## Microsoft 365 Fundamentals Sample Questions (Q148-Q153):

### NEW QUESTION # 148

A company plans to deploy Microsoft Intune.

Which scenarios can you implement by using Intune? To answer, select the appropriate answer for the given scenarios.

NOTE: Each correct selection is worth one point.

| Scenario                                                                                             | Yes                   | No                    |
|------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Intune app protection policies can protect access to Exchange Server on-premises mailboxes.          | <input type="radio"/> | <input type="radio"/> |
| Intune app protection policies support apps that connect to on-premises Microsoft SharePoint Server. | <input type="radio"/> | <input type="radio"/> |
| Intune app protection policies require a mobile-device management (MDM) solution.                    | <input type="radio"/> | <input type="radio"/> |

**Answer:**

Explanation:

| Scenario                                                                                             | Yes                              | No                               |
|------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Intune app protection policies can protect access to Exchange Server on-premises mailboxes.          | <input checked="" type="radio"/> | <input type="radio"/>            |
| Intune app protection policies support apps that connect to on-premises Microsoft SharePoint Server. | <input type="radio"/>            | <input checked="" type="radio"/> |
| Intune app protection policies require a mobile-device management (MDM) solution.                    | <input type="radio"/>            | <input checked="" type="radio"/> |

### NEW QUESTION # 149

A company plans to implement Microsoft 365 Apps.

The company has the following productivity requirements:

\* Provide feedback on a presenter's body language.

\* Provide recommendations on spelling and grammar

You need to recommend the Microsoft 365 feature for each requirement

Which features should you recommend? To answer, drag the appropriate features to the correct requirements.

Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Features                                          | Requirement                              | Feature              |
|---------------------------------------------------|------------------------------------------|----------------------|
| <input type="text" value="Speaker Coach"/>        | Feedback on presenter's body language.   | <input type="text"/> |
| <input type="text" value="Microsoft Editor"/>     | Recommendations on spelling and grammar. | <input type="text"/> |
| <input type="text" value="Microsoft Researcher"/> |                                          |                      |
| <input type="text" value="PowerPoint Designer"/>  |                                          |                      |

**Answer:**

Explanation:

| Features             | Requirement                              | Feature          |
|----------------------|------------------------------------------|------------------|
| Speaker Coach        | Feedback on presenter's body language.   | Speaker Coach    |
| Microsoft Editor     | Recommendations on spelling and grammar. | Microsoft Editor |
| Microsoft Researcher |                                          |                  |
| PowerPoint Designer  |                                          |                  |

  

| Features             | Requirement                              | Feature          |
|----------------------|------------------------------------------|------------------|
| Speaker Coach        | Feedback on presenter's body language.   | Speaker Coach    |
| Microsoft Editor     | Recommendations on spelling and grammar. | Microsoft Editor |
| Microsoft Researcher |                                          |                  |
| PowerPoint Designer  |                                          |                  |

### NEW QUESTION # 150

You add a comment to a Word document that includes the @ sign and a user's name.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                                                                                                        | Yes                   | No                    |
|-------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| The email notification that the user receives displays a preview of the document text and the associated comment. | <input type="radio"/> | <input type="radio"/> |
| When the user clicks the link in the email, the document opens to the comment in the file.                        | <input type="radio"/> | <input type="radio"/> |
| The user can respond to the comment in the document directly from the email.                                      | <input type="radio"/> | <input type="radio"/> |

**Answer:**

**Explanation:**

| Statements                                                                                                        | Yes                              | No                    |
|-------------------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| The email notification that the user receives displays a preview of the document text and the associated comment. | <input checked="" type="radio"/> | <input type="radio"/> |
| When the user clicks the link in the email, the document opens to the comment in the file.                        | <input checked="" type="radio"/> | <input type="radio"/> |
| The user can respond to the comment in the document directly from the email.                                      | <input checked="" type="radio"/> | <input type="radio"/> |

### NEW QUESTION # 151

A company plans to use Microsoft 365. The company needs to determine licensing costs.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                                                                                    | Yes                      | No                       |
|-----------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| A Microsoft Cloud Solution Provider can be used to get Microsoft 365 plan licensing costs.    | <input type="checkbox"/> | <input type="checkbox"/> |
| The Microsoft Azure Pricing calculator can be used to get Microsoft 365 plan licensing costs. | <input type="checkbox"/> | <input type="checkbox"/> |

Answer:

Explanation:

| Statements                                                                                    | Yes                                 | No                                  |
|-----------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|
| A Microsoft Cloud Solution Provider can be used to get Microsoft 365 plan licensing costs.    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| The Microsoft Azure Pricing calculator can be used to get Microsoft 365 plan licensing costs. | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

| Statements                                                                                    | Yes                                 | No                                  |
|-----------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|
| A Microsoft Cloud Solution Provider can be used to get Microsoft 365 plan licensing costs.    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| The Microsoft Azure Pricing calculator can be used to get Microsoft 365 plan licensing costs. | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

### NEW QUESTION # 152

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                                                                                                   | Yes                   | No                    |
|--------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Sensitivity labels can be applied automatically and can also prompt users to apply a recommended label.      | <input type="radio"/> | <input type="radio"/> |
| Sensitivity labels can be used to restrict the sharing of information on SharePoint sites to external users. | <input type="radio"/> | <input type="radio"/> |
| Sensitivity labels can be used to manage conditional access policies for unmanaged devices.                  | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

| Statements                                                                                                   | Yes                              | No                               |
|--------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Sensitivity labels can be applied automatically and can also prompt users to apply a recommended label.      | <input checked="" type="radio"/> | <input type="radio"/>            |
| Sensitivity labels can be used to restrict the sharing of information on SharePoint sites to external users. | <input checked="" type="radio"/> | <input type="radio"/>            |
| Sensitivity labels can be used to manage conditional access policies for unmanaged devices.                  | <input type="radio"/>            | <input checked="" type="radio"/> |

| Statements                                                                                                   | Yes                              | No                               |
|--------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Sensitivity labels can be applied automatically and can also prompt users to apply a recommended label.      | <input checked="" type="radio"/> | <input type="radio"/>            |
| Sensitivity labels can be used to restrict the sharing of information on SharePoint sites to external users. | <input type="radio"/>            | <input checked="" type="radio"/> |
| Sensitivity labels can be used to manage conditional access policies for unmanaged devices.                  | <input checked="" type="radio"/> | <input type="radio"/>            |
