DSCI DCPLA Brain Exam & DCPLA Reliable Test Forum

You can take our DSCI DCPLA practice exams (desktop and web-based) multiple times to gauge how well you've prepared for the real DSCI DCPLA test. These DCPLA practice exams are designed specifically to help you identify your mistakes and attempt the real DCPLA examination successfully. You can continually enhance your DSCI Certified Privacy Lead Assessor DCPLA certification (DCPLA) test preparation by overcoming your mistakes. Customers can check their prior DCPLA tests and give DCPLA practice exams multiple times to improve themselves for the final DSCI DCPLA test.

DSCI DCPLA (DSCI Certified Privacy Lead Assessor) Certification Exam is a globally recognized certification that demonstrates an individual's proficiency in handling privacy assessments. The DCPLA certification exam is designed to test a candidate's knowledge and skills in conducting privacy assessments, identifying privacy risks, and implementing privacy controls. DSCI Certified Privacy Lead Assessor DCPLA certification is awarded by the Data Security Council of India (DSCI), which is a not-for-profit organization that promotes data protection and privacy in India and globally.

DSCI DCPLA Certification Exam covers a wide range of topics related to privacy assessment and management, including privacy principles, privacy risk management, privacy compliance, privacy audits, and privacy operations. DCPLA exam is designed to test the candidate's knowledge and understanding of these topics, and their ability to apply this knowledge in real-world scenarios. DSCI Certified Privacy Lead Assessor DCPLA certification is ideal for professionals who are responsible for privacy assessments, audits, and compliance in their organizations.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q92-Q97):

NEW QUESTION # 92

Which of the following activities form part of an organization's Visibility over Personal Information (VPI) initiative, according to DSCI Privacy Framework (DPF)?

- A. 'Data processing environment' analysis of the organization and associated third parties
- B. 'Data processing environment' analysis of industry peers
- C. 'Data processing environment' analysis of the country
- D. 'Data processing environment' analysis of the organization only

Answer: A

Explanation:

The VPI practice area in the DPF emphasizes the importance of identifying personal data, understanding its flow, and assessing risks not only within the organization but also across third parties with whom data is shared or processed.

Therefore, analyzing the data processing environment of both the organization and associated third parties is critical to achieving visibility over personal information.

NEW QUESTION # 93

What is a Data Subject? (Choose all that apply.)

- A. An individual who collects data from illegitimate sources
- B. A company providing PI of its employees for processing
- C. An individual who provides his/her data/information for availing any service
- D. An individual who processes the data/information of individuals for providing necessary services
- E. An individual whose data/information is processed

Answer: C,E

Explanation:

According to the DSCI Privacy Framework and aligned international frameworks such as GDPR and APEC, a "Data Subject" refers to:

"An identified or identifiable natural person to whom the personal data relates." This includes individuals whose data is being collected, held, or processed by any entity. Thus:

* A (an individual providing their data to avail a service) is a data subject because the data is about them.

* C (an individual whose data/information is processed) directly matches the definition.

Options B, D, and E refer to entities or persons involved in processing or handling the data, not the individuals to whom the data belongs.

NEW QUESTION # 94

_____ is used to identify and reduce privacy risks by analyzing what is processed by the entity and the policies in place to protect the data.

- A. Anonymization
- B. Minimization

- C. Privacy Impact Assessment
- D. Threat Hunting

Answer: C

NEW QUESTION # 95

Arrange the following techniques in decreasing order of the risk of re-identification:

- I) Pseudonymization
- II) De-identification
- III) Anonymization

- A. All have equal risk of re-identification
- B. I, II
- C. III, II, I
- D. II, III, I

Answer: D

NEW QUESTION # 96

Entities should collect personal information from user that is adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed. This Privacy Principle is called:

- A. Collection Limitation
- B. Accountability
- C. Use Limitation
- D. Storage Limitation

Answer: A

Explanation:

According to the DSCI Privacy Framework and aligned with global privacy principles such as those found in the OECD and APEC frameworks, "Collection Limitation" emphasizes that personal data should be collected in a manner that is lawful and fair, and should be limited to what is necessary for the identified purposes.

As per DSCI Assessment Framework for Privacy (DAF-P©), this principle ensures organizations collect only relevant data by minimizing unnecessary data acquisition, thereby reducing the privacy risks. The principle mandates:

"Personal data collected should be adequate, relevant, and limited to what is necessary in relation to the purposes for which they are processed." This is designed to promote responsible data stewardship and ensure minimal exposure of individuals' personal information.
