OGEA-101 Exam Tests & New OGEA-101 Test Forum

Free4Torrent IT expert team take advantage of their experience and knowledge to continue to enhance the quality of exam training materials to meet the needs of the candidates and guarantee the candidates to pass the The Open Group Certification OGEA-101 Exam which is they first time to participate in. Through purchasing Free4Torrent products, you can always get faster updates and more accurate information about the examination. And Free4Torrent provide a wide coverage of the content of the exam and convenience for many of the candidates participating in the IT certification exams except the accuracy rate of 100%. It can give you 100% confidence and make you feel at ease to take the exam.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73
Which of the following is a purpose of creating a set of Architecture Principles?

- A. To guide decision-making during trade-off discussions
- B. To agree a contract between sponsoring organization and the architects
- C. To document likely impacts resulting from successful deployment of the target architecture
- D. To establish a common understanding of how to control the business in pursuit of strategic goals

Answer: A

Explanation:
"Modeling these items would help the clarification process, and in particular would highlight any ambiguities or conflicts that involved trade-offs and/or prioritization... the architecture principles... likewise help clarify ambiguities or conflicts that involve trade-offs."
Open Group Publications Reference: The Open Group White Paper, TOGAF/MDA Mapping-Phase A discussion and principles/trade- off guidance.

NEW QUESTION # 74
Which of the following statements about architecture partitioning is correct?

- A. Partitions are used to simplify the management of the Enterprise Architecture.
- B. Partitions are equivalent to architecture levels.
- C. Partitions are defined and assigned to agile Enterprise Architecture teams.
- D. Partitions reflect the organization's structure.

Answer: A

Explanation:
Based on the web search results, architecture partitioning is a technique that divides the Enterprise Architecture into smaller and manageable segments or groups, based on various classification criteria, such as subject matter, time, maturity, volatility, etc.12 Architecture partitioning is used to simplify the development and management of the Enterprise Architecture, by reducing complexity, improving governance, enhancing reusability, and increasing alignment and agility12. Therefore, the statement that partitions are used to simplify the management of the Enterprise Architecture is correct.
The other statements are incorrect because:
*Partitions are not equivalent to architecture levels. Architecture levels are different layers of abstraction that describe the Enterprise Architecture from different perspectives, such as strategic, segment, and capability3.
Partitions are subsets of architectures that are defined within or across the levels, based on specific criteria1.
*Partitions do not necessarily reflect the organization's structure. The organization's structure is one possible criterion for partitioning the architecture, but it is not the only one. Other criteria, such as business function, product, service, geography, etc., can also be used to partition the architecture12.
*Partitions are not defined and assigned to agile Enterprise Architecture teams. Agile Enterprise Architecture is an approach that applies agile principles and practices to the architecture work, such as iterative development, frequent feedback, adaptive planning, and continuous delivery4. Partitions are not a specific feature of agile Enterprise Architecture, but a general technique that can be applied to any architecture method or framework, including TOGAF12.

NEW QUESTION # 75
Complete the sentence. The purpose of the Preliminary Phase is to develop the:

- A. Architecture Vision for the project
- B. Architecture Roadmap
- C. Implementation Governance Model
- D. Organization Model for Enterprise Architecture

Answer: D

Explanation:
* The Preliminary Phase establishes the Organization Model for Enterprise Architecture, defines principles, and sets up the

Architecture Capability.
* The Architecture Vision is developed in Phase A.
* The Architecture Roadmap comes from Phase E and Phase F.
* The Implementation Governance Model is part of Phase G.
Reference: TOGAF Standard, Version 9.2, Part II: ADM, Preliminary Phase.

NEW QUESTION # 76
In the ADM, what is the name for a document deliverable that has completed a review and is approved?

- A. version 0.9
- B. ratified
- C. final
- D. approved

Answer: C

Explanation:
Comprehensive and Detailed Explanation
In the TOGAF ADM, deliverables go through a lifecycle of development, review, approval, and usage.
TOGAF distinguishes between draft deliverables (work-in-progress) and final deliverables (those that have been formally reviewed and signed off).
* Draft deliverables are produced as working versions of the required outputs in each ADM phase.
These may carry version labels such as 0.1, 0.5, 0.9, etc., and are subject to stakeholder review and refinement.
* Once the document has been reviewed and approved by the relevant stakeholders (e.g., Architecture Board, governance bodies), it becomes a final deliverable.
* Final deliverables are baseline-controlled items and are formally stored in the Architecture Repository as an approved architecture artifact.
Thus, the correct term for a deliverable that has completed review and is approved is "final".
Why the other options are incorrect
* B. Approved: While true in general language, TOGAF uses the formal term "final deliverable", not
"approved deliverable."
* C. Ratified: This term is not used in TOGAF to describe the state of a deliverable.
* D. Version 0.9: This is a draft numbering convention, not the status of an approved deliverable.
References
* The Open Group, TOGAF Standard, Version 9.2, Part II: ADM - description of deliverables, artifacts, and building blocks.
* The Open Group, TOGAF 9 Certified Study Guide - explanation of draft vs. final deliverables in the ADM lifecycle.

NEW QUESTION # 77
In which section of the TOGAF template for Architecture Principles would a reader find the answer to the question of "How does this affect me?"

- A. Name
- B. Implications
- C. Statement
- D. Rationale

Answer: B

Explanation:
Comprehensive and Detailed Explanation
TOGAF defines an Architecture Principle as a qualitative statement of intent that should be met by the architecture. To ensure clarity and consistent application, TOGAF provides a standard template for documenting each principle. The template includes four parts:
* Name - A clear, precise, and easy-to-remember name for the principle.
* Answers the question: What is this principle called?
* Statement - A short, unambiguous sentence that communicates the essence of the principle.
* Answers the question: What does this principle mean?
* Rationale - Explains why the principle is important, the benefits of adopting it, and how it supports the enterprise's goals.
* Answers the question: Why should we adopt this principle?
* Implications - Highlights the consequences of adopting the principle, including the impact on business processes, technology,

governance, and resources.
* Answers the question: How does this affect me?
Therefore, the correct section where the reader would find the answer to "How does this affect me?" is Implications.
Why the other options are incorrect
* A. Statement: Defines the essence of the principle but does not address consequences.
* B. Rationale: Explains the reasoning and justification for the principle but not its practical effects.
* C. Name: Only provides the identifier or title of the principle.
References
* The Open Group, TOGAF Standard, Version 9.2, Part III: ADM Guidelines & Techniques - Architecture Principles.
* The Open Group, TOGAF 9 Certified Study Guide - description of the Architecture Principles template and the purpose of each section.

NEW QUESTION # 78

......

In order to cater to different needs of customers, three versions for OGEA-101 training materials are available, you can choose the most suitable one in accordance with your own needs. OGEA-101 PDF version is printable, and if you prefer a hard one, you can choose this version. OGEA-101 Soft test engine supports MS operating system, and it can install in more than 200 computers. OGEA-101 Online Test engine is convenient and easy to learn, you can have offline practice if you want. OGEA-101 Online soft test engine supports all web browsers and it has testing history and performance review, and you can have a general review of what you have learnt before next learning.
