Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q43-Q48):

NEW QUESTION # 43

Product Management is responsible for "what gets built" as defined by the Vision, Roadmap, and what else?

- A. Customers
- B. Key stakeholders
- C. PI Planning
- D. Program Backlog

Answer: D

Explanation:

Product Management is responsible for defining desirable, viable, feasible, and sustainable solutions that meet customer needs and supporting development across the product life cycle. They align the product strategy, vision, and roadmap to the portfolio's strategic themes and lean budgets. They also create, maintain, and adjust the program backlog, which contains the features and enablers that the Agile Release Train (ART) will implement. They work with customers, teams, and product owners to understand and communicate their needs and participate in solution validation. They also collaborate with system architects and the release train

engineer to guide the ART toward successful delivery¹². References: Product Management - Scaled Agile Framework, Agile Release Train - Scaled Agile Framework

NEW QUESTION # 44

Which of the following continuous delivery pipeline aspects focuses on enabling the organization to deliver value aligned with business needs?

- A. Continuous Deployment
- B. Release on Demand
- C. Continuous Integration
- D. Continuous Exploration

Answer: D

Explanation:

Continuous Exploration (CE) is the continuous delivery pipeline aspect that focuses on enabling the organization to deliver value aligned with business needs. CE is the process of understanding the market problem or customer need, defining a vision and a roadmap for the solution, and validating the assumptions and hypotheses through fast feedback and learning cycles. CE involves activities such as design thinking, lean startup, hypothesis-driven development, and innovation accounting. CE helps the organization align on what to build and why, and generate a continuous flow of valuable features for the solution. References: Continuous Exploration - Scaled Agile Framework, Continuous Delivery Pipeline - Scaled Agile Framework

NEW QUESTION # 45

What is the role of the System Architect/Engineer?

- A. To implement continuous improvement methods
- B. To guide the teams and support the Architectural Runway
- C. To manage dependencies
- D. To define the design for the system

Answer: B

Explanation:

The role of the System Architect/Engineer in SAFe is to guide the teams and support the Architectural Runway, which is the existing code, components, and technical infrastructure needed to implement near-term features without excessive redesign and delay. The System Architect/Engineer defines and communicates the technical and architectural vision for the solutions developed by an Agile Release Train (ART), ensuring that they fit the intended purpose and align with the enterprise and solution architecture. The System Architect

/Engineer also collaborates with various roles, teams, and stakeholders within and outside the ART to ensure that the system architecture supports the evolving business needs and enables fast and reliable implementation. References: System Architect/Engineering - Scaled Agile Framework, Architectural Runway - Scaled Agile Framework

NEW QUESTION # 46

Which of the following is not 1 of the 3Cs of good user stories?

- A. Conversation
- B. Continuation
- C. Card
- D. Confirmation

Answer: B

NEW QUESTION # 47

Which statement is true about Iteration Planning?

- A. Items are assigned to the team members
- B. The PO does not need to attend
- C. It is required for every Iteration to enable fast learning cycles
- D. It occurs on the last day of the Iteration

Answer: C

Explanation:

Iteration Planning is a key event in the SAFe framework that occurs at the beginning of each Iteration. It is a timeboxed meeting where the Agile team collaborates to plan the work for the upcoming Iteration, based on the team backlog, the Iteration goal, and the team capacity. Iteration Planning enables fast learning cycles by allowing the team to inspect and adapt their work frequently, deliver value incrementally, and respond to changing customer needs and feedback.
