Salesforce Certified Industries CPQ Developer Sample Questions (Q18-Q23):

NEW QUESTION # 18

Velocity Cart displays what five fields in the Line Item Cart pane?

Note: This question displayed answer options in random order when taking this Test.

- A. It is based on user selection.
- B. Quantity, Recurring Charge, One Time Total, Total Charges, Discount %
- C. Quantity, Recurring Charge, Recurring Total, One Time Charge, One Time Total

- D. it is based on fields defined in the cpq-cart-setup template.

Answer: C

NEW QUESTION # 19

When you adjust the price of a product for a promotion, you must run the maintenance jobs to update the product hierarchy and platform cache.

- A. False
- B. True

Answer: A

NEW QUESTION # 20

Which of these is required to ensure items are updated in the Guided Selling cart?

Note: This question displayed answer options in random order when taking this Test.

- A. vlcCart
- B. createCart
- C. getCartItems
- D. done
- E. getCartProducts
- F. putCartItems
- G. checkout
- H. postCartItems
- I. CpqAppHandler
- J. submit

Answer: F

Explanation:

In the context of Salesforce Industries CPQ's Guided Selling, ensuring items are updated in the cart typically involves interaction with the cart's API, particularly using methods like putCartItems. This API method is crucial for updating existing cart items with new or altered information as part of the guided selling process, enabling dynamic updates to the cart contents based on user selections or system-driven recommendations.

NEW QUESTION # 21

Context mappings can be configured from the context dimension or the context scope.

- A. True
- B. False

Answer: A

Explanation:

Context mappings in Salesforce Industries CPQ can indeed be configured either from the context dimension or the context scope. This dual configurability allows for a more versatile application of context settings, making it possible to adjust mappings based on the specific requirements of dimensions or scopes within the data model. This flexibility is essential for tailoring the system to meet complex business rules and scenarios.

NEW QUESTION # 22

Which three ways can a developer filter the list of products when using the getCartProducts method?

Choose 3 answers

Using a value that is constrained with a product attribute

- A. Using a context rule that qualifies a set of products

- B. Using a product category
- C. Using a value that is contained within a Product2 field
- D. Using a value that will be matched exactly to a value in a Products field

Answer: B,C,D

Explanation:

When using the getCardsProducts method in Salesforce Industries CPQ to filter the list of products, developers have multiple criteria they can apply: A. Using a value that is contained within a Product2 field:

This allows filtering based on specific Salesforce fields within the Product2 object, such as name, SKU, or custom fields that store product attributes. B. Using a value that will be matched exactly to a value in a Product field: Enables precise filtering based on exact matches in product fields, ensuring that only products that meet the exact criteria are included. D. Using a product category: This method allows for filtering based on the category assigned to products, making it easier to group and display products that fall into specific, predefined categories, such as electronics, apparel, etc.

These filters help in efficiently narrowing down product lists based on specific attributes or classifications, enhancing the user experience by displaying relevant products to the customers.

NEW QUESTION # 23

.....

All these Industries-CPQ-Developer certification exam benefits will not only prove your skills but also assist you to put your career on the right track and achieve your career objectives in a short time period. These are all the advantages of the Salesforce Certified Industries CPQ Developer (Industries-CPQ-Developer) certification exam.
