

Exam NCP-CN Simulator Free & NCP-CN Valid Test Syllabus

Practicing under these situations helps to kill Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) exam anxiety. Questions in desktop-based mock exams are identical to the real ones. Our practice exams give you options to change their durations and questions' numbers to polish your skills. You can easily assess your readiness with the assistance of results produced by the practice exam.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.
Topic 2	• Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.
Topic 3	• Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.
Topic 4	• Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.

Nutanix NCP-CN Valid Test Syllabus & NCP-CN Latest Exam Pattern

Our after sales services are also considerate. If you get any questions with our NCP-CN guide question, all helps are available upon request. Once you place your order this time, you will enjoy and experience comfortable and convenient services immediately. Besides, we do not break promise that once you fail the NCP-CN Exam, we will make up to you and relieve you of any loss. Providing with related documents, and we will give your money back. We have been always trying to figure out how to provide warranty service if customers have questions with our NCP-CN real materials.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q84-Q89):

NEW QUESTION # 84

A development Kubernetes cluster deployed with NKP is having performance issues. The Cloud Engineer commented that worker VMs are consuming a lot of CPU and RAM. The Platform Engineer took a look at the CPU and RAM statistics with Grafana and confirmed that the worker VMs are running out of CPU and memory. The Kubernetes cluster has 4 workers with 8 vCPUs and 32 GB RAM. What could the Platform Engineer do?

- A. Ask developers to lower the number of application replicas.
- **B. Add one more worker with `nkp scale nodepools ${NODEPOOL_NAME} --replicas=5 --cluster-name=${CLUSTER_NAME} -n ${CLUSTER_WORKSPACE}`**
- C. Call tech support to take a look at the infrastructure and investigate.
- D. Add more CPU and memory to workers with `nkp scale --cpu 16 --memory 64 --cluster-name ${CLUSTER_NAME}`

Answer: B

NEW QUESTION # 85

A Cloud Engineer would like to configure an NKP cluster that is running in the cloud to dynamically expand and compact its resource capacity for running container workloads. This will help ensure efficient use of resources without impacting online retail transaction performance that is increasingly hitting unpredictable spikes and lulls. Which autoscaling method does NKP use and how does it scale?

- A. Horizontal-Pod autoscaler and worker node replicas
- B. Horizontal-Pod autoscaler and worker node CPU/memory sizing
- C. Cluster autoscaler and worker node CPU/memory sizing
- **D. Cluster autoscaler and worker node replicas**

Answer: D

NEW QUESTION # 86

A corporate IT team provides Kubernetes clusters for three groups within the company:

Fin VD

Fin Insurance

Fin TravelThe IT group needs to federate policy for all Kubernetes clusters from a single pane of glass, but separate the Kubernetes clusters according to the group that uses them. How should the IT team license and configure their NKP environment to satisfy these requirements?

- A. NKP Pro for project management, creating three projects and assigning the corresponding Kubernetes cluster to each project.
- **B. NKP Ultimate for fleet management, creating three workspaces and assigning the corresponding Kubernetes cluster to each workspace.**
- C. NKP Starter for Kubernetes management, creating Kubernetes clusters for every company.
- D. NKP Pro for workspace management, creating three workspaces and assigning the corresponding Kubernetes cluster to each workspace.

Answer: B

NEW QUESTION # 87

In a telecom company, two teams were working on the development of two different applications:

ApplicationA

ApplicationB ApplicationA's development team was excited about the release of their new functionality. However, upon deploying their application, they noticed that performance was slow. After investigating, they discovered that the ApplicationB team was consuming the majority of the cluster's resources, affecting all other teams. How can this problem be mitigated?

- A. Implementing Quotas and Limit Ranges
- B. Setting up Network Policies
- C. Implementing Continuous Deployment (CD)
- D. Configuring RBAC

Answer: A

NEW QUESTION # 88

A Platform Engineer is deploying a new NKP cluster that has internet connectivity. Now, a Cloud Administrator and Security Administrator are discussing the security of communications between the NKP Kubernetes cluster and the container registry. The engineer proposes to have an on-prem private registry.

What is the most significant reason that the engineer should create a private registry instead of configuring a secure connection between the NKP cluster and Github (SaaS)?

- A. Private registry provides security and privacy.
- B. NKP cannot connect to public clouds.
- C. NKP requires specific registry versions.
- D. Private registry license is included with NKP.

Answer: A

NEW QUESTION # 89

.....

We provide you with high-quality NCP-CN learning materials for you, since the experienced experts compile and verify NCP-CN learning materials, therefore the quality and the correctness can be guaranteed. By using NCP-CN exam dumps of us, you will get a certificate successfully, hence you can enter a good enterprise and your salary will also be improved. At the same time, if you choose NCP-CN Learning Materials of us, we have complete online and offline service stuff and after-service, and you can consult us anytime.
