

Exam Cram 2V0-16.25 Pdf, 2V0-16.25 Actual Exams

Our VMware vSphere Foundation 9.0 Administrator exam questions are curated and crafted by experts. We have put in a lot of efforts to create amazing guides for our customers. Passing 2V0-16.25 can be hard, and you won't find such exam 2V0-16.25 Brain Dumps anywhere. With 2V0-16.25 sample questions exam dumps, you can secure high marks in the 2V0-16.25. We provide 100% money back guarantee on exam 2V0-16.25 practice exam products.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 2	• VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Topic 3	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.

Topic 4	IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 5	Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

2V0-16.25 Actual Exams | 2V0-16.25 Examcollection Dumps

A certificate may be a threshold for many corporations, it can decide that if you can enter a good company. There are 2V0-16.25 test dumps in our company with high quality, if you choose us pass guarantee and money back guarantee, if you indeed fail the exam, your money will be returned to your account. You can take easy to use the 2V0-16.25 Test Dumps, since we have the first-hand information, we will ensure that you will get the latest information.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

In VMware Cloud Foundation (VCF) Operations for Logs, where does an administrator visualize the value range of a field?

- A. Click on the field in the Events table.
- B. Click on the field in the Field Table.
- C. Click on the field in Manage Fields.
- D. Click the pencil in the Manage Fields pane.

Answer: A

Explanation:

In VCF Operations for Logs, administrators can analyze logs using queries, fields, and charts. A key feature is the ability to view the value range of a specific field.

* When a log query is executed, results appear in the Events table.

* Each field shown in the Events table is interactive.

* By clicking on a field in the Events table, administrators can drill down into the data to visualize its value distribution (range), typically in the form of a histogram or grouped data set.

This provides insight into what values are present and how frequently they occur, which is useful for troubleshooting, anomaly detection, and refining queries.

Why not the other options?

* A. Click the pencil in the Manage Fields pane# Used to edit or extract fields, not visualize ranges.

* C. Click on the field in Manage Fields# Displays field definitions and settings, not real-time value ranges.

* D. Click on the field in the Field Table# The Field Table lists defined fields but does not provide value range visualization.

NEW QUESTION # 39

An administrator is tasked to create a new storage policy for an eight-node VMware vSAN Original Storage Architecture (OSA) cluster.

The following specifications have been provided:

- * Tolerate up to two host failures.
- * Ensure maximum usable capacity.

Which storage policy settings must the administrator configure?

- A. 2 failures - RAID-5
- B. 3 failures - RAID-1
- C. 1 failure - RAID-5
- D. 1 failure - RAID-1

Answer: A

Explanation:

For an 8-node vSAN OSA cluster, the administrator needs a storage policy that:

- * Tolerates 2 host failures, and
- * Provides maximum usable capacity.
- * RAID-5/6 (erasure coding) is more capacity-efficient than RAID-1 mirroring.
- * To tolerate 2 failures, the correct policy is RAID-5 with FTT=2.
- * RAID-1 (mirroring) would consume far more capacity, reducing usable space.

Other options:

- * A. 1 failure - RAID-1# Only tolerates one failure.
- * C. 3 failures - RAID-1# Provides higher resilience but uses much more capacity, not maximum efficiency.
- * D. 1 failure - RAID-5# Tolerates only one failure.

NEW QUESTION # 40

An administrator is preparing to deploy VMware vSphere Foundation using the VMware Cloud Foundation (VCF) Installer wizard. During host onboarding, it is discovered that the VMware ESX hosts each have different root passwords.

Which deployment method must be used to continue the installation?

- A. Use the deployment wizard and enter credentials per host manually.
- B. Proceed with the wizard and override host credentials during staging.
- C. Use a JSON specification file to define per-host credentials.
- D. Set the password to expire on all ESX hosts.

Answer: C

Explanation:

When deploying VMware vSphere Foundation using the VCF Installer wizard, host onboarding requires consistent access credentials.

- * If ESX hosts have different root passwords, the wizard cannot proceed using a single credential.
- * In this case, administrators must use a JSON specification file to define per-host credentials, ensuring each host can be onboarded successfully.
- * The JSON specification allows defining host-specific parameters (IP, hostname, root password, networking, etc.).

Other options are incorrect:

- * A. Proceed with wizard and override host credentials during staging# Not supported.
- * B. Use deployment wizard and enter credentials per host manually# Wizard requires uniform credentials.
- * C. Set password to expire on all ESX hosts# Irrelevant to deployment and would cause failures.

NEW QUESTION # 41

An administrator is informed that a digital certificate used by vSphere has been revoked by the issuing Certificate Authority (CA)

before the scheduled expiration date. The administrator checks the Certificate Revocation List (CRL) in VMware Cloud Foundation (VCF) Operations but the CRL tab is not activated.

What must the administrator do to view the CRL?

- A. The CRL tab is not available when VCF Operations is licensed under vSphere Foundation.
- B. Set the Threshold For Adapters Certificate Expiration Alert to 6 under Global Settings.
- **C. Select the Activate Standard Certificate Validation under Global Settings.**
- D. Select the External Event Based Active Symptoms under Global Settings.

Answer: C

Explanation:

In VCF Operations, the Certificate Revocation List (CRL) tab is visible only when Standard Certificate Validation is activated in Global Settings.

* Once enabled, administrators can view the CRL tab and monitor revoked certificates.

Other options:

- * A. External Event Based Active Symptoms# Related to alerting, not CRL.
- * C. Threshold for Expiration Alert# Configures warnings, not CRL visibility.
- * D. Not available under vSphere Foundation license# Incorrect; CRL is available if validation is enabled.

NEW QUESTION # 42

An organization uses VMware Cloud Foundation (VCF) Operations to monitor and troubleshoot issues within a VMware vSphere Foundation (VVF) environment.

As part of the root cause analysis following a recent critical event, the administrator determined that specific log messages on a host clearly identified the problem.

What should the administrator implement to provide additional data to help troubleshoot in the future?

- A. VCF Operations Management Pack for VCF
- **B. VCF Operations for logs**
- C. VCF Automation
- D. VCF Operations Diagnostics

Answer: B

Explanation:

When troubleshooting critical events in a VMware vSphere Foundation (VVF) environment, logs are essential for root cause analysis.

- * In the given scenario, the administrator identified that specific log messages on a host clearly pinpointed the issue.
- * To enhance future troubleshooting, the best approach is to implement VCF Operations for Logs.
- * This enables centralized log collection, log-based alerts, and advanced queries, making it easier to correlate issues across infrastructure.

Other options like VCF Operations Diagnostics focus on proactive health checks and findings, while Management Pack for VCF extends observability but does not provide raw log insights. VCF Automation is unrelated to troubleshooting logs.

NEW QUESTION # 43

.....

The web-based VMware 2V0-16.25 practice test software is designed explicitly for the VMware vSphere Foundation 9.0 Administrator exam. It is a well-known self-preparation tool that contains 2V0-16.25 Exam Questions approved by VMware Certified Professionals. Our VMware 2V0-16.25 exam questions are periodically updated and are similar to the real VMware vSphere Foundation 9.0 Administrator exam questions. The VMware 2V0-16.25 Practice Test has a close resemblance with the actual VMware 2V0-16.25 exam. Multiple This VMware certification exam needs to be finished in a certain time duration, therefore VMware 2V0-16.25 practice test allows candidates to practice in the allocated time set according to their own needs.
