# Exam QSA_New_V4 Guide - QSA_New_V4 Sample Exam

2025 Latest Pass4Leader QSA_New_V4 PDF Dumps and QSA_New_V4 Exam Engine Free Share:
https://drive.google.com/open?id=1zpS7fFrHv8CsfDFPIxLtVhCMbU-CkI6I

As is known to us that pass rate is one of the most important standards when candidate choose the practice materials. The pass rate is 98.95% for QSA_New_V4 training materials, and you can pass and get a certificate successfully. In addition we also pass guarantee and money back guarantee if you fail to pass the exam after using QSA_New_V4 Exam Dumps. Free update for one year is also available, namely in the following year, you can get latest information about the QSA_New_V4 training materials. We also have online and offline chat service to solve your confusions.

## PCI SSC QSA_New_V4 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • PCI Reporting Requirements: This section of the exam measures the skills of Risk Management Professionals and covers the reporting obligations associated with PCI DSS compliance. Candidates must be able to prepare and submit necessary documentation, such as Reports on Compliance (ROCs) and Self-Assessment Questionnaires (SAQs). One critical skill assessed is compiling and submitting accurate PCI compliance reports. |
| Topic 2 | • Real-World Case Studies: This section of the exam measures the skills of Cybersecurity Consultants and involves analyzing real-world breaches, compliance failures, and best practices in PCI DSS implementation. Candidates must review case studies to understand practical applications of security standards and identify lessons learned. One key skill evaluated is applying PCI DSS principles to prevent security breaches. |
| Topic 3 | • PCI DSS Testing Procedures: This section of the exam measures the skills of PCI Compliance Auditors and covers the testing procedures required to assess compliance with the Payment Card Industry Data Security Standard (PCI DSS). Candidates must understand how to evaluate security controls, identify vulnerabilities, and ensure that organizations meet compliance requirements. One key skill evaluated is assessing security measures against PCI DSS standards. |
| Topic 4 | • Payment Brand Specific Requirements: This section of the exam measures the skills of Payment Security Specialists and focuses on the unique security and compliance requirements set by different payment brands, such as Visa, Mastercard, and American Express. Candidates must be familiar with the specific mandates and expectations of each brand when handling cardholder data. One skill assessed is identifying brand-specific compliance variations. |
|  |  |

| Topic 5 | • PCI Validation Requirements: This section of the exam measures the skills of Compliance Analysts and evaluates the processes involved in validating PCI DSS compliance. Candidates must understand the different levels of merchant and service provider validation, including self-assessment questionnaires and external audits. One essential skill tested is determining the appropriate validation method based on business type. |

# Free PDF First-grade PCI SSC QSA_New_V4 - Exam Qualified Security Assessor V4 Exam Guide

In order to provide you with the best PCI SSC certification exam dumps forever, Pass4Leader constantly improve the quality of QSA_New_V4 exam dumps and update the dumps on the basis of the latest test syllabus at any time. Pass4Leader is your best choice on the market today and is recognized by all candidates for a long time. If you don't believe what I say, you can know the information by asking around. Somebody must have been using Pass4Leader dumps. We assure Pass4Leader provide you with the latest and the best questions and answers which will let you pass the QSA_New_V4 Exam at the first attempt.

## PCI SSC Qualified Security Assessor V4 Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37
An organization has implemented a change-detection mechanism on their systems. How often must critical file comparisons be performed?

- A. Only after a valid change is installed
- B. Periodically as defined by the entity
- C. At least weekly
- D. At least monthly

Answer: C

Explanation:
As specified under Requirement 11.5.2.1, comparisons of critical files (e.g., config files, executables) using change-detection mechanisms (e.g., FIM tools) must occur at least weekly. This ensures timely detection of unauthorized changes or tampering.
* Option A:#Correct. Weekly is the minimum frequency required.
* Option B:#Incorrect. A defined "period" is not sufficient unless it's weekly or more frequent.
* Option C:#Incorrect. Scans should not wait for changes; they should detect unexpected ones.
* Option D:#Incorrect. Monthly is too infrequent for PCI DSS compliance.
Reference:PCI DSS v4.0.1 - Requirement 11.5.2.1.

NEW QUESTION # 38
Which scenario meets PCI DSS requirements for critical systems to have correct and consistent time?

- A. Each internal system peers directly with an external source to ensure accuracy of time updates.
- B. Each internal system is configured to be its own time server.
- C. Access to time configuration settings is available to all users of the system.
- D. Central time servers receive time signals from specific, approved external sources.

Answer: D

Explanation:
Per Requirement 10.6.1, PCI DSS mandates that time-synchronization technology be used, and systems must be synchronized to a central time server that itself receives time from an approved external source. This ensures logs can be accurately correlated.
* Option A:Incorrect. Time inconsistency arises if each system operates independently.
* Option B:Incorrect. Time configuration must be restricted to authorised personnel only.
* Option C:Correct. Time should be sourced from a centralised server which is in sync with reliable external sources.
* Option D:Incorrect. Each system peering independently can cause inconsistencies.

Reference:PCI DSS v4.0.1 - Requirement 10.6.1.1.

**NEW QUESTION # 39**

An entity wants to know if the Software Security Framework can be leveraged during their assessment.
Which of the following software types would this apply to?

- A. Only software which runs on PCI PTS devices.
- B. Software developed by the entity in accordance with the Secure SLC Standard.
- C. Any payment software In the CDE.
- D. Validated Payment Applications that are listed by PCI SSC and have undergone a PA-DSS assessment.

**Answer: B**

Explanation:
Software Security Framework Overview
* PCI SSC's Software Security Framework (SSF) encompasses Secure Software Standard and Secure Software Lifecycle (Secure SLC) Standard.
* Software developed under the Secure SLC Standard adheres to security-by-design principles and can leverage the SSF during PCI DSS assessments.
Applicability
* The framework is primarily for software developed by entities or third parties adhering to PCI SSC standards.
* It does not apply to legacy payment software listed under PA-DSS unless migrated to SSF.
Incorrect Options
* Option A: Not all payment software qualifies; it must align with SSF requirements.
* Option B: PCI PTS devices are subject to different security requirements.
* Option C: PA-DSS-listed software does not automatically meet SSF standards without reassessment.

**NEW QUESTION # 40**

Which of the following describes the intent of installing one primary function per server?

- A. To prevent server functions with a lower security level from introducing security weaknesses to higher- security functions on the same server.
- B. To reduce the security level of functions with higher-security needs to meet the needs of lower-security functions.
- C. To allow functions with different security levels to be implemented on the same server.
- D. To allow higher-security functions to protect lower-security functions installed on the same server.

**Answer: A**

Explanation:
As perRequirement 2.2.1, the purpose of limiting each server to one primary function is toreduce the risk of functions with lower security needs compromising more critical functions.
* Option A:#Incorrect. PCI DSS discourages combining different security-level functions.
* Option B:#Correct. This is the intent: toprevent lower-security processes from weakening high-security environments.
* Option C:#Incorrect. Functions shouldn't depend on one another for security.
* Option D:#Incorrect. PCI DSS encourages raising security, not lowering it.

**NEW QUESTION # 41**

Which statement is true regarding the presence of both hashed and truncated versions of the same PAN in an environment?

- A. The hashed version of the PAN must also be truncated per PCI DSS requirements for strong cryptography.
- B. Hashed and truncated versions of a PAN must not exist in same environment.
- C. The hashed and truncated versions must be correlated so the source PAN can be identified.
- D. Controls are needed to prevent the original PAN being exposed by the hashed and truncated versions.

**Answer: D**

Explanation:
PCI DSS allows for theuse of truncation and hashingfor protecting PAN, butRequirement 3.4.1and its guidance warn

againstcombining hashed and truncated PANsin such a way that the original PAN could be reconstructed. If both formats exist,controls must ensurethey can't be used together to reverse-engineer the PAN.
* Option A:#Correct. Controls must ensure PAN cannot be reconstructed using both versions.
* Option B:#Incorrect. A hashed PAN does not need truncation - hashing is a separate mechanism.
* Option C:#Incorrect. PCI DSS aims to prevent correlation, not encourage it.
* Option D:#Incorrect. They can coexist, but must be secured so that PAN cannot be derived.

## NEW QUESTION # 42

......

As the old saying goes, practice is the only standard to testify truth. In other word, it has been a matter of common sense that pass rate of the QSA_New_V4 study materials is the most important standard to testify whether it is useful and effective for people to achieve their goal. We believe that you must have paid more attention to the pass rate of the QSA_New_V4 study materials. If you focus on the study materials from our company, you will find that the pass rate of our products is higher than other study materials in the market, yes, we have a 99% pass rate, which means if you take our the QSA_New_V4 Study Materials into consideration, it is very possible for you to pass your exam and get the related certification.
