choose the best Scrum PSM-I Certification Exams format that suits your budget and assist you in Scrum PSM-I exam preparation and start PSM-I exam preparation today.

Scrum Professional Scrum Master I Sample Questions (Q85-Q90):

NEW QUESTION # 85

A Scrum Master is keeping a list of open impediments, but it is growing and he/she has been able to resolve only a small portion of the impediments. Which three techniques would be most helpful in this situation? (Choose three.)

- A. Consulting with the Development Team
- B. Prioritizing the list and working on them in order.
- C. Arranging a triage meeting with all project managers.
- D. Alerting management to the impediments and their impact.

Answer: A,B,D

Explanation:

The correct answers are A, B, and D, because these techniques would be most helpful in this situation. Consulting with the Development Team may help identify the root causes of the impediments and possible solutions. Prioritizing the list and working on them in order may help reduce the backlog and focus on the most important or urgent issues. Alerting management to the impediments and their impact may help escalate the problems and get support from the organization.

NEW QUESTION # 86

Which technique is the best way the Scrum Master can ensure that the Development Team communicates effectively with the Product Owner?

- A. Teach the Development Team to talk in terms of business needs and objectives.
- B. Teach the Product Owner about the technologies employed during the Sprints.
- C. Monitor communications between them and facilitate direct collaboration.
- D. Act as a go-between for them.

Answer: C

Explanation:

The correct answer is A, because the best way the Scrum Master can ensure that the Development Team communicates effectively with the Product Owner is to monitor communications between them and facilitate direct collaboration. The Scrum Guide states that "the Scrum Master serves the Product Owner in several ways, including ... facilitating Scrum events as requested or needed." Therefore, the Scrum Master should help the Development Team and the Product Owner interact regularly and productively during the Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective events.

NEW QUESTION # 87

A Scrum Master is introducing Scrum to a new Team. The Team has decided that a Sprint Retrospective is unnecessary. What action should the Scrum Master take? (choose the best answer)

- A. Begin facilitating productive and useful Sprint Retrospectives.
- B. Comply with the decision of the self-managing team.
- C. Consult with the Product Owner to see how they feel about the situation.
- D. Call a meeting between the ScrumTeam and senior management

Answer: A

Explanation:

According to the Scrum Guide, the action that the Scrum Master should take when the Team decides that a Sprint Retrospective is unnecessary is to begin facilitating productive and useful Sprint Retrospectives. The Sprint Retrospective is an essential event for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The Scrum Master is responsible for ensuring that this event takes place and that positive outcomes are achieved. The other options are not valid actions, as they either imply that the Scrum Master complies with or ignores the decision of the Team (such as complying with it, calling a meeting with senior management, or consulting with the Product Owner), which is not consistent with Scrum values and principles.

NEW QUESTION # 88

Which topics should be discussed in the Sprint Review?

- A. The Scrum process, and how it was used during the Sprint.
- B. Coding and engineering practices.
- C. Sprint results.
- D. All of the above.

Answer: D

NEW QUESTION # 89

When is the Sprint Backlog created?

- A. During the Sprint Planning meeting.
- B. During the Sprint.
- C. At the beginning of the project.
- D. Prior to the Sprint Planning meeting.

Answer: A

NEW QUESTION # 90

.....
