CompTIA Cloud+ (2024) Sure Questions & CV0-004 Torrent Vce & CompTIA Cloud+ (2024) Updated Pdf

To be well-prepared, you require trust worthy and reliable ValidDumps practice material. You also require accurate ValidDumps study material to polish your capabilities and improve your chances of passing the CV0-004 certification exam. ValidDumps facilitates your study with updated CompTIA CV0-004 Exam Dumps. This CV0-004 exam prep material has been prepared under the expert surveillance of 90,000 highly experienced ValidDumps professionals worldwide.

CompTIA Cloud+ (2024) Sample Questions (Q19-Q24):

NEW QUESTION # 19

A cloud developer is creating a static website that customers will be accessing globally. Which of the following services will help reduce latency?

- A. CDN
- B. VPC
- C. Application load balancer
- D. API gateway

Answer: A

Explanation:

A Content Delivery Network (CDN) is the service that will help reduce latency for a static website accessed globally. CDNs distribute content across multiple geographically dispersed servers, allowing users to connect to a server that is closer to them, thereby reducing the time it takes to load the website.

The use of CDNs is a common practice to enhance global access and improve user experience, as covered under Cloud Concepts in the CompTIA Cloud+ certification.

NEW QUESTION # 20

A group of cloud administrators frequently uses the same deployment template to recreate a cloud-based development environment. The administrators are unable to go back and review the history of changes they have made to the template. Which of the following cloud resource deployment concepts should the administrator start using?

- A. Drift detection
- **B. Versioning**
- C. Documentation
- D. Repeatability

Answer: B

Explanation:

Versioning is a concept that allows cloud administrators to keep track of the history of changes made to deployment templates or any other configuration file. By using version control systems, they can review previous versions, roll back to earlier configurations if necessary, and understand the evolution of the deployment template over time. References: CompTIA Cloud+ Guide to Cloud Computing (ISBN: 978-1-64274-282-2)

NEW QUESTION # 21

An organization wants to ensure its data is protected in the event of a natural disaster. To support this effort, the company has rented a colocation space in another part of the country. Which of the following disaster recovery practices can be used to best protect the data?

- A. Replication
- **B. Off-site**
- C. On-site
- D. Retention

Answer: B

Explanation:

For an organization looking to protect its data in the event of a natural disaster, the best disaster recovery practice would be off-site replication. By renting a colocation space in another part of the country, the company can maintain copies of their data and critical systems in a geographically separate location, ensuring they are not affected by the same disaster.

NEW QUESTION # 22

A cloud engineer hardened the WAF for a company that operates exclusively in North America. The engineer did not make changes to any ports, and all protected applications have continued to function as expected. Which of the following configuration changes did the engineer most likely apply?

- **A. The engineer blocked all traffic originating outside the region.**
- B. The engineer completed an upgrade from TLS version 1.1 to version 1.3.
- C. The engineer installed the latest security patches on the WAF.
- D. The engineer implemented MFA to access the WAF configurations.

Answer: A

Explanation:

Given that the WAF was hardened without changing any ports and all protected applications continued to function as expected, it is most likely that the engineer blocked all traffic originating outside of North America, which is the company's operating region.

NEW QUESTION # 23

A cloud engineer is troubleshooting a connectivity issue. The application server with IP 192.168.1.10 in one subnet is not connecting to the MySQL database server with IP 192.168.2.20 in a different subnet. The cloud engineer reviews the following information: Application Server Stateful Firewall

Inbound rules	Outbound rules
PERMIT ANY 443	PERMIT ANY 443
DENY ANY ANY	PERMIT ANY 3306
	PERMIT ANY 53
	DENY ANY ANY

Application Server Subnet Routing Table

Destination	Gateway
default	192.168.1.1
192.168.1.0/24	local

MySQL Server Stateful Firewall

Inbound rules	Outbound rules
PERMIT 192.168.1.10/32 3306	DENY ANY ANY
DENY ANY ANY	

MySQL Server Subnet Routing Table

Destination	Gateway
192.168.2.0/24	192.168.1.1
192.168.1.0/24	local

Which of the following should the cloud engineer address to fix the communication issue?

- A. The MySQL Server Subnet Routing Table
- B. The Application Server Subnet Routing Table
- C. The Application Server Stateful Firewall
- D. The MySQL Server Stateful Firewall

Answer: D

Explanation:

The connectivity issue between the application server and the MySQL database server in different subnets is likely due to the MySQL Server Stateful Firewall's inbound rules. The application server has an IP of 192.168.1.10, but the MySQL server's inbound rules only permit IP 192.168.1.10/32 on port 3306. This rule allows only a single IP address (192.168.1.10) to communicate on port 3306, which is typical for MySQL. However, if the application server's IP is not 192.168.1.10 or the application is trying to communicate on a different port, it would be blocked. To fix the communication issue, the cloud engineer should address the inbound rules on the MySQL Server Stateful Firewall to ensure that the application server's IP address and the required port are allowed. References: Based on the information provided in the question and general networking principles.

NEW QUESTION # 24

.....

Questions remain unsuccessful in the CV0-004 test and lose their resources. That's why ValidDumps is offering real CompTIA CV0-004 Questions that are real and can save you from wasting time and money. Hundreds of applicants have studied successfully

from our CV0-004 latest questions in one go. We have launched our CV0-004 Practice Test after consulting with experts who have years of experience in this field. People who have used our CV0-004 exam preparation material rated it as the best option to study for the CV0-004 exam in a short time.

VCE CV0-004 Exam Simulator: <https://www.validdumps.top/CV0-004-exam-torrent.html>

CompTIA Exam CV0-004 Topic Please trust yourself and have a try, Therefore, we get the test CV0-004 certification and obtain the qualification certificate to become a quantitative standard, and our CV0-004 learning guide can help you to prove yourself the fastest in a very short period of time, We'll explain all relative things about the CV0-004 exam study torrent and any other exam study material to ensure you are able to have better understand of our exam training pdf.

Personal Safety Controls, Applying Superimpose effects, Please trust yourself and have a try, Therefore, we get the test CV0-004 certification and obtain the qualification certificate to become a quantitative standard, and our CV0-004 learning guide can help you to prove yourself the fastest in a very short period of time.

Latest CV0-004 Exam Materials: CompTIA Cloud+ (2024) give you the most helpful Training Dumps

We'll explain all relative things about the CV0-004 exam study torrent and any other exam study material to ensure you are able to have better understand of our exam training pdf.

Our expert team has developed a latest short-term effective training scheme for CompTIA CV0-004 practice exam, which is a 20 hours of training of CV0-004 exam pdf for candidates.

The high efficiency of CV0-004 exam dumps preparation will bring you an unexpected result.
