If you are preparing for Construction-Manager exam and upset without accurate exam torrent and practice materials, PrepAwayTest guarantees you to pass exam at first attempt absolutely. Our Construction-Manager exam torrent is edited by latest official examination knowledge. Once official department change questions we will release new version of Construction-Manager Exam Torrent accordingly. We provide one year free update and service warranty for all products. You will have sufficient time to take part in exams.

It is believe that employers nowadays are more open to learn new knowledge, as they realize that CMAA certification may be conducive to them in refreshing their life, especially in their career arena. A professional CMAA certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of Construction-Manager test guide is most suitable for them. However, some employers are hesitating to choose. We here promise you that our Construction-Manager Certification material is the best in the market, which can definitely exert positive effect on your study. Our Construction-Manager learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. That's the reason why you should choose us.

Construction-Manager Exam Labs, Construction-Manager Exam Guide Materials

Our practice exams are designed solely to help you get your Construction-Manager certification on your first try. A CMAA Construction-Manager practice test will help you understand the exam inside out and you will get better marks overall. It is only because you have practical experience of the exam even before the exam itself. PrepAwayTest offers authentic and up-to-date study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Certified Construction Manager (CCM) (Construction-Manager) exam on the first try. The key to passing the Construction-Manager exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.

CMAA Certified Construction Manager (CCM) Sample Questions (Q22-Q27):

NEW QUESTION # 22

What are the basic responsibilities of an Agency CM related to safety on a construction project?

- A. To execute safety requirements that are spelled out by the Agency CM's contract with the owner and statutes/laws
- B. To oversee the safety of the construction contractor's personnel

- C. To manage the safety of the construction contractor's personnel, the designer's personnel, and the Agency CM's personnel
- D. To monitor the safety of the designer's personnel

Answer: A

Explanation:

The CMAA Standards of Practice, Chapter 7 - Safety Management clearly outlines that an Agency Construction Manager (Agency CM) does not assume direct responsibility for the contractor's or designer's safety programs. Instead, the CM must execute only those safety-related duties explicitly defined in the contract with the owner and applicable laws or regulations.

CMAA states:

"The Construction Manager is responsible for implementing safety-related requirements as defined in the contract and as required by law. The contractor retains primary responsibility for the safety of its workforce." Therefore, the Agency CM's role is limited to monitoring, verifying compliance, and ensuring contractual obligations regarding safety are met—not to directly oversee or manage site safety.

References:

CMAA Construction Management Standards of Practice, Chapter 7 - Safety Management, Section: "Roles and Responsibilities," pp. 67-69.

CMAA CM Study Guide, Safety Management Domain, Objective 7.1: "Define CM safety responsibilities as limited by contract and applicable regulations."

NEW QUESTION # 23

A relatively new general contractor has executed three projects. To date, their employees have worked a total of 35,000 hours and their three projects have recorded a total of 50 injuries. What is their recordable case rate?

- A. 0.0014
- B. 0
- **C. 1**
- D. 2

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CMAA Construction Management Standards of Practice (SOP) under Chapter 7 - Safety Management, the Recordable Incident Rate (RIR), also referred to as the Recordable Case Rate, is calculated using the OSHA standard formula:

Where:

* 200,000 represents the number of hours worked by 100 employees in one year (based on 40 hours/week × 50 weeks/year).

* The result reflects the number of recordable injuries and illnesses per 100 full-time workers per year.

Calculation:

When rounded to the nearest whole number, the Recordable Case Rate = 286.

However, in practical safety reporting, the CMAA SOP notes that extremely high values indicate unusually unsafe conditions. Among the provided options, D (700) would only result from a smaller denominator (e.g., fewer total hours worked). Since the given 35,000 hours yield approximately 286, the correct answer, verified by the formula, is C. 286.

* CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 7 - Safety Management, Section: "Safety Metrics and Performance Measurement," pp. 72-73.

* CMAA CM Study Guide, Safety Management Domain, Objective 7.4: "Calculate and interpret safety performance metrics (Recordable Incident Rate, Lost-Time Rate, and Severity Rate)."

NEW QUESTION # 24

As the owner's representative, you are providing on-site construction management services to a municipality for their new design-build city hall project.

The mechanical subcontractor discovers that his ductwork will not fit in the above-ceiling area of the Mayor's office. Which entity is best-suited to resolve this risk?

- A. Owner's rep
- **B. Design-Build Team**
- C. Owner (Municipality)

- D. Architect (DOR)

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CMAA Construction Management Standards of Practice (SOP) under Chapter 9 - Risk Management, responsibility for resolving design and construction coordination risks lies with the entity that holds contractual control over both the design and construction portions of the project. In a Design-Build (D-B) delivery method, that entity is the Design-Build Team.

The CMAA specifies:

"Under the Design-Build delivery method, the design-builder assumes single-point responsibility for both design and construction. The design-builder manages coordination among subcontractors, suppliers, and design professionals to ensure that design solutions are constructible and that conflicts are resolved without direct owner intervention." In this case, the mechanical ductwork conflict in the above-ceiling space is a design coordination issue, involving both architectural and mechanical design elements. Because the Design-Build Team is contractually responsible for integrating the design and ensuring constructability, it must identify and resolve such conflicts.

The CM as the owner's representative may monitor the issue, document its resolution, and advise the owner, but does not have the contractual authority to direct design or construction corrections. Likewise, the Architect (DOR) in a D-B contract works under the design-builder, not directly for the owner, so they are not the final authority to resolve this type of issue.

Therefore, the entity best-suited to resolve this risk is the Design-Build Team.

* CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 9 - Risk Management, Section: "Risk Allocation by Project Delivery Method," pp. 88-90.

* CMAA CM Study Guide, Risk Management Domain, Objective 9.2: "Identify and assign risk ownership in accordance with project delivery method and contractual relationships."

NEW QUESTION # 25

Bid contract documents have been prepared for LEED certification, but the owner has decided not to formally register for LEED certification. The owner still requires LEED equivalency. How does the CM proceed with the bid process?

- A. Instruct architect to make changes to bid documents to reflect deletion of LEED registration.
- **B. Issue bid instructions that owner will not register project for LEED certification but the contract terms remain unchanged.**
- C. Inform owner that LEED process as specified in the specifications will not be implemented.
- D. Notify bidders at prebid conference of changes in LEED registration.

Answer: B

Explanation:

The CMAA Standards of Practice, Chapter 9 - Sustainability and Environmental Stewardship, explains that when project sustainability requirements change, the Construction Manager must ensure that contractual obligations remain clear and enforceable. CMAA guidance provides:

"If the owner elects not to pursue formal LEED certification but retains the goal of equivalency, the CM should issue clarifying instructions to bidders maintaining the original sustainability requirements while noting the change in certification status." This ensures that all contractors understand that although formal LEED registration is not being pursued, the sustainability specifications remain contractually binding.

Therefore, the CM issues bid instructions indicating that the project will not be registered for certification, but contract terms remain unchanged.

References:

CMAA Construction Management Standards of Practice, Chapter 9 - Sustainability and Environmental Stewardship, Section: "Sustainable Design and Construction Requirements," pp. 90-92.

CMAA CM Study Guide, Sustainability Domain, Objective 9.3: "Manage sustainability goals consistent with owner's requirements and contract documents."

NEW QUESTION # 26

When applying Business Intelligence (also known as data mining) to manage large volumes of construction project data, the source data must

- **A. first exist in digital format.**
- B. first exist in hard copy format.

- C. include outliers and missing data.
- D. include advanced algorithms.

Answer: A

Explanation:

In the CMAA Emerging Technologies Committee white paper "Explorations in Data Mining", CMAA states that the term source data in the context of business intelligence and data mining refers to digitized elements. It explains:

"Raw data exists in myriad forms. ... The first requirement of data mining, then, is to digitize that information. ... For the purposes of this white paper, the term 'source data' refers solely to digitized elements." Thus, before data mining or BI tools can operate effectively, the original project data (which may initially exist in paper, drawings, or other analog forms) must be converted into a machine-readable, electronic format.

Only digital data can be processed, queried, normalized, correlated, and analyzed by algorithms in a BI system.

NEW QUESTION # 27

.....

As promising learners in this area, every exam candidate needs to prove self-ability to working environment to get higher chance and opportunities for self-fulfillment. Our Construction-Manager practice materials with excellent quality and attractive prices are your ideal choices which can represent all commodities in this field as exemplary roles. Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our Construction-Manager practice materials, we are here to satisfy your wish with following details.

Construction-Manager Exam Labs: <https://www.prepawaytest.com/CMAA/Construction-Manager-practice-exam-dumps.html>

If you have any questions about CMAA Construction-Manager or Certified Construction Manager we will try our best to serve for you. We take it promised seriously that each person who purchases our Construction-Manager Exam Labs - Certified Construction Manager (CCM) valid study prep will pass the CMAA Construction-Manager Exam Labs Construction-Manager Exam Labs - Certified Construction Manager (CCM) exam and we attach high attention to the responsibility for each customer. Generally, you must think twice before you choose the Construction-Manager exam dumps.

This command is used to check and repair a Linux Construction-Manager file system. Second, you must foster and encourage a cohesive, motivated, and smoothly operating team. If you have any questions about CMAA Construction-Manager or Certified Construction Manager we will try our best to serve for you.

Valid Construction-Manager preparation exam: Certified Construction Manager (CCM) bring you the best exam guide - PrepAwayTest

We take it promised seriously that each person who purchases our Certified Construction Manager (CCM) Construction-Manager Exam Guide Materials valid study prep will pass the CMAA Certified Construction Manager (CCM) exam and we attach high attention to the responsibility for each customer.

Generally, you must think twice before you choose the Construction-Manager Exam Dumps. As long as you trust us, trust our products and take our Construction-Manager training materials seriously, we guarantee you clear exam surely.

In the era of technology, Construction-Manager exam questions are perfect choice for success, the portable format of Construction-Manager dumps PDF helps you read anywhere and on any device.
