Salesforce Certified Platform Developer I Sample Questions (Q99-Q104):

NEW QUESTION # 99

A developer needs to allow users to complete a form on an Account record that will create a record for a custom object. The form needs to display different fields depending on the user's job role. The functionality should only be available to a small group of users.

Which three things should the developer do to satisfy these requirements?

Choose 3 answers

- A. Create a Custom Permission for the users.
- B. Add a Dynamic Action to the Users' assigned Page Layouts.
- C. Create a Lightning web component.

- D. Add a Dynamic Action to the Account Record Page.
- E. Create a Dynamic Form

Answer: A,B,C

Explanation:

Custom Permission:

Ensures that only the small group of users has access to this functionality.

Dynamic Action:

Allows displaying different fields depending on the user's role directly on the Account Record Page.

Why Not A or C:

Dynamic Forms are not used to create records for custom objects in this context.

A Lightning Web Component is unnecessary when Dynamic Actions can be used.
