorrect as backlog metrics (e.g., pending cases) indicate workload issues but are less directly tied to identifying automation opportunities compared to exceptions or automation rate.

Reference: SAP Signavio Process Intelligence User Guide, section on "Process Performance Indicators for Automation"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Automation Analysis.

### NEW QUESTION # 27

What is the Diagram Widget used for? Note: There are 2 correct answers to this question.

**Answer:**

Explanation:

A.D

### NEW QUESTION # 28

What are some benefits of SiGNAL? Note: There are 3 correct answers to this question.

- A. Visualize different data sources.
- B. Create more in-depth process queries.
- C. Visualize results in detailed charts.
- D. Retrieve data and perform calculations.
- E. Create process simulations easily.

Answer: C

### NEW QUESTION # 29

How can KPI's from SAP Signavio Process Intelligence be visualized in the SAP Signavio Process Collaboration Hub? Note: There are 3 correct answers to this question.

- A. By adding live KPI's into the Customer Journey Map
- B. By adding live KPI's into the process
- C. By case exporting
- D. By monitoring widgets
- E. By workflow mining

Answer: A,D,E

### NEW QUESTION # 30

.....

Evaluate your own mistakes each time you attempt the desktop SAP Certified Associate - Process Data Analyst - SAP Signavio (C\_SIGDA\_2403) practice exam. It expertly is designed SAP Certified Associate - Process Data Analyst - SAP Signavio (C\_SIGDA\_2403) Practice Test software supervised by a team of professionals. There is 24/7 customer service to help you in any situation. You can customize your desired C\_SIGDA\_2403 Exam conditions like exam length and the number of questions.
