2025 Latest Test4Engine Chrome-Enterprise-Administrator PDF Dumps and Chrome-Enterprise-Administrator Exam Engine Free Share: https://drive.google.com/open?id=1G2ucy4CLAuazvcf-sn7OOg6_3l3kqLCo

With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the Chrome-Enterprise-Administrator Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. However, obtaining the Chrome-Enterprise-Administrator certification is not an easy task.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 2	<ul style="list-style-type: none">Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	<ul style="list-style-type: none">Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	<ul style="list-style-type: none">Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 5	<ul style="list-style-type: none">Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Test4Engine regularly updates the Chrome-Enterprise-Administrator PDF Questions to reflect the latest Google Chrome-Enterprise-Administrator exam content. All test questions in the Chrome-Enterprise-Administrator exam PDF format are real and latest.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

How often do extensions update"?

- A. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- B. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- C. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store
- D. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page

Answer: C

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 18

The security team requires Chrome to be updated on computers that only have intranet access with no available internet connectivity. These computers cannot be restarted, and Chrome is not updating.

How can Chrome be updated"?

- A. Run the Chrome installer
- B. Run auto-update.
- C. Use a target version
- D. Use force relaunch after period

Answer: A

Explanation:

For machines with no internet connectivity, automatic updates will not work. The only way to update Chrome in this scenario is to manually run the Chrome installer with an updated version obtained through an alternative method (e.g., downloaded on a connected machine and transferred). Auto-update requires internet access, setting a target version only dictates the desired version for automatic updates, and force relaunch requires an update to be downloaded first.

NEW QUESTION # 19

A company has multiple departments, including Engineering, Marketing, Sales, and HR. Each department has different needs and

schedules for Chrome updates. For instance, the Engineering team requires the latest updates as soon as they are available to ensure they have the latest features and security patches. However, the HR department prefers a more stable environment and only wants updates after they have been thoroughly tested.

Which feature in the Google Admin console can an administrator use to meet the company's requirements?

- A. Create different user groups for each department
- B. Set device policies for each department
- C. **Create organizational units for each department**
- D. Create active directory forest for each department

Answer: C

Explanation:

Organizational Units (OUs) in the Google Admin console allow administrators to apply different Chrome policies to different groups of devices or users based on their organizational structure. By creating separate OUs for Engineering and HR (and potentially other departments), the administrator can configure different Chrome update policies for each OU, ensuring Engineering gets rapid updates while HR stays on a more stable release. User groups primarily manage access to services, and device policies are generally applied at the device level, not necessarily tied to departmental needs for update cadences. Active Directory forests are a Microsoft concept and not directly used for managing Chrome update policies in the Google Admin console.

NEW QUESTION # 20

In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Advanced Threat Protection
- B. Secure Browsing Mode
- C. Proactive Defense
- D. **Enhanced Protection**

Answer: D

Explanation:

Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

NEW QUESTION # 21

An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.

Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 129"
- B. 0
- C. 129(
- D. **129.**

Answer: D

Explanation:

To target all updates within the 129 major version, the administrator should use the target version prefix '129.

' This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

NEW QUESTION # 22

.....

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our Chrome-Enterprise-Administrator learning questions in this website.
