Essential Guide for Complete Review of C-ACDET-2506 Exam Cost

All of the traits above are available in this web-based SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) practice test of Exam4Labs. The main distinction is that the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) online practice test works with not only Windows but also Mac, Linux, iOS, and Android. Above all, taking the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) web-based practice test while preparing for the examination does not need any software installation.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q33-Q38):

NEW QUESTION # 33

How do you format the Help Tip for a field?

- A. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and use regular keyboard controls such as Ctrl-l, Ctrl-b
- C. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.
- **D. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting**

Answer: D

NEW QUESTION # 34

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. Publish the form template within the test site in order to add the form fields in the package.
- **B. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.**
- C. Discard any other packages that appear in My Action Items.
- **D. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.**
- **E. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.**

Answer: B,D,E

NEW QUESTION # 35

Who leads Suite Integration activities?

- A. SAP Support
- **B. SAP Deployment Lead**
- C. Customer Success Manager
- D. Partner/Customer Functional Lead

Answer: B

NEW QUESTION # 36

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Deployment Overview
- B. Enablement Workbook
- **C. Delivery Engagement Readiness Checklist**
- D. Solution Design Matrix

Answer: C

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.

NEW QUESTION # 37

When you create a custom field, how do you define where the field is added?

- A. Each field can be linked to multiple screens, identified via UI GroupClass ID
- B. The field is added to a project header, identified by the templateClass ID
- C. The field is added to a class, identified by the record ID
- **D. The field is added to a class, identified by a class name**

Answer: D

Explanation:

In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

NEW QUESTION # 38

.....

For candidates who will attend an exam, some practice for it is necessary. C-ACDET-2506 Exam Dumps of us will give you the practice you need. C-ACDET-2506 exam dumps of us contain the knowledge point of the exam. Skilled professionals will verify the questions and answers, which will guarantee the correctness.
