Compared with other training materials, why TestKingFree's CompTIA 220-1102 exam training materials is more welcomed by the majority of candidates? First, this is the problem of resonance. We truly understand the needs of the candidates, and comprehensively than any other site. Second, focus. In order to do the things we decided to complete, we have to give up all the unimportant opportunities. Third, the quality of the product. People always determine a good or bad thing based on the surface. We may have the best products of the highest quality, but if we shows it with a shoddy manner, it naturally will be as shoddy product. However, if we show it with both creative and professional manner, then we will get the best result. The TestKingFree's CompTIA 220-1102 Exam Training materials is so successful training materials. It is most suitable for you, quickly select it please.

CompTIA 220-1102, also known as the CompTIA A+ Certification Exam: Core 2, is a certification exam that is designed to test the knowledge and skills of IT professionals who are looking to gain recognition for their expertise in computer hardware and software. 220-1102 Exam is one of the two exams that are required to earn the CompTIA A+ certification, which is a globally recognized credential in the IT industry.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q826-Q831):

NEW QUESTION # 826

Which of the following is the most practical method to reduce the number of clicks on phishing emails for a public-facing organization?

- A. Restricting emails from personal email addresses
- **B. Providing user awareness education**
- C. Setting up SMTP filtering rules
- D. Introducing a BYOD policy

Answer: B

Explanation:

User awareness education is the most effective method for reducing phishing attacks. Training users to recognize suspicious emails, links, and attachments can prevent them from falling for phishing attempts.

Technical solutions like SMTP filtering (C) and restricting emails (D) can help but are not as effective without user vigilance. A BYOD policy (B) does not directly address phishing email threats.

NEW QUESTION # 827

A technician is installing a new business application on a user's desktop computer. The machine is running Windows 10 Enterprise 32-bit operating system. Which of the following files should the technician execute in order to complete the installation?

- A. Installer_32.msi
- B. Installer_Files.zip
- C. Installer_x64.exe
- D. Installer_Win10Enterprise.dmg
- E. **Installer_x86.exe**

Answer: E

NEW QUESTION # 828

A user connected a smartphone to a coffee shop's public Wi-Fi and noticed the smartphone started sending unusual SMS messages and registering strange network activity. A technician thinks a virus or other malware has infected the device. Which of the following should the technician suggest the user do to best address these security and privacy concerns? (Select two).

- A. **Uninstall all recently installed applications.**
- B. Stay offline when in public places.
- C. Reboot the device
- D. Disable Wi-Fi autoconnect.
- E. **Schedule an antivirus scan.**
- F. Update the OS

Answer: A,E

Explanation:

Explanation

The best way to address the security and privacy concerns caused by a malware infection on a smartphone is to uninstall all recently installed applications and schedule an antivirus scan. Uninstalling the applications that may have introduced the malware can help remove the source of infection and prevent further damage.

Scheduling an antivirus scan can help detect and remove any remaining traces of malware and restore the device's functionality.

NEW QUESTION # 829

An international traveler is concerned about others accessing the contents of their smartphone if it is lost or stolen. The traveler has enabled biometrics. Which of the following additional security measures would further reduce the risk of unauthorized data access?

- A. Location tracking
- B. Remote backups
- C. PIN code screen lock
- D. **Device encryption**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth

Device encryption ensures that even if someone gains physical access to the smartphone, they cannot access its contents without the

encryption key.

- A . Remote backups - Useful for data recovery but does not prevent unauthorized access.
- B . Location tracking - Helps locate the device but does not protect its data.
- C . PIN code screen lock - Adds security but is less effective than full encryption.

NEW QUESTION # 830

After clicking on a link in an email a Chief Financial Officer (CFO) received the following error:

The CFO then reported the incident to a technician. The link is purportedly to the organization's bank. Which of the following should the technician perform FIRST?

- A. File a trouble ticket with the bank.
- B. Contact the ISP to report the CFCs concern
- C. Instruct the CFO to exit the browser
- D. Update the browser's CRLs

Answer: D

Explanation:

The technician should update the browser's CRLs first. The error message indicates that the certificate revocation list (CRL) is not up to date. Updating the CRLs will ensure that the browser can verify the authenticity of the bank's website.
