NEW QUESTION # 127

In which step of the approach to issue management are options to resolve an issue evaluated?

- A. Capture
- B. Implement
- **C. Recommend**
- D. Decide

Answer: C

Explanation:

The Recommend step in issue management involves analyzing the issue and evaluating possible options to resolve it. At this stage, the project team or responsible individuals identify potential solutions, weigh their pros and cons, and recommend the best course of action to decision-makers.

Capture is the initial identification and recording of the issue, Decide involves making the final decision on the recommended solution, and Implement is the execution of the chosen resolution. Evaluating options thoroughly during the Recommend phase helps ensure informed decision-making and effective issue resolution.

This structured approach aligns with PRINCE2's focus on proactive issue management, maintaining control and reducing risk impacts.

NEW QUESTION # 129

What is a good criterion to include in the Definition of Ready?

- A. All components are complete
- B. The product is ready to hand over
- C. The product has passed the quality checks
- **D. Acceptance criteria are measurable**

Answer: D

Explanation:

A key criterion for the Definition of Ready is that acceptance criteria are measurable. This ensures that work items are clearly understood, well-defined, and have objective criteria to confirm when they are complete.

Measurable acceptance criteria reduce ambiguity and support efficient development and quality assurance.

Other options describe completion or handover stages, which are more relevant to the Definition of Done, not Ready.
