Exam Salesforce Analytics-Arch-201 Question - Analytics-Arch-201 Reliable Test Sims

Our Analytics-Arch-201 exam review contains the latest test questions and accurate answers along with the professional explanations. A little attention to prepare Analytics-Arch-201 practice test will improve your skills to clear exam with high passing score. For most busy IT workers, Analytics-Arch-201 Dumps PDF is the best alternative to your time and money to secure the way of success in the IT filed.

Salesforce Analytics-Arch-201 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy Tableau Server: This domain assesses the ability of Tableau Administrators to perform production-ready deployments of Tableau Server. It encompasses installing and configuring Tableau Server with external components, supporting air-gapped environments, disaster recovery validations, and blue-green deployments. It includes configuring and troubleshooting various authentication methods such as SAML, Kerberos, and LDAP. The section also covers implementing encryption strategies, installing and verifying Tableau Server on Linux and Windows platforms, resolving installation and configuration issues, and managing service accounts and logging.

Topic 2	• Monitor and Maintain a Tableau Deployment: This section evaluates skills of Tableau Administrators in monitoring, maintaining, and optimizing Tableau environments. It involves creating custom administrative dashboards, conducting load testing using tools like TabJolt, and analyzing test results. Troubleshooting complex performance bottlenecks in workbooks and server resources is key, as is tuning caching and scaling strategies. It covers leveraging observability tools such as the Resource Monitoring Tool, analyzing logs and metrics, and adjusting architecture accordingly. Automation of maintenance functions using APIs, scripting, and scheduling is included, along with managing server extensions, content automation, dashboard extensions, web data connectors, and secure embedded solutions.
Topic 3	• Design a Tableau Infrastructure: This section of the exam measures skills of Tableau Consultants and focuses on planning and designing a complex Tableau deployment. It covers gathering user requirements, licensing strategies including Authorization-to-Run, high availability and disaster recovery planning, and mapping server add-ons to the organization's needs. It includes planning and implementing Tableau Cloud with Bridge, authentication, user provisioning, and multi-site configuration. Additionally, it addresses migration planning across Tableau products, operating systems, identity stores, and consolidations, as well as designing process topologies, sizing, node roles, and recommending server configurations including security, hardware, and disaster recovery.

Analytics-Arch-201 Exam Questions Available At 25% Discount With Free Demo

We own three versions of the Analytics-Arch-201 exam torrent for you to choose. They conclude PDF version, PC version and APP online version. You can choose the most convenient version of the Analytics-Arch-201 quiz torrent. The three versions of the Analytics-Arch-201 test prep boost different strengths and you can find the most appropriate choice. For example, the PDF version is convenient for download and printing and is easy and convenient for review and learning. It can be printed into papers and is convenient to make notes. You can learn the Analytics-Arch-201 Test Prep at any time or place and repeatedly practice.

Salesforce Certified Tableau Architect Sample Questions (Q48-Q53):

NEW QUESTION # 48
To ensure optimal performance of Tableau Server, what automated maintenance task is essential for managing disk space and server efficiency?

- A. Automating the defragmentation of the server's hard drives on a weekly basis
- B. Setting up a script to regularly clean up old logs and temporary files from the server
- C. Scheduling a complete server reboot to occur outside of business hours every day
- D. Configuring automatic updates for Tableau Server software and associated data drivers

Answer: B

Explanation:
Setting up a script to regularly clean up old logs and temporary files from the server Automating the cleanup of old logs and temporary files is crucial for managing disk space and maintaining server efficiency in Tableau Server. Regularly removing these files helps prevent unnecessary disk space usage and can improve server performance. Setting up a script to perform this task ensures that the cleanup occurs consistently and without manual intervention. Option A is incorrect because while defragmentation can be important, it is not as crucial as regular cleanup of logs and temporary files for server performance. Option C is incorrect as automatic updates for software and drivers are important, but they do not directly address the management of disk space and temporary files. Option D is incorrect because a complete server reboot is a drastic measure and may not be necessary for regular maintenance

NEW QUESTION # 49
In a Tableau environment utilizing both Tableau Server and Tableau Cloud, what consideration is important when choosing an authentication method?

- A. It should support automatic user provisioning in both Tableau Server and Tableau Cloud
- B. The method must be compatible with Tableau Server's version regardless of its compatibility with Tableau Cloud
- C. The authentication method must allow for different user permissions in Tableau Server and Tableau Cloud
- D. Ensuring the method allows for the synchronization of user roles and permissions between Tableau Server and Tableau Cloud

Answer: D

Explanation:
Ensuring the method allows for the synchronization of user roles and permissions between Tableau Server and Tableau Cloud When choosing an authentication method for a Tableau environment that includes both Tableau Server and Tableau Cloud, it is important to ensure that the method allows for synchronization of user roles and permissions between the two plat-forms. This synchronization is key to maintaining consistent access control and user management across both environments. Option A is incorrect because the requirement for different user permissions in Tableau Server and Tableau Cloud is not a standard consideration for authentication methods. Option B is incorrect as automatic user provisioning is beneficial but not a primary consideration for choosing an authentication method in mixed environments. Option C is incorrect because compatibility with both Tableau Server and Tableau Cloud is important, not just with the version of Tableau Server.

NEW QUESTION # 50
In a scenario where Tableau Server's dashboards are frequently updated with real-time data, what caching strategy should be employed to optimize performance?

- A. Configuring the server to use a very long cache duration to maximize the use of cached data
- B. Adjusting the cache to balance between frequent refreshes and maintaining some level of cached data
- C. Utilizing disk-based caching exclusively to handle the high frequency of data updates
- D. Setting the cache to refresh only during off-peak hours to reduce the load during high-usage periods

Answer: B

Explanation:
Adjusting the cache to balance between frequent refreshes and maintaining some level of cached data For dashboards that are frequently updated with real-time data, the caching strategy should aim to balance between frequent cache refreshes and maintaining a level of cached data. This approach allows for relatively up-to-date information to be displayed while still taking advantage of caching for improved performance. Option A is incorrect because a very long cache duration may lead to stale data being displayed in scenarios with frequent updates. Option B is incorrect as refreshing the cache only during off-peak hours might not be suitable for dashboards requiring real-time data. Option D is incorrect because relying solely on disk-based caching does not address the need for balancing cache freshness with performance in a real-time data scenario.

NEW QUESTION # 51
When verifying the installation of Tableau Server on a Windows system, what is important to check to ensure that file system permissions are correctly configured?

- A. The security permissions of the Tableau Server data and logs directories
- B. The version of the file system used on the Tableau Server installation drive
- C. The network settings to ensure Tableau Server can communicate with other systems
- D. The amount of free disk space on the drive where Tableau Server is installed

Answer: A

Explanation:
The security permissions of the Tableau Server data and logs directories After installing Tableau Server on Windows, it's important to check the security permissions of the data and logs directories of Tableau Server. Proper permissions are necessary to ensure that Tableau Server can access and manage its files effectively, without encountering access-related errors. Option A is incorrect because the amount of free disk space, while important for operation, does not impact the permissions set on the file system. Option B is incorrect as network settings, while crucial for connectivity, are not related to file system permissions for the Tableau Server directories. Option D is incorrect because the version of the file system, while important for overall compatibility, does not directly impact the permissions set on the Tableau Server directories.

NEW QUESTION # 52

In a Tableau Server deployment, what is a key consideration when configuring an unlicensed node?

- A. The unlicensed node requires a separate storage system from the licensed nodes
- B. The unlicensed node must be in the same physical location as the licensed nodes for effective communication
- C. Ensure the unlicensed node is properly networked and configured to communicate with the licensed nodes
- D. The unlicensed node should have a higher processing power than the licensed nodes to manage intensive tasks

Answer: C

Explanation:
Ensure the unlicensed node is properly networked and configured to communicate with the licensed nodes Proper networking and configuration for communication with the li-censed nodes are crucial when setting up an unlicensed node. This ensures that the unlicensed node can effectively handle background tasks and communicate results back to the main server, maintaining the overall efficiency of the Tableau Server deployment. Option A is incorrect because the processing power requirement of an unlicensed node does not necessarily have to be higher than that of licensed nodes; it depends on the specific tasks assigned to it. Option B is incorrect as the physical location of the unlicensed node is not a critical factor, as long as it is well-connected to the licensed nodes over the network. Option D is incorrect because having a separate storage system is not a primary requirement for an unlicensed node; it primarily needs to be configured for effective task handling and communication with the licensed nodes.

NEW QUESTION # 53

......

If you still worried about whether or not you pass exam; if you still doubt whether it is worthy of purchasing our software, what can you do to clarify your doubts that is to download free demo of Analytics-Arch-201. Once you have checked our demo, you will find the study materials we provide are what you want most. Our target is to reduce your pressure and improve your learning efficiency from preparing exam. Analytics-Arch-201 effective exam dumps are significance for studying and training. As a rich experienced exam dump provider, we will provide you with one of the best tools available to you for pass Analytics-Arch-201 exam. You can find different types of Analytics-Arch-201 dumps on our website, which is a best choice.

Analytics-Arch-201 Reliable Test Sims: https://www.dumpstests.com/Analytics-Arch-201-latest-test-dumps.html

- Trustable Exam Analytics-Arch-201 Question | 100% Free Analytics-Arch-201 Reliable Test Sims 🔲 Easily obtain ➤ Analytics-Arch-201 🔲 for free download through 🔲 www.getvalidtest.com 🔲 🔲Composite Test Analytics-Arch-201 Price
- High Quality Analytics-Arch-201 Test Prep Helps You Pass the Salesforce Certified Tableau Architect Exam Smoothly 🔲 Open website （www.pdfvce.com） and search for 《Analytics-Arch-201》 for free download 🔲Analytics-Arch-201 Exam Overviews
- Free PDF 2025 Salesforce Analytics-Arch-201: Salesforce Certified Tableau Architect Authoritative Exam Question 🔲 Search on ✔ www.real4dumps.com 🔲✔ 🔲 for 🔲 Analytics-Arch-201 🔲 to obtain exam materials for free download 🔲 🔲Analytics-Arch-201 Exam Overviews
