Exam

By these three versions we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version, you can learn anywhere at any time with it at your cellphones without the limits of installation. As long as you are willing to exercise on a regular basis, the exam will be a piece of cake, because what our ISTQB-CTAL-TA practice materials include are quintessential points about the exam.

To take the ISTQB ISTQB-CTAL-TA Exam, candidates must first pass the ISTQB Certified Tester Foundation Level (CTFL) exam. This means that candidates who wish to take the advanced level exam must have a solid foundation in software testing principles and techniques. The CTAL-TA exam is designed to build upon this foundation and test the candidate's ability to apply advanced testing techniques to real-world scenarios.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q78-Q83):

NEW QUESTION # 78

The following document has been produced as part of the replacement of an internal Customer Relationship Management (CRM) application. The replacement application should not differ from the current CRM application, and the documentation reflects this aspiration, with seven specific requirements listed.

The requirements will be reviewed using a standard checklist:

- a. Requirements should be testable
- b. Each requirement should be consistent with other requirements
- c. Each requirement should be unambiguous
- d. Each requirement should have a unique identifier
- e. Documents should be versioned, dated, and the author specified

Which checklist items would identify issues in this requirements document?

SELECT ONE OPTION

- A. d, e
- B. a, c
- C. b, e
- **D. b, d**

Answer: D

Explanation:

Comprehensive and Detailed in Depth Explanation:

* Requirement Testability (a): The requirements are testable as they specify expected behavior, such as response time (4 seconds) and SSO control.

* Consistency (b): There is inconsistency, as one requirement states no changes to screens, but another mentions a new data item for FCA registration.

* Ambiguity (c): The requirements are clear in terms of what they specify.

* Unique Identification (d): The requirements are listed as bullet points without unique identifiers, violating this criterion.

* Versioning and Author (e): The document includes a version number, date, and author.

Therefore, the correct answer is D (b, d).

NEW QUESTION # 79

Which ONE of the following test tools would MOST likely be used as part of test design?

SELECT ONE OPTION

- A. Dynamic analysis tools
- **B. Classification tree tools**
- C. Coverage tools
- D. Comparison tools

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

- * Classification tree tools are specifically used during the test design phase to visualize combinations of input data and generate test cases.
 - * Coverage tools (A) are used during test execution to measure how much of the code has been tested.
 - * Dynamic analysis tools (B) are used to find runtime issues, not during test design.
 - * Comparison tools (D) are used to compare expected and actual outputs during test execution.
- Therefore, the correct answer is C (Classification tree tools).

NEW QUESTION # 80

Which task is considered the responsibility of the Test Analyst and ONLY performed as part of the test implementation activities?
SELECT ONE OPTION

- A. Creating a test execution schedule, including resource allocation
- **B. Identifying test data to support test conditions and test cases**
- C. Designing the test environment and identifying any required infrastructure, including tools
- D. Capturing bi-directional traceability between the test basis, test conditions, and test cases

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

- * During test implementation, the Test Analyst's primary task is to identify and prepare test data that supports the execution of test cases and conditions.
 - * B. Creating a test execution schedule is part of test planning, not implementation.
 - * C. Capturing bi-directional traceability typically occurs during test design and management activities, not exclusively during implementation.
 - * D. Designing the test environment is typically a Technical Test Analyst responsibility, as it involves infrastructure and tool setups.
- The correct answer is A (Identifying test data to support test conditions and test cases).

NEW QUESTION # 81

Rather than developing an e-commerce product, management has decided to acquire a COTS package. The e-commerce product needs to interface with backend applications such as finance, stock control and order delivery. You are asked to define a test plan for this project. Given just the information in the scenario, which of the following software quality characteristics must be included in your test plan?

- **A. Interoperability**
- B. Maintainability
- C. Portability
- D. Reliability

Answer: A

Explanation:

The software quality characteristic that must be included in the test plan for this project is interoperability.

Interoperability is a software quality characteristic that evaluates the degree to which two or more systems or components can exchange information and use the information that has been exchanged. This characteristic is relevant for a project that involves acquiring a COTS package that needs to interface with backend applications such as finance, stock control, and order delivery.

NEW QUESTION # 82

Consider the following decision table:

	1	2	3	4	5	6	7	8
C1	1	1	1	1	0	0	0	0
C2	1	1	0	0	1	1	0	0
C3	1	0	1	0	1	0	1	0
A1	X	X						
A2	X							

This decision table has been created to test the following specification: Persons that study at a university (C1) and have parents whose total annual income is less than € 30.000 (C2), receive a scholarship. In addition to these qualifications, if they also live away from home (C3), they receive an addition to their scholarship (A2). How many cases are left when this decision table is collapsed?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

Two cases are left when this decision table is collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is collapsed eliminates the combinations that are invalid or impossible, such as having a scholarship without meeting the qualifications.

The two valid cases for this scenario are:

* C1 = Y, C2 = Y, C3 = Y, A1 = Y, A2 = Y

* C1 = Y, C2 = Y, C3 = N, A1 = Y, A2 = N
