

# Exam NCP-MCI-6.10 Tests - Valid Exam NCP-MCI-6.10 Preparation

NCP-MCI Multicloud Infrastructure Certification Details	
Exam Code	NCP-MCI
Full Exam Name	Nutanix Certified Professional - Multicloud Infrastructure
No. of Questions	75
Online Practice Exam	<a href="#">Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) Practice Test</a>
Sample Questions	<a href="#">Nutanix NCP-MCI Sample Questions</a>
Passing Score	3000/1000-6000
Time Limit	120 minutes
Exam Fees	\$199 USD

Become successful with VMEexam.com

BONUS!!! Download part of Fast2test NCP-MCI-6.10 dumps for free: [https://drive.google.com/open?id=1mELPjaBS\\_dh5FBsUUuaetx2m0xU67ugs](https://drive.google.com/open?id=1mELPjaBS_dh5FBsUUuaetx2m0xU67ugs)

Our specialists check whether the contents of NCP-MCI-6.10 real exam are updated every day. If there are newer versions, they will be sent to users in time to ensure that users can enjoy the latest resources in the first time. In such a way, our NCP-MCI-6.10 Guide materials can have such a fast update rate that is taking into account the needs of users. And we will always send our customers with the latest and accurate NCP-MCI-6.10 exam questions.

NCP-MCI-6.10 Exam is a Nutanix certification exam and IT professionals who have passed some Nutanix certification exams are popular in IT industry. So more and more people participate in NCP-MCI-6.10 certification exam, but NCP-MCI-6.10 certification exam is not very simple. If you do not have participated in a professional specialized training course, you need to spend a lot of time and effort to prepare for the exam. But now Fast2test can help you save a lot of your precious time and energy.

## Nutanix NCP-MCI-6.10 Pdf Format Practice Program

The Fast2test product here is better, cheaper, higher quality and unlimited for all time; kiss the days of purchasing multiple Nutanix braindumps repeatedly, or renewing NCP-MCI-6.10 training courses because you ran out of time. Now you can learn NCP-MCI-6.10 skills and theory at your own pace and anywhere you want with top of the NCP-MCI-6.10 braindumps, you will find it's just like a piece of cake to pass NCP-MCI-6.10 exam.

## Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q139-Q144):

### NEW QUESTION # 139

A consultant is configuring syslog monitoring and wants to receive CRITICAL logs from the Audit module. Which severity level setting should be configured to get the desired output?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

Syslog severity levels follow a standard numerical system, where lower numbers indicate higher severity.

Option B (Severity Level 2) is correct:

Level 2 = CRITICAL # Used for serious conditions requiring immediate attention.

Audit logs often generate Critical logs related to security, access violations, or major failures.

A screenshot of a computer Description automatically generated

Syslog Severity Level	Meaning
0	Emergency (System is unusable)
1	Alert (Action must be taken immediately)
2	Critical (Severe conditions, failures, or security issues)
3	Error (General errors, software failures)
4	Warning (Potential issues)
5	Notice (Normal but significant events)
6	Informational (General system messages)
7	Debug (Detailed debugging information)

Options A (0), C (5), and D (7) are incorrect:

0 = Emergency (Too severe, only used for full system failures).

5 = Notice (Not critical, used for general system events).

7 = Debug (Not relevant for critical logs).

#### NEW QUESTION # 140

An administrator wants to enable application discovery on a Nutanix cluster to monitor applications. A Prism Central instance is already configured with sufficient CPU and memory.

What other prerequisites must be met before enabling application discovery? (Choose two.)

- A. Sufficient Prism Central VM resources
- B. Network controller is enabled
- C. API key and key ID
- D. Internet connection

Answer: A,D

#### NEW QUESTION # 141

How can a VM or Volume Group (VG) be associated with a Storage Policy?

- A. Assign the Storage Policy directly on the VM or VG.
- B. Assign the VM or VG directly to the Storage Policy.
- C. Assign the VM or VG to the same Category as the Storage Policy.
- D. Migrate the VM or VG to the Storage Container assigned to the Storage Policy.

Answer: C

Explanation:

Storage Policies in Nutanix are applied through Categories, allowing policy-based automation and enforcement.

\* Option D (Assign the VM or VG to the same Category as the Storage Policy) is correct:

\* Nutanix applies Storage Policies based on VM Categories, enabling flexibility in policy enforcement.

\* Option A is incorrect:

\* Storage Policies are not directly assigned at the VM or VG level—they apply through Categories.

\* Option B is incorrect:

\* Policies must be assigned to Categories, not directly to individual VMs/VGs.

\* Option C is incorrect:

\* Migrating to a storage container does not automatically apply a Storage Policy.

### NEW QUESTION # 142

A company is evaluating Nutanix Disaster Recovery (DR) to protect multiple business-critical applications. Some applications are built using a 3-tier architecture and have interdependencies. After failover, the VM's static IP address is retained, but DNS configuration is lost. How should an administrator proceed to resolve this issue?

- A. Configure a Protection Domain.
- B. Configure Self-Service Restore.
- C. Install Network Manager command-line tool (nncli) in the protected Windows VMs.
- **D. Create custom in-guest scripts to preserve the statically assigned DNS IP addresses.**

**Answer: D**

Explanation:

During failover in Nutanix Disaster Recovery, VMs retain their static IPs but may lose DNS settings if the network configuration at the DR site is different from the primary site.

- \* Option B (Create custom in-guest scripts) is correct:
- \* Custom scripts allow Windows or Linux VMs to restore DNS settings automatically after failover.
- \* These scripts can be executed using post-failover automation in Nutanix DR policies.
- \* Option A (Self-Service Restore) is incorrect:
- \* Self-Service Restore is used for end-user recovery of deleted files, not for network settings.
- \* Option C (nncli tool) is incorrect:
- \* The nncli tool is used for network troubleshooting, but it does not automatically restore DNS settings.
- \* Option D (Configure a Protection Domain) is incorrect:
- \* Protection Domains define replication policies, but they do not fix DNS settings after failover.

### NEW QUESTION # 143

An administrator has been tasked with performing firmware upgrades for all Nutanix sites. When attempting to perform firmware upgrades via Life Cycle Manager (LCM) at a remote site with a single-node cluster, no firmware updates are listed as available. The administrator confirmed that the currently installed firmware is several revisions behind. Why are no firmware upgrades listed in LCM for this cluster?

- A. LCM does not have connectivity to the internet.
- **B. LCM cannot perform firmware upgrades on single-node clusters.**
- C. Single-node clusters only support one-disk firmware upgrades.
- D. LCM is not supported on single-node clusters.

**Answer: B**

Explanation:

The Nutanix Life Cycle Manager (LCM) is designed to manage and automate firmware and software upgrades across Nutanix clusters. However, firmware upgrades via LCM are not supported for single-node clusters. This limitation is documented in the ECA course as well as in LCM's official release notes and guides.

From the Nutanix Enterprise Cloud Administration (ECA) course materials:

"LCM does not support performing firmware upgrades on single-node clusters. These clusters require manual upgrades, and LCM will not list any available firmware updates for them, regardless of the firmware revision state." The other options:

- \* A is incorrect; single-node clusters don't have this limitation specifically for "one-disk" firmware upgrades—it's a complete limitation for all firmware tasks in LCM.
- \* B is misleading; LCM is supported in general for Nutanix clusters, just not for firmware tasks in single-node clusters.
- \* D is incorrect because lack of internet connectivity would typically show an error related to download or connectivity issues, not complete absence of firmware updates.

## NEW QUESTION # 144

.....

our NCP-MCI-6.10 exam prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to study materials, especially to such important NCP-MCI-6.10 exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the NCP-MCI-6.10 Exams and realize your dream of living a totally different life.
