New FCP_GCS_AD-7.6 Test Cram | Examinations FCP_GCS_AD-7.6 Actual Questions

Dear everyone, are you still confused about the FCP_GCS_AD-7.6 exam test. Do you still worry about where to find the best valid Fortinet FCP_GCS_AD-7.6 exam cram? Please do not search with aimless. LatestCram will drag you out from the difficulties. All the questions are edited based on lots of the data analysis by our IT experts, so the authority and validity of Fortinet FCP_GCS_AD-7.6 Practice Test are without any doubt. Besides, FCP_GCS_AD-7.6 training dumps cover almost the key points, which can ensure you pass the actual test with ease. Dear, do not hesitate anymore. Choose our LatestCram Fortinet exam training test, you can must success.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q21-Q26):

NEW QUESTION # 21

An organization has decided to deploy an active-active high-availability cluster in Google Cloud. Which three load balancing features are critical to the successful deployment of the cluster? (Choose three.)

- A. The L3_DEFAULT protocol in the forwarding rule of the internal passthrough network load balancer
- B. The forwarding rule for the internal passthrough network load balancer as the next hop for custom routes
- C. The session termination of the external passthrough network load balancer
- D. The health check used by the internal and the external passthrough network load balancer
- E. The symmetric hashing of the internal passthrough network load balancer

Answer: B,D,E

Explanation:

Health checks ensure load balancers route traffic only to healthy cluster members.

Forwarding rules act as next hops in routing, directing traffic appropriately within the HA cluster.

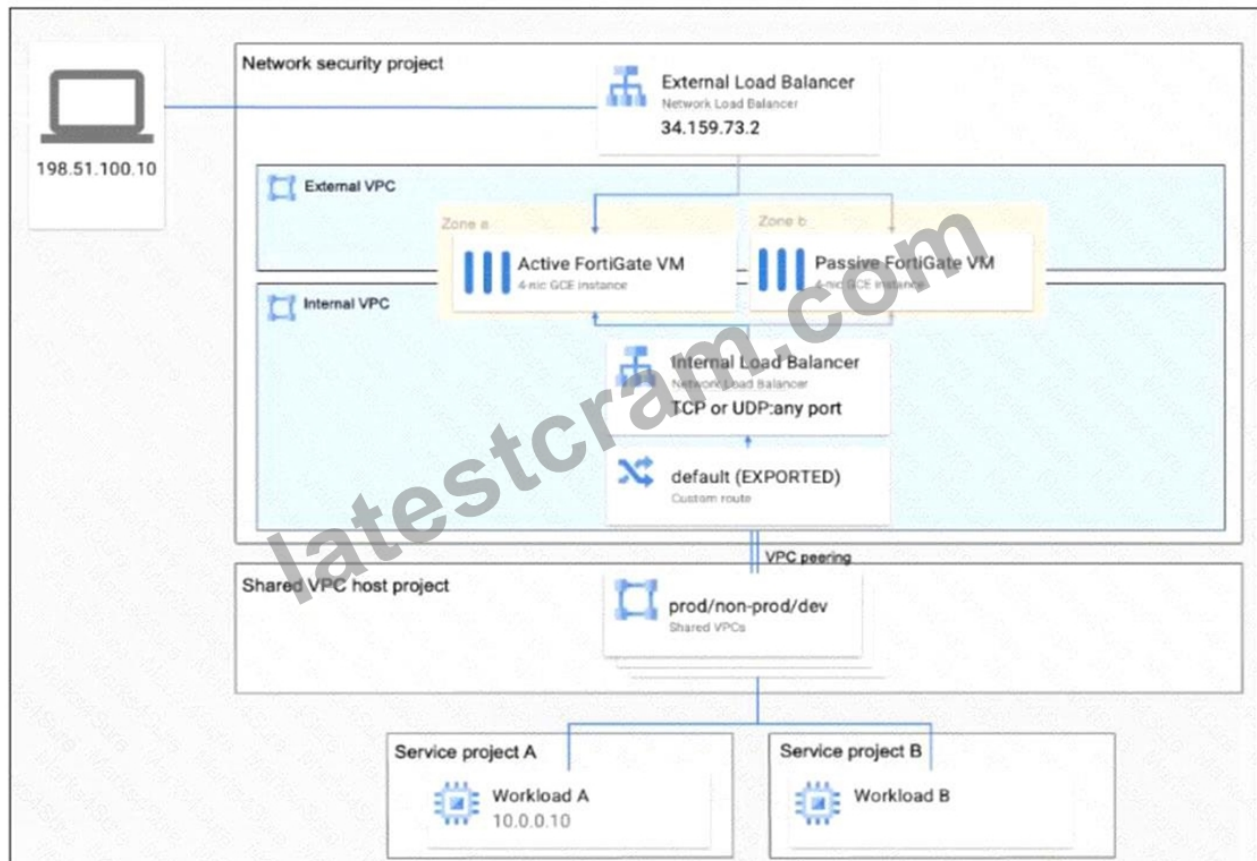

Symmetric hashing ensures consistent and balanced traffic distribution across cluster members, critical for active-active deployments.

NEW QUESTION # 22

Refer to the exhibit.

North-south traffic inspection

FORTINET

Which two types of traffic flow must the FortiGate cluster inspect, if the client at 198.51.100.10 sends traffic to the Workload A instance? (Choose two.)

- A. West-bound
- B. South-bound
- C. East-bound
- D. North-bound

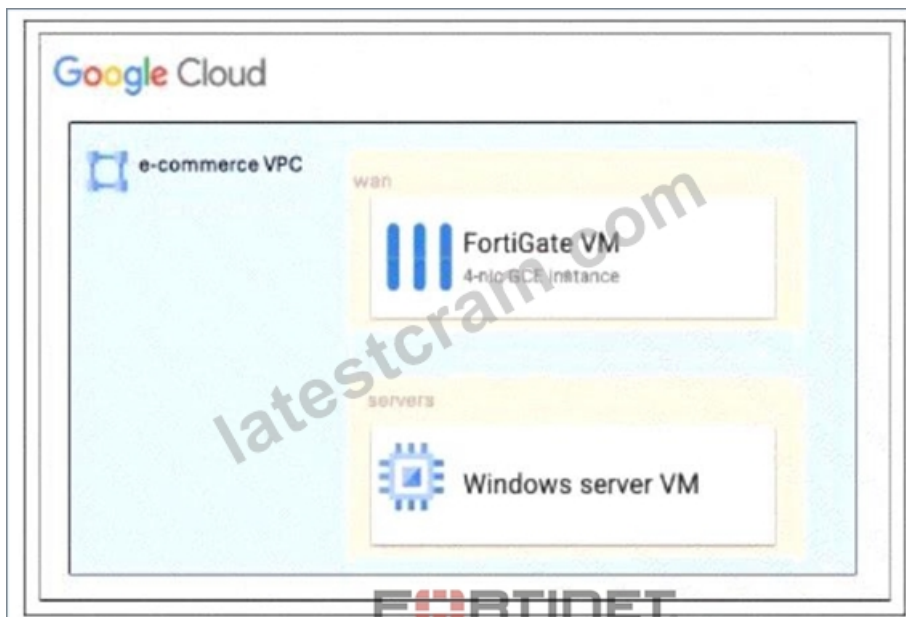

Answer: B,C

Explanation:

South-bound traffic refers to traffic coming from outside the network (the client 198.51.100.10) into the internal environment. East-bound traffic refers to traffic moving laterally within the internal network, such as between VPCs or workloads, which the FortiGate cluster can inspect for internal threats.

NEW QUESTION # 23

Refer to the exhibit.

An administrator is troubleshooting network connectivity issues between two VMs deployed in Google Cloud. One VM is a FortiGate located in the subnet "wan" that is part of the VPC "e-commerce". The other VM is a Windows server located in subnet "servers", which is also in the "e-commerce" VPC. What are two reasons you cannot ping the Windows server from FortiGate? (Choose two.)

- A. The default Google Cloud firewall policy does not allow this traffic.
- B. Add a Google Cloud firewall rule to allow ICMP traffic inbound to the Windows firewall VM.
- C. The Windows firewall is blocking the traffic.
- D. ICMP traffic is blocked between Google Cloud subnets by default.

Answer: B,C

Explanation:

Google Cloud firewall rules are stateful and, by default, do not allow ICMP traffic; you must explicitly allow ICMP inbound traffic to the Windows VM.

The Windows VM's own firewall might block ICMP traffic, preventing ping responses.

NEW QUESTION # 24

You have been tasked with destroying all resources relating to a recent active-active high-availability (HA) FGSP Terraform deployment in Google Cloud.

What steps do you have to take to ensure a successful deletion? (Choose two.)

- A. Delete all dependencies to resources relating to the Terraform template.
- B. Use the command `terraform destroy` to delete all resources deployed by the Terraform template.
- C. Delete all resources manually because active-active HA clusters cannot be destroyed using Terraform.
- D. Use the command `terraform plan` before destroying the Terraform template.

Answer: A,B

Explanation:

Removing dependencies prevents resource conflicts during deletion.

`terraform destroy` is the correct command to cleanly and completely remove all resources created by the Terraform deployment.

NEW QUESTION # 25

Google Cloud network services offer vast functionality and inter-connectivity between the cloud and on- premises networks.

Which three additional functions does FortiGate offer when deployed in Google Cloud to complement the native services offered by Google Cloud? (Choose three.)

- A. SSL inspection
- B. SSL VPN

- C. OSPF over IPSec
- **D. Secure SD-WAN with application visibility**
- E. Web filtering

Answer: A,B,D

Explanation:

FortiGate provides SSL VPN capabilities for secure remote access.

It offers SSL inspection to decrypt and inspect encrypted traffic for threats.

FortiGate supports Secure SD-WAN with deep application visibility and control, enhancing network performance and security beyond native Google Cloud services.

NEW QUESTION # 26

.....

Our company always lays great emphasis on offering customers more wide range of choice. Now, we have realized our promise. Our FCP_GCS_AD-7.6 exam guide almost covers all kinds of official test and popular certificate. So you will be able to find what you need easily on our website. Every FCP_GCS_AD-7.6 exam torrent is professional and accurate, which can greatly relieve your learning pressure. In the meantime, we have three versions of product packages for you. They are PDF version, windows software and online engine of the FCP_GCS_AD-7.6 Exam Prep. The three versions of the study materials packages are very popular and cost-efficient now. With the assistance of our study materials, you will escape from the pains of preparing the exam. Of course, you can purchase our FCP_GCS_AD-7.6 exam guide according to your own conditions. All in all, you have the right to choose freely. You will not be forced to buy the packages.
