Exam FCP_FWB_AD-7.4 Objectives | 100% Free Efficient Reliable FCP - FortiWeb 7.4 Administrator Exam Answers

VCEdumps is a website engaged in the providing customer FCP_FWB_AD-7.4 VCE Dumps and makes sure every candidates passing actual test easily and quickly. We have a team of IT workers who have rich experience in the study of Fortinet dumps torrent and they check the updating of Fortinet top questions everyday to ensure the accuracy of exam collection.

Fortinet FCP_FWB_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Encryption, Authentication, and Compliance: This section of the exam assesses the expertise of Security Analysts in mitigating web application vulnerabilities through encryption and authentication mechanisms. Candidates must configure various access control methods, track user authentication, and prevent attacks targeting authentication systems. They must also implement SSL inspection and offloading techniques to enhance security and troubleshoot encryption or authentication-related issues effectively.
Topic 2	<ul style="list-style-type: none">Web Application Security: This domain evaluates the ability of Cybersecurity Specialists to implement advanced threat mitigation strategies using FortiWeb. Candidates must configure the system to block known attacks, ensure comprehensive web application protection, and troubleshoot threat detection or mitigation-related issues. Additionally, they are expected to set up API protection mechanisms to secure web-based interactions from potential threats.

Topic 3	<ul style="list-style-type: none"> • Deployment and Configuration: This section of the exam measures the skills of Network Security Engineers and covers the ability to identify FortiWeb deployment requirements and configure essential system settings. Candidates are expected to set up server pools, security policies, and protected hostnames to ensure seamless deployment. To maintain operational efficiency, they must also configure FortiWeb high availability (HA) for fault tolerance and troubleshoot deployment or system-related issues.
Topic 4	<ul style="list-style-type: none"> • Machine Learning (ML): This section tests the skills of Application Security Engineers in leveraging machine learning to enhance web application security. Candidates will configure machine learning algorithms to detect anomalies, mitigate bot-based threats, and secure APIs through AI-driven analysis. Understanding how to fine-tune these ML-based security measures is crucial for ensuring robust application protection against evolving cyber threats.

Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which of the following are common reasons for configuring HTTP redirection in application delivery?

(Select all that apply)

- A. Redirecting users to a different website
- B. Load balancing traffic
- C. Blocking specific IP addresses
- D. Enforcing HTTPS for secure communication

Answer: A,D

NEW QUESTION # 67

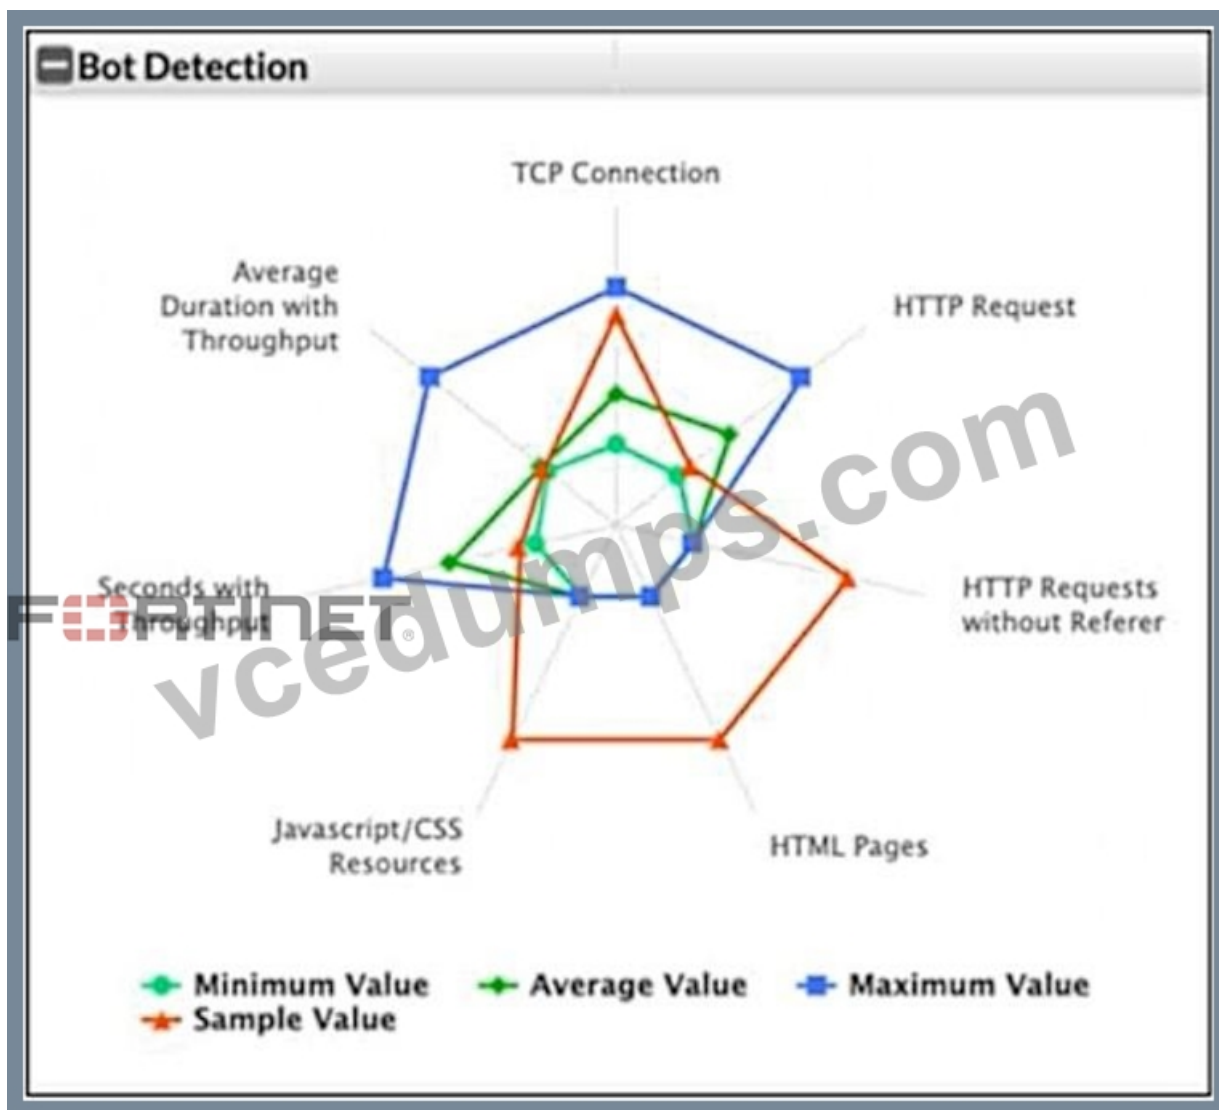

When configuring access control methods for web application users, which options should be considered for tracking and auditing user actions? (Select all that apply)

- A. Session logs
- B. Web server logs
- C. Error logs
- D. Authentication logs

Answer: A,B,D

NEW QUESTION # 68

Refer to the exhibit.

What can you conclude from this support vector machine (SVM) plot of a potential bot connection?

- A. The connection uses too much bandwidth.
- B. The connection is normal and within the expected averages.
- **C. The connection is possibly a bot.**
- D. The connection uses an excessive amount of TCP connections, but is harmless.

Answer: C

Explanation:

In the SVM plot of potential bot activity, you can see that the sample value (orange) is significantly different from the average value (green) and the maximum value (blue) in most of the metrics. This suggests unusual or abnormal behavior, indicating that the connection might be a bot. Typically, bots exhibit patterns that diverge from normal user activity, such as higher frequencies of certain types of requests, abnormal throughput, or an unusual pattern of HTTP requests (such as requests without referers or excessive TCP connections).

NEW QUESTION # 69

Which two statements about running a vulnerability scan are true? (Choose two.)

- **A. You should run the vulnerability scan during a maintenance window.**
- B. You should run the vulnerability scan on the live website to get accurate results.
- C. You should run the vulnerability scan multiple times so it can automatically update the scan parameters.
- **D. You should run the vulnerability scan in a test environment.**

Answer: A,D

Explanation:

You should run the vulnerability scan during a maintenance window: Running a vulnerability scan during a maintenance window minimizes the risk of affecting normal operations. Scans can be resource-intensive and may cause disruptions if run during peak hours or when the system is in use.

You should run the vulnerability scan in a test environment: It is important to run the vulnerability scan in a test environment first to avoid unintended disruptions on the live system. This helps to identify potential issues or false positives without impacting production systems.

NEW QUESTION # 70

How can you troubleshoot application delivery-related issues effectively? (Select all that apply)

- A. Disabling all security features temporarily
- B. Clearing the cache on the client side
- C. Testing from multiple geographic locations
- D. Reviewing server logs for errors

Answer: C,D

NEW QUESTION # 71

.....

You only need 20-30 hours to practice our software materials and then you can attend the exam. It costs you little time and energy. The FCP_FWB_AD-7.4 exam questions are easy to be mastered and simplified the content of important information. The FCP_FWB_AD-7.4 test guide conveys more important information with amount of answers and questions, thus the learning for the examinee is easy and highly efficient. So it is convenient for the learners to master the FCP_FWB_AD-7.4 Guide Torrent and pass the FCP_FWB_AD-7.4 exam in a short time.
