Pass-through authentication  
Password writeback  
Single sign-on (SSO)

requires additional verification, such as a verification code sent to a mobile phone.

Answer:

Explanation:

**Answer Area**

Multi-factor authentication (MFA)  
Pass-through authentication  
Password writeback  
Single sign-on (SSO)

requires additional verification, such as a verification code sent to a mobile phone.

Explanation:

**Answer Area**

Multi-factor authentication (MFA)  
Pass-through authentication  
Password writeback  
Single sign-on (SSO)

requires additional verification, such as a verification code sent to a mobile phone.

Multi-factor authentication is a process where a user is prompted during the sign-in process for an additional form of identification, such as to enter a code on their cellphone or to provide a fingerprint scan.
