- D. Content Awareness is not enabled.

Answer: D

NEW QUESTION # 135

True or False: In R81, more than one administrator can login to the Security Management Server with write permission at the same time.

- A. True, every administrator works on a different database that is independent of the other administrators.
- B. True, every administrator works in a session that is independent of the other administrators.
- C. False, this feature has to be enabled in the Global Properties.
- D. False, only one administrator can login with write permission.

Answer: B

NEW QUESTION # 136

To view statistics on detected threats, which Threat Tool would an administrator use?

- A. Profiles

- B. Protections
- C. IPS Protections
- D. ThreatWiki

Answer: D

Explanation:

Explanation

ThreatWiki is a web-based tool that provides statistics on detected threats, such as attack types, sources, destinations, and severity. It also allows the administrator to search for specific threats and view their details and mitigation methods. The other options are not tools for viewing statistics on detected threats. References:
