

Exam PL-300 Price & PL-300 Reliable Exam Braindumps

2025 Latest TrainingDumps PL-300 PDF Dumps and PL-300 Exam Engine Free Share: https://drive.google.com/open?id=18_7Ywrm44Yh7oHNkZsezKJPmzmL0I9og

We assure that you can not only purchase high-quality PL-300 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of PL-300 guide torrent, you can download any time without registering. We can't say we are the absolutely 100% good, but we are doing our best to service every customer. Only in this way can we keep our customers and be long-term cooperative partners. Looking forwarding to your PL-300 Test Guide use try!

Our PL-300 test material is known for their good performance and massive learning resources. In general, users pay great attention to product performance. After a long period of development, our PL-300 research materials have a lot of innovation. And we also take the feedback of users who use the Microsoft Power BI Data Analyst exam guide materials seriously. Once our researchers find that these recommendations are possible to implement, we will try to refine the details of the PL-300 Quiz guide. Our PL-300 quiz guide has been seeking innovation and continuous development.

PL-300 Reliable Exam Braindumps - Actual PL-300 Test

Will you feel nervous while facing the real exam? Choose us, since we will help you relieve your nerves. PL-300 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your confidence for the exam will be strengthened. In addition, PL-300 exam dumps are edited by professional experts, who are quite familiar with the exam center, therefore the quality can be guaranteed. We offer you free demo for PL-300 to have a try before buying. And you will receive the downloading link and password within ten minutes for PL-300 exam materials, so that you can start your learning immediately.

Microsoft Power BI Data Analyst Sample Questions (Q290-Q295):

NEW QUESTION # 290

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is the same in each question in this series.

You have a Microsoft SQL Server database that contains the following tables.

Table name	Column name	Data type
Order	Order_ID	Integer
	Order_date	Integer
	Order_amount	Currency
	Customer_ID	Integer
	Order_ship_date	Integer
	Store_ID	Integer
Customer	Customer_ID	Integer
	First_name	Varchar(100)
	Last_name	Varchar(100)
	Customer_photo	Binary
Date	Date_ID	Integer
	Date_name	DateTime
	Month	Integer
	Week	Integer
	Year	Integer
Monthly_returns	Month_ID	Integer
	Total_returns	Float
	Store_ID	Varchar(100)
	Store_ID	Integer
Store	Name	Varchar(100)
	City	Varchar(100)
	Sales_target	Float

The following columns contain date information:

- Date[Month] in the mmyyyy format
- Date[Date_ID] in the ddmmyyyy format
- Date[Date_name] in the mm/dd/yyyy format
- Monthly_returns[Month_ID] in the mmyyyy format

The Order table contains more than one million rows.

The Store table has a relationship to the Monthly_returns table on the Store_ID column. This is the only relationship between the tables.

You plan to use Power BI Desktop to create an analytics solution for the data.

You need to create a chart that displays a sum of Order[Order_amount] by month for the Order_ship_date column and the Order_date column.

How should you model the data?

- A. Add a second Date table named Ship_date to the model. Create a many-to-many relationship from Date[Date_ID] to Order[Order_date] and many-to-many relationship from Ship_date[Date_ID] to Order [Order_ship_date].
- B. Create a one-to-many relationship from Date[Date_ID] to Order[Order_date] and another relationship from Date[Date_ID] to Order[Order_ship_date].
- C. Add a second Date table named Ship_date to the model. Create a one-to-many relationship from Date [Date_ID] to Order[Order_date] and a one-to-many relationship from Ship_Date[Date_ID] to Order [Order_ship_date].
- D. Create a one-to-many relationship from Date[Date_ID] to Order[Order_date] and another relationship from Date[Date_ID] to Monthly_returns[Date_ID].

Answer: C

NEW QUESTION # 291

HOTSPOT

You have a power BI tenant that hosts the datasets shown in the following table.

Name	Contents	Used to generate
Sales	Sales targets Sales data Employee salary data	Daily performance reports Quarterly reports used to calculate bonuses
Operations	Environmental sensor data	Reports that show average sensor readings over time
Finance	Financial transaction data	Budget planning reports Monthly board reports

You have the following requirements:

- * The export of reports that contain Personally Identifiable Information (PII) must be prevented.
- * Data used for financial decisions must be reviewed and approved before use.

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
The Sales dataset requires a sensitivity label.	☐	☐
The Operations dataset requires a sensitivity label and must be certified.	☐	☐
The Finance dataset requires a sensitivity label and must be certified.	☐	☐

Answer:

Explanation:

Answer Area

Statements	Yes	No
The Sales dataset requires a sensitivity label.	☒	☐
The Operations dataset requires a sensitivity label and must be certified.	☐	☒
The Finance dataset requires a sensitivity label and must be certified.	☒	☐

NEW QUESTION # 292

You are modifying a Power BI model by using Power BI Desktop.

You have a table named Sales that contains the following fields.

Name	Data type
Transaction ID	Whole Number
Customer Key	Whole Number
Sales Date Key	Date
Sales Amount	Whole Number

You have a table named Transaction Size that contains the following data.

Values

ALL
AND
CALCULATE
FILTER
OR

Answer Area

```

Transaction Size =
VAR SalesTotal = 'Sales'[Sales]
VAR UserSegment = 
    (
        'Transaction Size',
        (
            Transaction Size, SalesTotal,

```

Answer:

Explanation:

Values

ALL

AND

CALCULATE

FILTER

OR

Answer Area

```

Transaction Size
VAR SalesTotal = 'Sales'
VAR FilterSegment =
    CALCULATE (
        'Transaction Size',
        AND (
            'Transaction Size'[Min] <= SalesTotal,

```

NEW QUESTION # 293

You are creating a column chart visualization.

You configure groups as shown in the Groups exhibit. (Click the Groups tab.)

Groups

Name: Sepal.Width (bins) Field: Sepal.Width

Group type: Bin Min value: 2

Bin Type: Number of bins Max value: 4.4

Binning splits numeric or date/time data by an amount you specify. The default bin count is calculated based on your data.

Bin count: 10 Bin size: 0.2400000000000000

Reset to default

The visualization appears as shown in the Chart exhibit. (Click the Chart tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

Statements	Yes	No
The data is segmented into 10 groups.	☐	☐
The data was split into deciles.	☐	☐
To increase the bin size, you must decrease the bin count.	☐	☐

Answer:

Explanation:

Answer Area		Statement	Yes	No
		The data is segmented into 10 groups.	☒	☐
		The data was split into deciles.	☐	☐
		To increase the bin size, you must decrease the bin count.	☐	☒

NEW QUESTION # 294

You are creating a Power BI model and report.

You have a single table in a data model named Product. Product contains the following fields:

- * ID
- * Name
- * Color
- * Category
- * Total Sales

You need to create a calculated table that shows only the top eight products based on the highest value in Total Sales.

How should you complete the DAX expression? To answer, drag the appropriate values to the correct targets.

Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values	Target
ASC	CALCULATETABLE
DESC	MAXX
RELATEDTABLE	TOPN

Top 8 Products = CALCULATETABLE (MAXX (Product, [Total Sales]), TOPN (8, Product, [Total Sales], DESC))

Answer:

Explanation:

Values	Target
ASC	CALCULATETABLE
DESC	MAXX
RELATEDTABLE	TOPN

Top 8 Products = CALCULATETABLE (MAXX (Product, [Total Sales]), TOPN (8, Product, [Total Sales], DESC))

Explanation:

Values	Target
ASC	CALCULATETABLE
DESC	MAXX
RELATEDTABLE	TOPN

Top 8 Products = CALCULATETABLE (MAXX (Product, [Total Sales]), TOPN (8, Product, [Total Sales], DESC))

NEW QUESTION # 295

.....

With the rapid development of computer, network, and semiconductor techniques, the market for people is becoming more and more hotly contested. Passing a PL-300 exam to get a certificate will help you to look for a better job and get a higher salary. If you are worried about your job, your wage, and a PL-300 Certification, if you are going to change this, we are going to help you solve your problem by our PL-300 exam torrent with high quality, now allow us to introduce you our PL-300 guide torrent.
