

Exam CSPAI Fees - 100% Fantastic Questions Pool

CPR 2022 Final Exam Questions And 100% Correct Answers

1. When a cardiac arrest occurs and an AED becomes available, it should be used as soon as possible - **True**
2. A woman burned her hand in the lunchroom. You should: - **Cool the burn with large amounts of fresh running water. Cover the burn loosely with a dry, sterile dressing. Remove her from the source of the burn.**
3. You are giving first aid to a person with a muscle, bone, or joint injury. Emergency medical services (EMS) has been called. What should you do until they arrive. - **Apply cold if the person can tolerate it and watch for signs and symptoms of shock**
4. When caring for a person who is having a seizure, you should: - **Remove nearby objects that might cause injury.**
5. What sudden illness is usually caused by a blockage of blood flow to the brain? - **Stroke**
6. A person is having a diabetic emergency and requests sugar. The person is responsive and able to safely swallow. How much sugar should you give? - **15 to 20 grams**
7. A person has signs and symptoms of heat exhaustion. What should you do? - **Get the person out of the heat and into a cool place.**
8. A person is having signs and symptoms of a heart attack. What should you do first? - **Call 911 or the designated emergency number**
9. In what circumstance would it be appropriate to use a tourniquet? - **There are multiple people with life-threatening injuries who need care.**
10. When using direct pressure to control non-life-threatening bleeding from an open wound, you should: - **Add additional dressings and continue to apply direct pressure until the bleeding stops and then bandage the wound.**
11. You believe that a person has a head, neck, or spinal injury. What should you do? - **Have the person remain in the position he or she is in until emergency medical services (EMS) personnel arrive and take over**

Compared with the other products in the market, our CSPAI latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient Certified Security Professional in Artificial Intelligence study training dumps guarantee our candidates to pass the test easily. Passing exam won't be a problem anymore as long as you are familiar with our CSPAI Exam Material (only about 20 to 30 hours practice). High accuracy and high quality are the reasons why you should choose us.

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. We provide timely and free update for you to get more CSPAI Questions torrent and follow the latest trend. The CSPAI exam torrent is compiled by the experienced professionals and of great value.

>> Exam CSPAI Fees <<

CSPAI Valid Test Experience | Valid CSPAI Test Papers

Latest CSPAI exam torrent contains examples and diagrams to illustrate points and necessary notes under difficult points. Remember and practice what CSPAI quiz guides contain will be enough to cope with the exam this time. When dealing with the similar exam in this area, our former customers order the second even the third time with compulsion and confidence. That can be all ascribed to the efficiency of our CSPAI Quiz guides. On our word of honor, these CSPAI test prep will help you who are devoid of efficient practice materials urgently.

SISA CSPAI Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	• AIMS and Privacy Standards: ISO 42001 and ISO 27563: This section of the exam measures skills of the AI Security Analyst and addresses international standards related to AI management systems and privacy. It reviews compliance expectations, data governance frameworks, and how these standards help align AI implementation with global privacy and security regulations.
Topic 2	• Securing AI Models and Data: This section of the exam measures skills of the Cybersecurity Risk Manager and focuses on the protection of AI models and the data they consume or generate. Topics include adversarial attacks, data poisoning, model theft, and encryption techniques that help secure the AI lifecycle.
Topic 3	• Evolution of Gen AI and Its Impact: This section of the exam measures skills of the AI Security Analyst and covers how generative AI has evolved over time and the implications of this evolution for cybersecurity. It focuses on understanding the broader impact of Gen AI technologies on security operations, threat landscapes, and risk management strategies.
Topic 4	• Using Gen AI for Improving the Security Posture: This section of the exam measures skills of the Cybersecurity Risk Manager and focuses on how Gen AI tools can strengthen an organization's overall security posture. It includes insights on how automation, predictive analysis, and intelligent threat detection can be used to enhance cyber resilience and operational defense.

SISA Certified Security Professional in Artificial Intelligence Sample Questions (Q24-Q29):

NEW QUESTION # 24

What is a common use of an LLM as a Secondary Chatbot?

- A. To only manage user credentials
- B. To handle tasks unrelated to the main application
- C. To serve as a fallback or supplementary AI assistant for more complex queries
- D. To replace the primary AI system

Answer: C

Explanation:

A secondary chatbot, powered by an LLM, acts as a fallback or supplementary assistant, handling complex or overflow queries when the primary system is insufficient. This enhances CX by ensuring continuity and depth in responses, with security benefits like isolating sensitive tasks to a monitored secondary layer. Unlike replacing primary systems or handling unrelated tasks, this role leverages LLMs' flexibility to complement, not supplant, core functionalities. Exact extract: "LLMs as secondary chatbots serve as fallback assistants for complex queries, improving system resilience and user experience." (Reference: Cyber Security for AI by SISA Study Guide, Section on AI in Support Systems, Page 80-82).

NEW QUESTION # 25

Which of the following is a primary goal of enforcing Responsible AI standards and regulations in the development and deployment of LLMs?

- A. Ensuring that AI systems operate safely, ethically, and without causing harm
- B. Maximizing model performance while minimizing computational costs.
- C. Developing AI systems with the highest accuracy regardless of data privacy concerns
- D. Focusing solely on improving the speed and scalability of AI systems

Answer: A

Explanation:

Responsible AI standards, including ISO 42001 for AI management systems, aim to promote ethical development, ensuring safety, fairness, and harm prevention in LLM deployments. This encompasses bias mitigation, transparency, and accountability, aligning with societal values. Regulations like the EU AI Act reinforce this by categorizing risks and mandating safeguards. The goal transcends performance to foster trust and sustainability, addressing issues like discrimination or misuse. Exact extract: "The primary goal is to ensure AI systems operate safely, ethically, and without causing harm, as outlined in standards like ISO

42001." (Reference: Cyber Security for AI by SISA Study Guide, Section on Responsible AI and ISO Standards, Page 150-153).

NEW QUESTION # 26

In the Retrieval-Augmented Generation (RAG) framework, which of the following is the most critical factor for improving factual consistency in generated outputs?

- A. Implementing a redundancy check by comparing the outputs from different retrieval modules.
- **B. Tuning the retrieval model to prioritize documents with the highest semantic similarity**
- C. Fine-tuning the generative model with synthetic datasets generated from the retrieved documents
- D. Utilising an ensemble of multiple LLMs to cross-check the generated outputs.

Answer: B

Explanation:

The Retrieval-Augmented Generation (RAG) framework enhances generative models by incorporating external knowledge retrieval to ground outputs in factual data, thereby improving consistency and reducing hallucinations. The critical factor lies in optimizing the retrieval component to select documents with maximal semantic relevance, often using techniques like dense vector embeddings (e.g., via BERT or similar encoders) and similarity metrics such as cosine similarity. This ensures that the generator receives contextually precise information, minimizing irrelevant or misleading inputs that could lead to inconsistent outputs. For instance, in question-answering systems, prioritizing high-similarity documents allows the model to reference verified sources directly, boosting accuracy. Other approaches, like ensembles or redundancy checks, are supplementary but less foundational than effective retrieval tuning, which directly impacts the quality of augmented context. In SDLC, integrating RAG with fine-tuned retrieval accelerates development cycles by enabling modular updates without full model retraining. Security benefits include tracing outputs to sources for auditability, aligning with responsible AI practices. This method scales well for large knowledge bases, making it essential for production-grade applications where factual integrity is paramount. Exact extract:

"Tuning the retrieval model to prioritize documents with the highest semantic similarity is the most critical factor for improving factual consistency in RAG-generated outputs, as it ensures relevant context is provided to the generator." (Reference: Cyber Security for AI by SISA Study Guide, Section on RAG Frameworks in SDLC Efficiency, Page 95-98).

NEW QUESTION # 27

In the context of LLM plugin compromise, as demonstrated by the ChatGPT Plugin Privacy Leak case study, what is a key practice to secure API access and prevent unauthorized information leaks?

- A. Restricting API access to a predefined list of IP addresses
- B. Allowing open API access to facilitate ease of integration
- C. Increasing the frequency of API endpoint updates.
- **D. Implementing stringent authentication and authorization mechanisms, along with regular security audits**

Answer: D

Explanation:

The ChatGPT Plugin Privacy Leak highlighted vulnerabilities in plugin ecosystems, where weak API security led to data exposure. Implementing robust authentication (e.g., OAuth) and authorization (e.g., RBAC), coupled with regular audits, ensures only verified entities access APIs, preventing leaks. IP whitelisting is less comprehensive, and open access heightens risks. Audits detect misconfigurations, aligning with secure AI practices. Exact extract: "Stringent authentication, authorization, and regular audits are key to securing API access and preventing leaks in LLM plugins." (Reference: Cyber Security for AI by SISA Study Guide, Section on Plugin Security Case Studies, Page 170-173).

NEW QUESTION # 28

For effective AI risk management, which measure is crucial when dealing with penetration testing and supply chain security?

- A. Prioritize external audits over internal penetration testing to assess supply chain security.
- B. Perform occasional penetration testing and only address vulnerabilities in the internal network.
- **C. Conduct comprehensive penetration testing and continuously evaluate both internal systems and third-party components in the supply chain.**
- D. Implement penetration testing only for high-risk components and ignore less critical ones

Answer: C

Explanation:

Effective AI risk management requires comprehensive penetration testing and continuous evaluation of both internal and third-party supply chain components to identify vulnerabilities like backdoors or weak APIs. This holistic approach, aligned with SISA risk models, ensures robust security across the AI ecosystem, unlike limited or external-only testing. Exact extract: "Comprehensive penetration testing and continuous evaluation of internal and third-party components are crucial for AI risk management." (Reference: Cyber Security for AI by SISA Study Guide, Section on AI Risk Assessment Models, Page 180-183).

NEW QUESTION # 29

.....

If you have CertkingdomPDF CSPAI Exam Questions, you don't need a person to help you with reading and explaining the facts. This SISA CSPAI exam questions material is available in pdf so that anyone can study it without any difficulty. On the other hand, to understand real exams format, you can easily take CertkingdomPDF CSPAI Practice Exams. These Certified Security Professional in Artificial Intelligence (CSPAI) practice tests help you know how much you can score and if it is the right time to apply for the Certified Security Professional in Artificial Intelligence (CSPAI) certification exam or if you should wait for a little.
