## Quiz 2025 Cyber AB CMMC-CCP: Certified CMMC Professional (CCP) Exam – Valid Exam Duration

Finding original and latest Cyber AB CMMC-CCP exam questions however, is a difficult process. Candidates require assistance finding the Cyber AB CMMC-CCP updated questions. It will be hard for applicants to pass the CMMC-CCP Exam Questions exam on their first try if Certified CMMC Professional (CCP) Exam questions they have are not real and updated. Preparing with outdated CMMC-CCP Exam Questions results in failure and loss of time and money. You can get success in the CMMC-CCP exam on first attempt and save your resources with the help of updated exam questions.

## Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q153-Q158):

### NEW QUESTION # 153

What is objectivity as it applies to activities with the CMMC-AB?

- A. Avoiding the appearance of or actual, conflicts of interest
- B. Reporting results of CMMC services completely
- C. Ensuring full disclosure
- D. Demonstrating integrity in the use of materials as described in policy

**Answer: A**

**Explanation:**

Understanding Objectivity in CMMC-AB Activities Objectivity in CMMC-AB activities refers to the requirement that assessors and C3PAOs remain impartial, unbiased, and free from conflicts of interest while conducting assessments and providing CMMC-related services.

Key Aspects of Objectivity in CMMC Assessments: #No conflicts of interest-Assessors must not assess organizations they have financial, professional, or personal ties to.

#Unbiased reporting-Findings must be based solely on evidence, with no external influence.

#Avoiding even the appearance of a conflict-If there is any perception of bias, it must be addressed.

A). Ensuring full disclosure # Incorrect

Full disclosure is important but does not define objectivity. Objectivity means remaining neutral and free from conflicts.

B). Reporting results of CMMC services completely # Incorrect

While accurate reporting is required, objectivity focuses on impartiality, not just completeness.

C). Avoiding the appearance of or actual, conflicts of interest # Correct Objectivity in CMMC-AB activities is primarily about preventing bias and ensuring fair assessments.

Avoiding conflicts of interest ensures that assessments are credible and trustworthy.

D). Demonstrating integrity in the use of materials as described in policy # Incorrect Integrity is important, but objectivity is specifically about avoiding bias and conflicts of interest.

Why is the Correct Answer "C. Avoiding the appearance of or actual, conflicts of interest"?

CMMC-AB Code of Professional Conduct

Requires assessors and C3PAOs to avoid conflicts of interest and maintain impartiality.

CMMC Assessment Process (CAP) Document

Emphasizes that assessments must be free from external influence and conflicts of interest.

ISO/IEC 17020 Requirements for Inspection Bodies

Defines objectivity as avoiding conflicts of interest in the assessment process.

### NEW QUESTION # 154

During an assessment, which phase of the process identifies conflicts of interest?

- **A. Generate final recommended assessment results.**
- B. Develop assessment plan.
- C. Analyze requirements.
- D. Verify readiness to conduct assessment.

**Answer: A**

### NEW QUESTION # 155

What type of information is NOT intended for public release and is provided by or generated for the government under a contract to develop or deliver a product or service to the government, but not including information provided by the government to the public (such as on public websites) or simple transactional information, such as necessary to process payments?

- **A. FCI**
- B. CUI
- C. CDI
- D. CTI

**Answer: A**

Explanation:

Understanding Federal Contract Information (FCI) Federal Contract Information (FCI) is defined by 48 CFR 52.204-21 (Basic Safeguarding of Covered Contractor Information Systems). FCI refers to information that:

\* Is NOT intended for public release.

\* Is provided by or generated for the government under a contract.

\* Is necessary to develop or deliver a product or service to the government.

\* Excludes publicly available government information (such as information on public websites).

\* Excludes simple transactional information (e.g., necessary to process payments).

In the context of CMMC 2.0, organizations that process, store, or transmit FCI must meet CMMC Level 1 (Foundational), which requires implementing 17 basic safeguarding practices outlined in FAR 52.204-21.

\* A. CDI (Controlled Defense Information) # Incorrect

\* This term was used in DFARS 252.204-7012 but has been replaced by CUI (Controlled Unclassified Information) in CMMC discussions.

\* B. CTI (Cyber Threat Intelligence) # Incorrect

\* This refers to intelligence on cyber threats, tactics, and indicators, not contractual data.

\* C. CUI (Controlled Unclassified Information) # Incorrect

\* CUI is sensitive information requiring additional safeguarding but is a separate category from FCI.

- \* D. FCI (Federal Contract Information)#Correct
  - \* The definition of FCI explicitly matches the description given in the question.
- Why is the Correct Answer FCI (D)?
- \* FAR 52.204-21 (Basic Safeguarding of Covered Contractor Information Systems)
  - \* Defines FCI and the required safeguards.
  - \* Establishes 17 cybersecurity practices for FCI protection.
  - \* CMMC 2.0 Framework
  - \* Level 1 (Foundational) is required for contractors handling FCI.
  - \* Ensures compliance with basic safeguarding requirements outlined in FAR 52.204-21.
  - \* NIST SP 800-171 and DFARS 252.204-7012
  - \* FCI does not require compliance with NIST SP 800-171, but CUI does.

### NEW QUESTION # 156

When scoping the organizational system, the scope of applicability for the cybersecurity CUI practices applies to the components of:

- **A. nonfederal systems that process, store, or transmit CUI. or that provide protection for the system components.**
- B. federal systems that process, store, or transmit CUI. or that provide protection for the system components.
- C. nonfederal systems that process, store, or transmit CUI.
- D. federal systems that process, store, or transmit CUI.

**Answer: A**

Explanation:

- \* The CMMC 2.0 framework applies to nonfederal systems that process, store, or transmit CUI.
  - \* Scoping determines which system components must comply with CMMC practices.
  - \* If a system processes, stores, or transmits CUI, or provides security for those systems, it must be included in the assessment scope.
  - \* CMMC Applies to Contractors, Not Federal Systems
  - \* CMMC is designed for Department of Defense (DoD) contractors, not federal systems.
  - \* Federal systems are already governed by NIST SP 800-53 and other regulations.
  - \* Scope Includes Systems That Process CUI AND Those That Protect Them
  - \* Systems processing, storing, or transmitting CUI are in scope.
  - \* Systems that provide protection for CUI systems (e.g., firewalls, monitoring tools, security appliances) are also in scope.
  - \* A. Federal systems that process, store, or transmit CUI. #Incorrect
  - \* CMMC does not apply to federal systems.
  - \* B. Nonfederal systems that process, store, or transmit CUI. #Partially correct but incomplete
  - \* It excludes security systems that protect CUI assets, which are also in scope.
  - \* C. Federal systems that process, store, or transmit CUI, or that provide protection for the system components. #Incorrect
  - \* CMMC only applies to nonfederal systems.
  - \* CMMC Scoping Guide (Nov 2021)- Confirms that CMMC applies to nonfederal systems processing CUI.
  - \* NIST SP 800-171 Rev. 2- Specifies security requirements for nonfederal systems handling CUI.
  - \* DFARS 252.204-7012- Requires DoD contractors to implement NIST SP 800-171 on nonfederal systems handling CUI.
- Understanding Scoping in CMMC 2.0 Why the Correct Answer is "D. Nonfederal systems that process, store, or transmit CUI, or that provide protection for the system components"? Why Not the Other Options? Relevant CMMC 2.0 References: Final Justification: Since CMMC applies to nonfederal systems that process CUI or protect those systems, the correct answer is D. Nonfederal systems that process, store, or transmit CUI, or that provide protection for the system components.

### NEW QUESTION # 157

Which term describes "the protective measures that are commensurate with the consequences and probability of loss, misuse, or unauthorized access to, or modification of information"?

- **A. Adequate security**
- B. Adopted security
- C. Adaptive security
- D. Advanced security

**Answer: A**

Explanation:

Understanding the Concept of Security in CMMC 2.0 CMMC 2.0 aligns with federal cybersecurity standards, particularly FISMA (Federal Information Security Modernization Act), NIST SP 800-171, and FAR 52.204-

21. One key principle in these frameworks is the implementation of security measures that are appropriate for the risk level associated with the data being protected.

The question describes security measures that are proportionate to the risk of loss, misuse, unauthorized access, or modification of information. This matches the definition of "Adequate Security." A). Adopted security# Incorrect The term "adopted security" is not officially recognized in CMMC, NIST, or FISMA. Organizations adopt security policies, but the concept does not directly align with the question's definition.

B). Adaptive security# Incorrect

Adaptive security refers to a dynamic cybersecurity model where security measures continuously evolve based on real-time threats. While important, it does not directly match the definition in the question.

C). Adequate security# Correct

The term "adequate security" is defined in NIST SP 800-171, DFARS 252.204-7012, and FISMA as the level of protection that is proportional to the consequences and likelihood of a security incident.

This aligns perfectly with the definition in the question.

D). Advanced security# Incorrect

Advanced security typically refers to highly sophisticated cybersecurity mechanisms, such as AI-driven threat detection. However, the term does not explicitly relate to the concept of risk-based proportional security.

FISMA (44 U.S.C. § 3552(b)(3))

Defines adequate security as "protective measures commensurate with the risk and potential impact of unauthorized access, use, disclosure, disruption, modification, or destruction of information." This directly matches the question's wording.

DFARS 252.204-7012 (Safeguarding Covered Defense Information and Cyber Incident Reporting) Mandates that contractors apply "adequate security" to protect Controlled Unclassified Information (CUI).

NIST SP 800-171 Rev. 2, Requirement 3.1.1

States that organizations must "limit system access to authorized users and implement adequate security protections to prevent unauthorized disclosure." CMMC 2.0 Documentation (Level 1 and Level 2 Requirements) Requires that organizations apply adequate security measures in accordance with NIST SP 800-171 to meet compliance standards.

Analyzing the Given Options Official References Supporting the Correct Answer Conclusion The term "adequate security" is the correct answer because it is explicitly defined in federal cybersecurity frameworks as protection proportional to risk and potential consequences. Thus, the verified answer is:
