What's more, part of that Prep4away 1z0-591 dumps now are free: <https://drive.google.com/open?id=1DWmVo5xPnD5W5vpMU6CDO-K9IUQd3qhF>

The users can instantly access the product after purchasing it from Prep4away 1z0-591, so they don't have to wait to prepare for the Oracle 1z0-591 Exams. The 24/7 support system is available for the customers, so they can contact the support whenever they face any issue, and it will provide them with the solution. Furthermore, Prep4away offers up to 1 year of free updates and free demos of the product.

Oracle Business Intelligence Foundation Suite offers a complete and integrated BI platform that enables organizations to make informed business decisions based on real-time data. This suite includes various tools and applications that can help users to access, analyze, and share information effectively. The Oracle 1Z1-591 exam tests the knowledge of candidates in these tools and applications, such as the Oracle BI Interactive Dashboards, Oracle BI Answers, and Oracle BI Delivers.

Oracle 1z0-591 certification is essential for IT professionals who want to build their career in Oracle Business Intelligence technologies. Oracle Business Intelligence Foundation Suite 11g Essentials certification validates essential skills and abilities that are required to work with Oracle BI Foundation Suite 11g effectively. It is an excellent investment for professionals who seek to acquire comprehensive knowledge and skills in Oracle BI technologies. Those who successfully Clear 1z0-591 Exam gain an edge in the competitive job market and can successfully work on complex business intelligence problems.

The Oracle 1z0-591 exam consists of multiple-choice questions that test the candidate's understanding of BI Foundation Suite 11g. 1z0-591 exam is offered worldwide through Pearson VUE testing centers. Candidates can take the exam online or in-person. 1z0-591 exam is computer-based and requires a passing score of 66% or higher to become certified. The Oracle 1Z1-591 certification is valid for two years and can be renewed by passing an updated version of the exam.

1z0-591 Valid Test Bootcamp | Reliable 1z0-591 Braindumps Sheet

Users who use our 1z0-591 real questions already have an advantage over those who don't prepare for the exam. Our study materials can let users the most closed to the actual test environment simulation training, let the user valuable practice effectively on 1z0-591 practice guide, thus through the day-to-day practice, for users to develop the confidence to pass the exam. For examination, the power is part of pass the exam but also need the candidate has a strong heart to bear ability, so our 1z0-591 learning guide materials through continuous simulation testing to help you pass the 1z0-591 exam.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q36-Q41):

NEW QUESTION # 36

Selecting the Manage Map Data link allows one to do which three of the following?

- A. Create a new map layer
- B. Associate map layers to columns defined in the OBIEE metadata
- C. Import images for use on maps
- D. Set the zoom level of an imported map

Answer: B,C,D

Explanation:

Explanation/Reference:

The Oracle BI Presentation Services Administration page provides the Manage Map Data link. This link displays the Manage Map Data page, where you can manage the logical and display versions of the data from various physical data sources. This defines the layers that content designers use when creating map views. The data that is available for managing maps and data is stored in Oracle Database as part of MapViewer.

Using this page, you provide:

* (A) Logical names to prevent any existing BI column mappings and map analyses from breaking because of changes to the physical data or to the data source.

* Display names so that the geographic data is meaningful to end users.

Note: Administering Maps Using Administration Pages

For (C) -layers, see 3-7 below.

For (D) -import images, see 11-12 below.

To administer maps using Administration pages:

1. Sign in to Oracle Business Intelligence.
2. In the global header, click Administration.
3. Click the Manage Map Data link to display the Manage Map Data page.
4. Click the Layers tab.
5. Click the Import Layers button to display the Import Layers dialog.
6. In the dialog, select the connection and the layers that are needed for zooming and drilling. (This tab is not prepopulated by other selections on the Administration pages. You can use any layers or images with any map.)

Click OK when you have finished selecting layers that are appropriate for the subject area with which you are working.

7. Back on the Layers tab, select a layer, then click the Edit Layer button to display the Edit Layer dialog in which you associate layers with attribute columns so that you can display BI data in the map view.

Click OK when you have finished editing the layer.

You use this tab to associate layers with BI data. If you use the City column in multiple subject areas, then you must associate it with a layer for each subject area.

8. Click the Background Maps tab, then click the Import Background Maps button to display the Import Background Maps dialog.

9. In the dialog, select the connection and the main maps to use.

The connection that you select for the main map can be different from the connection for the layers or images.

Click OK when you have finished selecting main maps.

10. Back on the Background Maps tab, select a map, then click the Edit Background Map button to display the Edit Background Map dialog in which you name the map and specify the order of layers and their zoom levels.

Click OK when you have finished editing the map.

11. Optionally, click the Images tab, then click the Import Images button to display the Import Images dialog. You can import images if you plan to use them as a format on maps.

12. In the dialog, select the connection and the images to use.

Click OK when you have finished selecting images.

13. Click Back when you have finished working with the Administration page. Your changes are saved automatically.

NEW QUESTION # 37

What is the first step when creating an Aggregate table in the OBI repository?

- A. Create a dedicated Connection Pool
- B. Use Job Manager to run the Aggregate script
- C. Specify the Fact table that you want to aggregate
- D. Test the Aggregate table by using Analysis

Answer: C

Explanation:

Steps for Creating Aggregate Tables in OBIEE

1. Create all Dimension Tables, Fact Tables & Hierarchies, which are required to be aggregated.

2. Go to Tools > Utilities (from Administration tool menu bar), a dialog box will pop up with all available utilities.

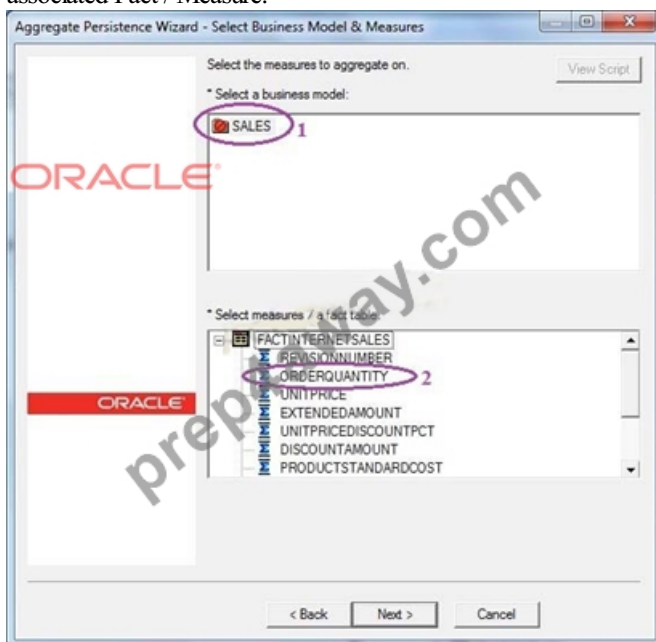

3. Select Aggregate Persistence Wizard, and then click Execute Button.

4. Now Select appropriate path where you need to generate Aggregate Table SQL.

Note : Click Generate DDL file for first time generation of Aggregate Table

Click Next, to move to next page (Select Business Model & Measure Page)

In Select Business Model & Measure Page, Select Appropriate Business Model & then select associated Fact / Measure.

<http://1.bp.blogspot.com/--vsF4VJcbss/T2H9xyA8HsI/AAAAAAAAAd4/JOFqD3KwgAE/s640/3.jpg> Etc.

NEW QUESTION # 38

Why is it necessary to join multiple source tables to a single dimension?

- A. Because the dimensions tables are built in the transactional systems
- B. Because a single source table often contains all the dimensions needed
- C. Because transactional source systems are often denormalized
- D. Because transactional source systems are often normalized

Answer: D

Explanation:

Explanation

Denormalized data in the transactional system could be divided into different tables to increase performance.

NEW QUESTION # 39

DSNs are set up for access to which data sources?

- A. Teradata Data Sources
- **B. ODBC Data Sources**
- C. IBM Data Sources
- D. Oracle Data Sources

Answer: B

Explanation:

Explanation

The principal connection to an OBI Server inside the Oracle BI System is made through an Odbc Connection.

OBI Server can handle multiple repository but you can connect to only one at the same time by DSN Odbc Connection. Therefore, you must set up an ODBC connection for each repository.

NEW QUESTION # 40

Identify the two types of storage for Essbase.

- A. Aggregate Storage and Cell Storage
- B. OLAP Storage and Cell Storage
- **C. Aggregate Storage Option and Block Storage Option**
- D. Aggregate Storage and Hybrid Columnar Compression

Answer: C

Explanation:

Explanation

Oracle Essbase developers creating planning and budgeting applications have been keenly aware of the advantages and disadvantages of the two different storage types available to them:

* Block storage option (BSO) databases support a wide range of calculations, including forecasts, allocations, and aggregations through procedural calculation scripts. The results of these calculations can be written back to the database, but applications that use BSO storage are limited to about 10 dimensions and member counts in the low hundreds of thousands.

* Aggregate storage option (ASO) databases can support about 20 dimensions and member counts in the millions. ASO databases use multidimensional functions rather than procedural scripts to perform calculations, but the results of queries cannot be stored back in the database, making ASO unsuitable for most financial management applications.

NEW QUESTION # 41

.....

In the past few years, our 1z0-591 study materials have helped countless candidates pass the 11g exam. After having a related certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. 1z0-591 Study Materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use 1z0-591 study torrent to prepare for the 1z0-591 exam, which makes us very gratified.
