Microsoft MB-820 practice test software contains many Microsoft MB-820 practice exam designs just like the real Microsoft Dynamics 365 Business Central Developer (MB-820) exam. These MB-820 practice exams contain all the MB-820 questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final MB-820 Exam. We update our Microsoft MB-820 exam questions bank regularly to match the changes and improve the quality of MB-820 questions so you can get a better experience.

Our MB-820 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate Microsoft Dynamics 365 Business Central Developer exam torrent to the client and the questions and the answers we provide are based on the real exam. But you buy our MB-820 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Microsoft Dynamics 365 Business Central Developer exam torrent. Our answers and questions are compiled elaborately and easy to be mastered. Because our MB-820 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

MB-820 Latest Exam Question & MB-820 Test Lab Questions

Certificate is not only an affirmation for the professional ability, but also can improve your competitive force in the job market. MB-820 training materials will help you pass the exam just one time. MB-820 exam materials are high quality and accuracy, due to we have a professional team to collect the latest information for the exam. We are pass guarantee and money back guarantee if you fail to pass the exam, and the money will be returned to your payment account. MB-820 Exam Dumps have free update for one year, that is to say, in the following year, you can get the latest version for free.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q20-Q25):

NEW QUESTION # 20
You are writing a procedure to block all inventory items with numbers that do not start with the letter S.
You need to complete the procedure.
How should you complete the code expressions? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 21

A company is implementing Business Central.

In the per-tenant extension, TableA Header and TableA Line are document tables, and TableB Header and TableB Line are document history tables.

The company requires that the resulting dataset of query objects contain the following records:

* All records from TableA Header even if no matching record value exists in the linked TableA Line

* Records from TableB Header where a match is found in the linked TableB Line field You need to configure the linked data item to generate the required dataset.

Which SqlJoinType should you use? To answer, move the appropriate SqUoinTypes to the correct dataset requirements. You may use each SqlJoinType once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

SqlJoinTypes	Link data items					Dataset requirement		SqlJoinType
CrossJoin						Include all records from TableA Header.		
InnerJoin						Include only matched records from TableB Header.		
LeftOuterJoin								
RightOuterJoin								

Answer:

Explanation:

SqlJoinTypes	Link data items					Dataset requirement		SqlJoinType
CrossJoin						Include all records from TableA Header.		LeftOuterJoin
InnerJoin						Include only matched records from TableB Header.		InnerJoin
LeftOuterJoin								
RightOuterJoin								

NEW QUESTION # 22

You need to improve performance when ticketAPI is used to analyze the POS data. What should you do?

- A. Set the DataAccessIntent property to Readonly on the ticketAPI API page.
- B. Set the ODataReadonlyGetEnabled parameter to True in the Business Central admin center.
- C. Enable read scale-out on the Business Central database.
- D. Set the AceesByPermission property to Read on the ticketAPI API page.

Answer: C

Explanation:
* Read Scale-Out:
* Read scale-out is a feature in Business Central that allows you to improve performance by distributing read-only queries (such as the ones from the ticketAPI) across multiple read replicas in the cloud database. This reduces the load on the primary database and helps improve the response time for read-intensive operations, like analyzing POS data through the ticketAPI.
* Data Access Intent - ReadOnly:
* When enabling read scale-out, you can configure the DataAccessIntent property of APIs to be ReadOnly. This directs the system to use read replicas to handle read-only queries, which enhances performance by offloading such queries from the primary database.
* Why Not Other Options?
* Option A (ODataReadonlyGetEnabled): This parameter is unrelated to read scale-out and primarily affects OData services behavior, not API performance tuning.
* Option B (AccessByPermission): Setting the permission to Read does not directly affect the performance. It only controls access based on user permissions.
* Option D (DataAccessIntent ReadOnly): While setting this property to ReadOnly helps in read- only operations, enabling read scale-out (option C) ensures the underlying infrastructure is optimized to handle such read operations, which is the fundamental action required.
Reference Documentation:
* Read Scale-Out in Business Central
* Data Access Intent in AL

NEW QUESTION # 23

You need to create the Install codeunit that is required in the extension used for installing or updating the Housekeeping app.
Which data type or declaration should you use? To answer, select the appropriate options in the answer area.
NOTE; Each correct selection is worth one point.

Data types or declarations for an Install codeunit

Requirement	Data type or declaration
Data type for information	ModuleDependencyInfo ModuleInfo SessionInformation
Start of the declaration of the method or procedure to perform the tasks	global procedure local procedure procedure

Answer:

Explanation:

Data types or declarations for an Install codeunit

Requirement	Data type or declaration
Data type for information	ModuleDependencyInfo ModuleInfo SessionInformation
Start of the declaration of the method or procedure to perform the tasks	global procedure local procedure procedure

Explanation:
For the Install codeunit required for the extension used for installing or updating the Housekeeping app, you should use the following data type and declaration:
* Data type for information: ModuleInfo
* Start of the declaration of the method or procedure to perform the tasks: local procedure In AL language, which is used for developing extensions in Business Central, an Install codeunit is a special type of codeunit that is used to handle installation or upgrade logic for an extension.
* ModuleInfo is a data type that contains information about the current extension, such as its version. It is typically used within the OnInstallAppPerCompany or OnUpgradePerCompany triggers of an Install codeunit to determine if the app is being installed for the first time or upgraded.
* A local procedure within an Install codeunit is a method that is only accessible within the codeunit itself. It is not visible to other objects or extensions. This is suitable for tasks that are internal to the installation process and should not be exposed globally.
These selections align with the requirements of handling installation and update procedures in a controlled and encapsulated manner within Business Central extensions.

Topic 1, Case Study Alpine Ski House
Alpine Ski House is a company that owns and operates hotels, restaurants, and stores. Currently, the company uses the following software and interlace:
* Property management software (PMS) to manage hotel rooms
* On-premises accounting software to generate sales invoices and create purchase orders
* An API that allows restaurants and stores to obtain necessary information Restaurants and stores use standalone software for point of sale (POS) devices. Each day, the POS terminals generate a text file of sales data and save the files in a serval folder. An account assistant must manually import the files to the current software tables to be processed by the system.
The general manager receives several reports monthly from department managers. The reports take too much time to prepare.
The company is moving from a different system to Business Central online to manage the whole company.
The company plans to increase efficiency in every department by using APIs to obtain or share information between the different systems.
Each department involved in purchasing must be able to make purchase requests automatically and easily.
The departments do not need access to the full ERP management system.
Alpine Ski House requires the development of several extensions for the planned improvements. Business Central design patterns must be used to develop all extensions.
Alpine Ski House must develop the following pages:
* Pages that provide multiple configurations in a multistep dialog, like a wizard, to provide required information when the extensions are first installed

* Department-specific Role Center pages to show relevant information and pages with additional information The IT department plans to use Power 61 to analyze departmental information. The database must be configured to provide optimal performance.

The housekeeping department requires the following to increase efficiency and help avoid data entry errors:

* A Housekeeping Role Center to minimize navigation to relevant areas In Business Central online and to show relevant information in it
* Pages to embed into a new Room page to show additional information about the Room entity
* A table named Room Incident for the housekeeping team to enter room issue information
* A Housekeeping canvas app that connects to an extension

The department requires the development of an extension with a new API page named RoomsAPI.

* The housekeeping team will use RoomsAPI to publish room details, update when work is complete, or provide repair notifications from the canvas app.
* This custom API page must expose a custom table named Rooms and have an ID 50000. The table must be able to update from the PMS. The PMS team must know the end to connect to the custom API.
* A developer provides the following details for the API page:

APIPublisher = 'alpine';

APIGroup - 'integration';

APIVersion - 'v2.6';

fntityName # 'room';

EntitySetName = 'rooms';

* The extension must be published in Business Central online and include a list page named Room List that includes all hotel rooms.
* Installation or updates to this extension must meet the following requirements:

o Some web services must be published automatically.

o The version of the specified application's metadata must be obtained in AL language.

o The code required to perform tasks cannot be accessible from other parts of the application.

The Room Incident table information must include the following fields:

* Incident entry: An incremental number
* Room No.: A room from the Room table
* Incident Date: The work date

o The table definition in the Room Incident table must autofill the Incident Date when the housekeeping team inserts a new record, o The value for Incident Date must be the work date configured in the Business Central online client.

* Status: Includes the following options lo identify the status of the incident:

o Open: When the Room Incident is created

o In Progress: When someone starts repair work

o Closed: When the incident is solved

* Incident Closing Date: Auto-updating field (when the status passes to Closed, the field will update with the work date)
* Incident Description: Text
* Image. Media data type

o The stored picture must be downloadable from a menu action.

o A Room Incident page must be developed to contain the download action.

To increase efficiency, the new system must manage the generated data from the restaurants and stores directly by using the API on the POS terminals.

* The company requires a code unit called from a job queue to read the information from the POS terminal APIs.
* The POS terminal information must be stored in a table named POS Information, have an ID 50100. and be editable on a page.
* The account manager requires an option on the menu of the page to run the process manually.

To analyze the information received from the POS terminals, the company requires:

* A custom API named ticketAPI to export the information to Power BI
* Use of the Read Scale-Out feature to improve database performance

The purchasing department requites a new entity in Business Central online to log non-conformities of goods received from vendors. The entity must be set up as follows:

* The non-conformity entity must have two tables:

o a header with common information

o one or more lines with the detailed received items that are non-conforming

* The entity requires a page named Non-conformity and a subpage named Non-Conformity Lines to store the information.

When a purchase order with incorrect quantity 01 quality issues is received, the entity must create a non- conformity document in the system. The following information must be nick the document:

* Non-conformity Number: must use the No. Series table from Business Central online to manage this field and use these features:

o Alphanumeric values

o Number format that includes "NO and the year as part of the number: for example, NC24-001

* Non-conformity Date: stores only the creation date
* Vendor No.: stores the number of the vendor that sent the items; only vendors from the company must be included
* Owner: code of an employee defined in the company

* Receipt No.: must meet the following conditions:
o Be an existing receipt No.
o Be received from the vendor indicated in the Vendor No. field
* Comments: can include comments with rich text and pictures to illustrate quality problems
* Status: includes nonconformity statuses, such as:
o Open
o Notified
o Closed
* Lines must contain the following details:
o Item No.: item received (for existing inventory items only)
o Description: item description
0 Quantity: non-conforming quantity
0 Non-conformity Type:
Quality
Quantity
Delivery date
The serial numbers of the non-conformities and the period in which they can be created must be in a configuration table and its corresponding page to allow them to be modified for the users.

NEW QUESTION # 24
You develop a table named Contoso Setup and a page.
You plan to use No. Series to automatically assign a unique number to data entries. You set up No. Series on the Vendor Nos. field of the Contoso Setup table.
You need to apply the No. Series Design Pattern to the trigger OnInsert().
Which four code segments should you use to develop the solution? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Code Blocks	Trigger design pattern
`if "No." <> '' then begin`	
`NoSeriesManagement.InitSeries(ContosoSetup."No. Series", xRec."Vendor Nos.", 0D, "No.", "No. Series");` `end;`	
`ContosoSetup.SetRange(ContosoSetup."Vendor Nos.", xRec."No. Series");`	
`if "No." = '' then begin`	
`ContosoSetup.TestField("Vendor Nos.");`	
`NoSeriesManagement.InitSeries(ContosoSetup."Vendor Nos.", xRec."No. Series", 0D, "No.", "No. Series");` `end;`	
`ContosoSetup.Get();`	

Answer:

Explanation:

Code Blocks

```
if "No." <> '' then begin

NoSeriesManagement.InitSeries(ContosoSetup."No. Series",
xRec."Vendor Nos.", 0D, "No.", "No. Series");
end;

ContosoSetup.SetRange(ContosoSetup."Vendor Nos.", xRec."No.
Series");

if "No." = '' then begin

ContosoSetup.TestField("Vendor Nos.");

NoSeriesManagement.InitSeries(ContosoSetup."Vendor Nos.",
xRec."No. Series", 0D, "No.", "No. Series");
end;

ContosoSetup.Get();
```

Trigger design pattern

```
ContosoSetup.Get();

if "No." <> '' then begin

NoSeriesManagement.InitSeries(ContosoSetup."No. Series",
xRec."Vendor Nos.", 0D, "No.", "No. Series");
end;

ContosoSetup.TestField("Vendor Nos.");
```

NEW QUESTION # 25

......

The MB-820 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. And unlike other teaching platform, the Microsoft Dynamics 365 Business Central Developer study question is outlined the main content of the calendar year examination questions didn't show in front of the user in the form of a long time, but as far as possible with extremely concise prominent text of MB-820 Test Guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously.

MB-820 Latest Exam Question: https://www.vce4dumps.com/MB-820-valid-torrent.html

Also we make out the software version of MB-820 exam prep so that you can simulate the real MB-820 exam scene and practice more times, Microsoft Exam MB-820 Papers I believe everyone has much thing to do every day, Now, please select our MB-820 valid training vce as your study reference, Microsoft Exam MB-820 Papers In fact, we get used to investigate the real test every year.

Accidental or intentional access to resources, MB-820 Just take the best decision of your professional career and get registered in the Microsoft MB-820 certification exam and start this journey with VCE4Dumps MB-820 Exam PDF dumps and practice test software.

Perfect Microsoft Exam MB-820 Papers Are Leading Materials & Trusted MB-820 Latest Exam Question

Also we make out the software version of MB-820 exam prep so that you can simulate the real MB-820 exam scene and practice more times, I believe everyone has much thing to do every day.

Now, please select our MB-820 valid training vce as your study reference, In fact, we get used to investigate the real test every year, Some people only spend time on envying others' luxurious life every day.
