Each format of our JN0-336 study material excels in its own way and serves to improve your skills and gives you an inside-out understanding of each exam topic.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q23-Q28):

NEW QUESTION # 23
Your network uses a single JSA host and you want to implement a cluster.
In this scenario, which two statements are correct? (Choose two.)

- A. The secondary host can backup multiple JSA primary hosts.
- B. The cluster virtual IP will need an unused IP address assigned.
- C. The software versions on both primary and secondary hosts
- D. The primary and secondary hosts must be configured with the same storage devices.
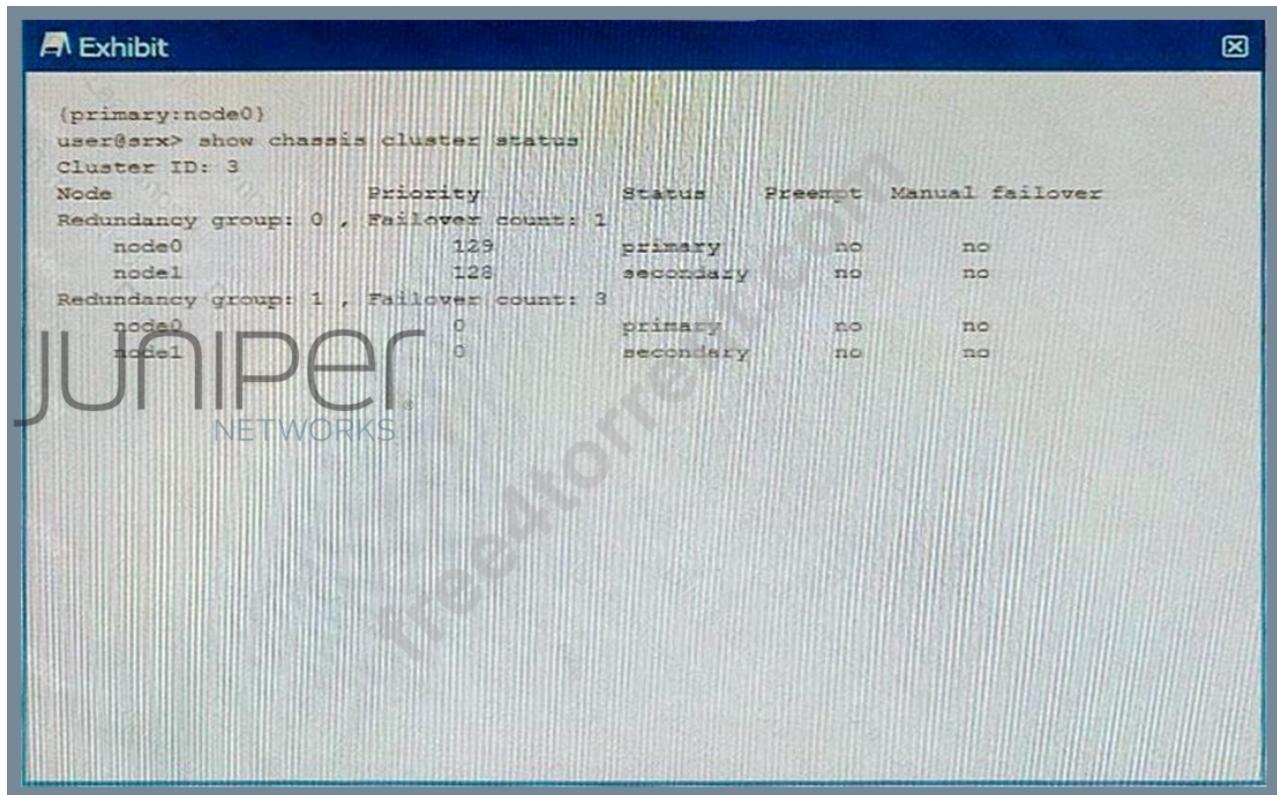

Answer: B,C

Explanation:
According to the Juniper Networks JNCIP-SEC Study Guide, when setting up a cluster with a single JSA host, both the primary and secondary hosts must have the same software version installed. Additionally, an unused IP address must be assigned to the

cluster virtual IP. The primary and secondary hosts do not need to be configured with the same storage devices, and the secondary host cannot be used to backup multiple JSA primary hosts.

NEW QUESTION # 24
Exhibit

Using the information from the exhibit, which statement is correct?

- A. Redundancy group 1 is in an ineligible state.
- B. Node1 is the active node for the control plane
- C. There are no issues with the cluster.
- D. Redundancy group 0 is in an ineligible state.

Answer: C

NEW QUESTION # 25
Which two statements are correct about chassis clustering? (Choose two.)

- A. The cluster ID is used to identify each device in the chassis cluster.
- B. The node ID is used to identify each device in the chassis cluster.
- C. The node ID value ranges from 1 to 255.
- D. A system reboot is required to activate changes to the cluster.

Answer: B,D

Explanation:
In chassis clustering, the node ID is indeed used to uniquely identify each device within the cluster. This allows for individual addressing and management of devices within the cluster configuration, which is crucial for operations and maintenance.
Typically, activating changes that involve chassis clustering configuration, such as setting or changing the node ID or forming a new cluster, requires a reboot of the devices. This ensures that all configuration changes are properly applied and that the devices can synchronize their states as part of the cluster.

NEW QUESTION # 26

You are currenty using a third-party threat analyzer. You want your SRX Series device to send decrypted SSE traffic to......
In this scenario, which feature should you configure on the SRX device?

- **A. IPS IPanotify action**
- **B. JSA vulnerability assessment**
- C. Phase 2 proxy ID
- D. SSL decryption mirroring

Answer: A,B

NEW QUESTION # 27
You have deployed an SRX300 Series device and determined that files have stopped being scanned.
In this scenario, what is a reason for this problem?

- A. The file is too small to have a virus.
- B. The software license is a free model and only scans executable type files.
- C. The infected host communicated with a command-and-control server, but it did not download malware.
- **D. You have exceeded the maximum files submission for your SRX platform size.**

Answer: D

Explanation:
You have exceeded the maximum files submission for your SRX platform size: This statement is correct because file scanning on SRX300 Series device has a limit on the number of files that can be submitted per minute based on the platform size3. For example, SRX320 has a limit of 10 files per minute3.

NEW QUESTION # 28
......

Software lets you customize your Juniper JN0-336 practice exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this Juniper JN0-336 practice exam software. It is similar to the Security, Specialist (JNCIS-SEC) (JN0-336) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the Security, Specialist (JNCIS-SEC) (JN0-336) web-based practice test.
