

# Exam OGBA-101 Simulator Free - OGBA-101 Reliable Test Testking

BTW, DOWNLOAD part of FreePdfDump OGBA-101 dumps from Cloud Storage: <https://drive.google.com/open?id=15UM0Zf5iGKQPgZAAYKJJR9p9S1R694BT>

Your purchase with FreePdfDump is safe and fast. We use Paypal for payment and committed to keep your personal information secret and never share your information to the third part without your permission. In addition, our The Open Group OGBA-101 practice exam torrent can be available for immediate download after your payment. Besides, we guarantee you 100% pass for OGBA-101 Actual Test, in case of failure, you can ask for full refund. The refund procedure is very easy. You just need to show us your OGBA-101 failure certification, then after confirmation, we will deal with your case.

## The Open Group OGBA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Enterprise Architecture and the TOGAF Standard: In this topic of the OGBA-101 exam, TOGAF business architects learn about the contents of the TOGAF framework, the TOGAF Architecture Development Method (ADM), and the TOGAF Library.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Information Mapping: The topic is all about applying information mapping when developing a TOGAF Business Architecture.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Development of a Business Architecture: This topic explains how a Business Architecture is developed with the TOGAF ADM.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Organization Mapping: In this topic of the TOGAF Business Architecture Foundation exam, TOGAF business architects learn how to apply organization mapping when developing a Business Architecture.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Key Terminologies: The focal point of this TOGAF Business Architecture Foundation exam topic is about key terminologies of the Business Architecture.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>TOGAF ADM: This topic of the OGBA-101 Exam gives TOGAF business architects an introduction to the TOGAF ADM, its objectives, and usage.</li></ul>

## Free PDF The Open Group - OGBA-101 Authoritative Exam Simulator Free

You will stand at a higher starting point than others if you buy our OGBA-101 exam braindumps. Why are OGBA-101 practice questions worth your choice? I hope you can spend a little time reading the following content on the website, I will tell you some of the advantages of our OGBA-101 Study Materials. Firstly, our pass rate for OGBA-101 training guide is unmatched high as 98% to 100%. Secondly, we have been in this career for years and became a famous brand.

### The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q35-Q40):

#### NEW QUESTION # 35

Complete the sentence. The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and \_\_\_\_\_.

- A. Application
- B. Capability
- C. Transition
- D. Segment

**Answer: A**

Explanation:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology, and Application. The Application Architecture domain defines the applications required to process the data and support the business functions.

#### NEW QUESTION # 36

Which statement about Requirements Management Is most correct?

- A. Requirements Management is a step of all ADM Phases.
- B. The purpose of Requirements management is to process change requests.
- C. Requirements management and stakeholder engagement are placed at the center of architecture development.
- D. Stakeholder Requirements are captured once in Phase A and managed throughout the ADM cycle.

**Answer: C**

#### NEW QUESTION # 37

Consider the following:

You need to analyze a new value stream within the scope of a project.

Which of the following would you use?

- A. Converting the value stream stages to entities and then building a logical data model
- B. Heat mapping by value stream stages.
- C. An organization chart showing the business units that work with the enterprise and their value.
- D. Combining information mapping with a business process model.

**Answer: B**

Explanation:

In TOGAF and other enterprise architecture practices, analyzing a value stream often involves understanding the various stages of the value stream and assessing how each stage contributes to business value. Heat mapping is a commonly used technique to visualize and analyze these stages, making it the most appropriate choice in this context.

Understanding Value Streams in TOGAF

A value stream represents a high-level view of how value is delivered to customers or stakeholders. It encompasses all the activities necessary to achieve a specific outcome, often broken down into stages. In TOGAF's Business Architecture, value stream mapping is a key activity for analyzing and understanding these value stages, enabling architects to identify areas for improvement.

Heat Mapping as an Analysis Technique

Heat mapping by value stream stages is a visualization technique that highlights the effectiveness or performance of each stage in the value stream. By applying a heat map, architects can easily see which stages are performing well (often marked in "cool" colors) and

which stages may need improvement (often marked in "hot" colors). This is particularly useful for identifying bottlenecks, redundancies, or inefficiencies within the value stream, which is essential for project analysis.

Why Other Options are Incorrect:

Option A (Converting value stream stages to entities and building a logical data model):

Building a logical data model involves defining data entities and their relationships, which is more relevant for data architecture. It does not directly contribute to analyzing a value stream's stages or performance within a project scope.

Option C (An organization chart showing business units and their value):

An organization chart shows hierarchical relationships and roles within the enterprise, which does not specifically address value stream stages. While it may help understand which units are responsible for different parts of the value stream, it doesn't provide insight into the performance or effectiveness of each stage.

Option D (Combining information mapping with a business process model):

Information mapping with a business process model is more suited for detailed process analysis. It involves mapping information flows within processes but doesn't directly address analyzing value stream stages. Value streams are typically at a higher level than detailed business processes, focusing more on outcomes than specific activities.

Conclusion: Heat mapping by value stream stages (Option B) is the most effective tool for analyzing a new value stream within the project scope, as it provides a visual assessment of each stage's performance and identifies areas for improvement.

### NEW QUESTION # 38

What process turns a set of business capabilities into a structure that communicates the right amount of detail to different stakeholder groups?

- A. Stratification
- B. Layering
- C. Categorization
- D. Mapping

**Answer: D**

Explanation:

Mapping is the process that turns a set of business capabilities into a structure that communicates the right amount of detail to different stakeholder groups. Here's a detailed explanation:

\* Definition of Mapping:

\* Mapping: In the context of business architecture, mapping refers to the process of visually representing the relationships between business capabilities and other elements such as processes, value streams, and organizational units. This helps in communicating the structure and interactions within the business.

\* Purpose:

\* Communication: Mapping provides a clear and structured way to communicate the details of business capabilities to different stakeholder groups. It ensures that each group receives the appropriate level of detail needed for their role and decision-making.

\* Alignment: Helps in aligning business capabilities with strategic goals, processes, and organizational structure, ensuring that the architecture supports the overall business strategy.

\* TOGAF References:

\* Phase B: Business Architecture: During this phase, mapping is used to represent business capabilities and their relationships with other business elements. This helps in creating a coherent and comprehensive business architecture.

\* Capability Mapping: TOGAF emphasizes the use of capability mapping to understand and analyze how different capabilities support business processes and value streams.

\* Benefits:

\* Clarity and Understanding: Mapping provides a visual representation that enhances clarity and understanding of the business architecture. It helps stakeholders see the big picture and understand how different parts of the business fit together.

\* Stakeholder Engagement: By providing the right amount of detail to different stakeholders, mapping ensures effective engagement and collaboration across the organization.

In summary, mapping is the process that turns a set of business capabilities into a structure that communicates the right amount of detail to different stakeholder groups, facilitating clarity, understanding, and alignment.

### NEW QUESTION # 39

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase B
- B. Phase A
- C. Preliminary Phase
- D. Phase E

**Answer: A**

Explanation:

In TOGAF's Architecture Development Method (ADM), the information map is linked to other business blueprints during Phase B: Business Architecture. Phase B is focused on developing the Business Architecture, which involves creating and aligning various business architecture artifacts, such as capability maps, value streams, organizational maps, and information maps.

The information map provides an outline of the critical information needed to support the business capabilities and processes. By linking the information map with other business blueprints (like the process and capability maps), architects can ensure alignment and coherence across business architecture components.

This helps in creating a clear, unified view of how information flows and supports business operations and value creation.

\* Option B (Phase E) is incorrect because Phase E (Opportunities and Solutions) is primarily focused on identifying potential solutions and prioritizing initiatives for implementation.

\* Option C (Phase A) is incorrect as Phase A (Architecture Vision) is focused on defining the scope and vision of the overall architecture effort and gaining stakeholder agreement.

\* Option D (Preliminary Phase) is incorrect as it focuses on establishing the architecture framework and principles rather than creating detailed business blueprints.

Therefore, Phase B: Business Architecture is the correct answer, as it is the stage where the information map is integrated with other business architecture artifacts to create a cohesive business architecture.

## NEW QUESTION # 40

.....

Although the OGBA-101 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our OGBA-101 Study Materials, you will cope with it like a piece of cake. So our OGBA-101 learning questions will be your indispensable practice materials during your way to success.
