- Communication.
- Individual skills.
- Motivation.
- Fitting testing within an organization.
- Test team and dynamics.

ISTQB CTAL_TM_001 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing the Test Activities: This section of the exam measures the skills of a Test Manager and covers the end-to-end coordination of testing work. Candidates must demonstrate how to plan testing—defining objectives, scope, resources, schedule, and risk treatments—then how to monitor progress against those plans, control deviations through corrective actions, and conclude testing with completion reports, archival of testware, and lessons learned sessions. The syllabus also explores tailoring test activities to project context, applying risk-based testing to focus effort where it matters most, shaping a coherent project test strategy, leading process improvement initiatives, and selecting and managing test tools throughout their lifecycle.
Topic 2	• Managing the Team: This section of the exam measures the skills of a Test Lead and addresses the human side of test management. Candidates must demonstrate how to identify the skills required for each project, assess and develop team competence, and apply motivating leadership practices. The syllabus also covers stakeholder relationship management, understanding interests and influence, articulating the business case for testing, and balancing cost-of-quality considerations to ensure testing is properly resourced, communicated, and valued within the wider project.
Topic 3	• Managing the Product: This section of the exam measures the skills of a Test Analyst and focuses on the artefacts under test and the metrics that describe them. Examinees show how to define and collect test metrics to monitor quality and progress, estimate effort and resources for different test scopes, and organize defect management workflows that fit sequential, iterative, or hybrid lifecycles. The aim is to ensure test outcomes align with objectives and inform stakeholders through clear reporting, while using estimation techniques and defect data to guide ongoing test and process improvements.

ISTQB CTAL_TM_001 Questions and Start Preparation Today [2025]

There are thousands of customers have passed their CTAL_TM_001 exam successfully and get the related certification. After that, all of their CTAL_TM_001 exam torrents were purchase on our website. In addition to the industry trends, the CTAL_TM_001 test guide is written by lots of past materials' rigorous analyses. The language of our CTAL_TM_001 Study Materials are easy to be understood, only with strict study, we write the latest and the specialized CTAL_TM_001 study materials. We want to provide you with the best service and hope you can be satisfied.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q192-Q197):

NEW QUESTION # 192

Which of the following organizational structures would be considered unorthodox? [1]

- A. Developers within the same team unit test each others' code prior to handing over to a separate testing team for system testing
- **B. After developers are done unit testing, business analysts alpha test the system before handing over to a separate testing team for system testing**
- C. Developers and testers are integrated within the same project team, each role focusing on a different level of testing
- D. DBAs confirm the referential integrity of the database and developers complete their unit testing before handing over to external organization for system testing

Answer: B

Explanation:

The unorthodox structure mentioned in option C involves business analysts performing alpha testing.

Typically, alpha testing is conducted by internal staff or a team close to the development environment, not specifically by business analysts. This step is unusual as business analysts are generally responsible for requirements analysis and ensuring that the developed system meets business needs, rather than conducting alpha testing, which is more focused on identifying bugs and issues from a user's perspective.

NEW QUESTION # 193

Instead of having an independent test team within the company, the company is considering to outsource testing. What are THREE key challenges that are typical for outsourcing? 1 credit

- A. Test environment more complex
- **B. Clear channels of communications**
- **C. Define expectation for tasks and deliverables**
- D. Applying test automation
- E. Testing of non-functional requirements
- F. Audit trail from requirements to test cases
- **G. Possibly different cultures**

Answer: B,C,G

Explanation:

Topic 7, Scenario 7 "Test Estimation"

You have been contracted to manage the acceptance testing of a new computer-based reservation system for a travel agency. You have provided an approximate budget estimate for the testing project based on previous experience with similar sized projects. However, the management of the parent company of the travel agency will not commit to the budget until detailed cost estimates are provided.

The reservation system is being developed by a third party. However, detailed specifications of the software are available, as well as an estimate of the total effort that will be spent in developing the software. The software is to be delivered in four increments, and the functionality to be delivered in each increment has already been agreed on.

NEW QUESTION # 194

Part of the testing strategy indicates that you are going to be using systematic test design techniques. Your manager has asked that you present the main advantages of using these techniques at the next board meeting. Identify THREE main benefits of using systematic test design techniques within this company. 2 credits (for 2 out of 3 correct 1 credit)

- A. Will make non-systematic testing redundant
- B. Will guide experienced testers to find defects
- **C. More enhanced documentation and therefore higher repeatability and reproducibility**
- D. Easier to quickly adapt testing to changing requirements compared to experienced-based testing
- **E. Targets certain types of faults**
- **F. Provides a way to differentiate depth of testing based on product risks by using different techniques**

- G. Will reduce the need for early reviews

Answer: C,E,F

NEW QUESTION # 195

Which of the following would you expect to see in the master test plan? 1 credit

- A. A detailed identification of the resources that will carry out structural testing in the first iteration.
- **B. The test approach that will be applied at system integration testing.**
- C. A list of the names of the testers who will carry out the performance testing for the final iteration.
- D. A description of how the test cases are cross-referenced to requirements in the test management tool.

Answer: B

NEW QUESTION # 196

Which of the following would you least expect to form part of the analysis of initial tool costs? 1 credit

- A. Integration with other tools
- **B. Tool portability**
- C. Learning time required to use the new tool
- D. Evaluation of suitable tools

Answer: B

Explanation:

Topic 4, Scenario 4, V2 "Test Management Tool"

The project situation after 11 months is:

-

The first increment was released one week late but contained sufficient functionality to be declared fit for purpose'. However, there were 20 outstanding incidents deferred to increment two.

-

The amount of voluntary overtime worked PV the test team has reduced the second Increment slippage to just 3 weeks.

-There is talk of reducing the scope of requirements. The purpose of this is to first deliver the application with support for manual testing and then to provide a delivery * weeks later to resolve any remaining points and provide support for automated testing (i.e. the link to the capture-replay tool).

-Concerns have been expressed by a section of the user community, that in some places the usability is very poor.

NEW QUESTION # 197

.....

Using an updated ISTQB Certified Tester Advanced Level - Test Manager (CTAL_TM_001) exam dumps is necessary to get success on the first attempt. So, it is very important to choose a ISTQB Certified Tester Advanced Level - Test Manager (CTAL_TM_001) exam prep material that helps you to practice actual ISTQB CTAL_TM_001 questions.
