CPIM-8.0 Test Dumps Free & Exam CPIM-8.0 Quick Prep

We are dedicated to help you pass the exam and gain the corresponding certificate successful. CPIM-8.0 exam cram is high-quality, and you can pass your exam by using them. In addition, CPIM-8.0 exam braindumps cover most of knowledge points for the exam, and you can also improve your ability in the process of learning. You can obtain the download link and password within ten minutes, so that you can begin your learning right away. We have free update for 365 days if you buying CPIM-8.0 Exam Materials, the update version for CPIM-8.0 exam cram will be sent to your email automatically.

APICS CPIM-8.0 Exam Syllabus Topics:

Topic	Details
Topic 1	Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends."

Topic 2	• Demand: This section evaluates the abilities of Demand Analysts in managing demand through forecasting techniques. It explores sources of demand data for accurate forecasting and evaluating forecast performance to improve future predictions. One important skill evaluated is "forecasting demand accurately."
Topic 3	• Quality, Technology, and Continuous Improvement: This section assesses skills of Quality Assurance Specialists, focusing on quality assurance methodologies enhanced by technology to drive continuous improvement efforts. A key skill measured here is "enhancing quality metrics."

APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q52-Q57):

NEW QUESTION # 52

Given the bill of material (BOM) information below and independent requirements of 10 pieces (pcs) per week of Component A and 20 pieces (pcs) per week of Component B, what is the weekly gross requirement of component F?

Component A BOM	
Component B	1 pcs
Component C	2 pcs
Component D	2 pcs

Component B BOM	
Component E	3 pcs
Component F	4 pcs

Component C BOM	
Component D	1 pcs
Component F	4 pcs

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Given the bill of material (BOM) information, we can calculate the weekly gross requirement of component F by considering the independent requirements of Component A and B. For Component A, there is no direct requirement for Component F. For Component B, which has an independent requirement of 20 pcs per week, each requires 4 pcs of Component F according to its BOM. So, the total weekly gross requirement for Component F due to Component B is $20 \times 4 = 80$ pcs. Additionally, each piece of Component A requires 2 pieces of Component C according to its BOM and has an independent requirement of 10 pcs per week; hence requiring a total of 20 pieces of component C per week. Each piece of component C in turn requires 4 pieces of component F according to its BOM; hence requiring a total weekly gross requirement for component F due to component A is: $20 \times 4 = 80$ pcs.

Adding both gives us a total weekly gross requirement for component F as: $80+80=160$ pcs. References:
