

Exam ServiceNow CTA Review - CTA Minimum Pass Score

BTW, DOWNLOAD part of PassTorrent CTA dumps from Cloud Storage: <https://drive.google.com/open?id=1DMH4FFSZgZxGJadKOETKencW9BwOclxa>

If you need the CTA training material to improve the pass rate, our company will be your choice. CTA training materials of our company have the information you want, we have the answers and questions. Our company is pass guarantee and money back guarantee. We also have free demo before purchasing. Compared with the paper one, you can receive the CTA Training Materials for about 10 minutes, you don't need to waste the time to wait.

ServiceNow CTA Exam Syllabus Topics:

Topic	Details
Topic 1	Release and Instance Strategy: This domain assesses the abilities of Release Managers in planning and executing software releases and managing instances effectively. It emphasizes strategies for minimizing downtime and ensuring smooth deployment processes.

Topic 2	Platform Data and Integrations: This part measures the skills of Integration Specialists in managing data across platforms and integrating different systems. It covers techniques for ensuring seamless data exchange and synchronization.
Topic 3	Current and To-Be Architecture: This section tests the knowledge of Enterprise Architects in understanding and comparing current IT architectures with future (to-be) architectures. It emphasizes the ability to analyze gaps and develop strategies for transformation.
Topic 4	Technical Governance: This domain evaluates the expertise of IT Governance Specialists in establishing and enforcing technical policies and standards. It focuses on ensuring that IT operations align with organizational goals and regulatory requirements.
Topic 5	Data Strategies: This domain evaluates the expertise of Data Analysts in developing effective data management strategies. It focuses on how to align data practices with business objectives and ensure data quality and integrity.
Topic 6	CMDB and CSDM: This section of the exam measures the skills of IT Service Managers and covers the management of Configuration Management Databases (CMDB) and Configuration Service Data Management (CSDM). It emphasizes how these tools are used to track and manage IT assets and services effectively.

The Best Exam CTA Review & Leading Provider in Qualification Exams & Complete CTA Minimum Pass Score

Our CTA real dumps has received popular acceptance worldwide with tens of thousands of regular exam candidates who trust our proficiency. Up to now, the passing rate is 98 to 100 percent. What made our CTA study guide so amazing? The answer that we only supply the latest and valid CTA Exam Braindumps for our customers and first-class after-sales services come after the first-class CTA learning engine. We're also widely praised by our perfect services.

ServiceNow Certified Technical Architect (CTA) Sample Questions (Q35-Q40):

NEW QUESTION # 35

What are the recommended error handling strategies for ServiceNow integrations?

Choose 3 answers

- A. Ignore minor errors to reduce system load
- B. Classify errors into specific categories
- C. Create email notifications for all integration errors
- D. Establish a process to review and monitor errors
- E. Log all errors to a centralized location

Answer: B,D,E

Explanation:

Effective error handling is crucial for maintaining the reliability and stability of ServiceNow integrations.

Recommended strategies include:

B: Establish a process to review and monitor errors: Regularly review integration logs and error reports to identify trends, potential issues, and areas for improvement.

C: Classify errors into specific categories: Categorizing errors (e.g., data errors, connection errors, authorization errors) helps with troubleshooting and identifying root causes.

E: Log all errors to a centralized location: Maintain a centralized log of all integration errors for analysis and troubleshooting. This provides a comprehensive view of integration health.

Why not the other options?

A: Ignore minor errors to reduce system load: Ignoring errors can lead to data inconsistencies and integration failures. All errors

should be addressed appropriately.

D: Create email notifications for all integration errors: While notifications can be useful for critical errors, sending emails for all errors can lead to alert fatigue and may not be the most efficient way to manage errors.

NEW QUESTION # 36

What benefits does effective testing provide?

Choose 3 answers

- A. Ensures compliance with industry standards
- B. Identifies defects early in the development process
- C. Enhances overall system performance
- D. Conforms to specifications as defined in stories
- E. Validates new functionality without introducing regressions

Answer: B,D,E

Explanation:

Effective testing provides several key benefits:

B: Conforms to specifications as defined in stories: Testing ensures that the developed software meets the requirements and acceptance criteria outlined in user stories or other requirement documents.

D: Validates new functionality without introducing regressions: Testing verifies that new features or changes work as expected and do not negatively impact existing functionality (regressions).

E: Identifies defects early in the development process: The earlier defects are found, the cheaper and easier they are to fix. Testing helps identify issues early in the development lifecycle.

Why not the other options?

A: Ensures compliance with industry standards: While testing can help with compliance, it's not the primary goal. Compliance often involves specific audits and assessments.

C: Enhances overall system performance: Performance testing is a specific type of testing that focuses on system performance, but it's not a general benefit of all testing.

NEW QUESTION # 37

Which encryption solution would ensure that customer credit card numbers were encrypted before being stored in the cloud and would allow for easy administration of encryption keys?

- A. Edge Encryption
- B. Database Encryption
- C. Client-side Encryption
- D. Server-side Encryption

Answer: C

Explanation:

Client-side Encryption is the best solution to encrypt customer credit card numbers before they are stored in the cloud and provide easy key management. Here's why:

Encryption Before Storage: Data is encrypted on the client-side (e.g., user's browser or device) before being sent to the cloud, ensuring that even if the cloud storage is compromised, the sensitive data remains protected.

Key Management: The encryption keys are managed by the client or a trusted key management system, providing greater control and flexibility.

Reduced Risk: Client-side encryption minimizes the risk of sensitive data being exposed in the cloud environment.

Why not the other options?

A: Edge Encryption: This is a broader term that can refer to various encryption techniques applied at the edge of the network.

B: Server-side Encryption: Data is encrypted on the server-side, which means the cloud provider has access to the encryption keys.

D: Database Encryption: This encrypts the entire database, but it doesn't provide the same level of control and key management as client-side encryption.

NEW QUESTION # 38

What is the primary purpose of having a go-live plan?

- A. To establish a backup system for data recovery.
- B. To record root causes for problems arising out of the transition.
- C. To conduct a comprehensive review of all project documents.
- **D. To facilitate a seamless and smooth transition process.**

Answer: D

Explanation:

The primary purpose of a go-live plan is to facilitate a seamless and smooth transition process when deploying new software or changes to a production environment. It acts as a roadmap for the go-live event, outlining the steps involved, roles and responsibilities, and timelines.

A go-live plan typically includes:

Pre-Go-Live Activities: Data migration, system checks, communication to users.

Go-Live Activities: Deployment steps, rollback procedures, monitoring.

Post-Go-Live Activities: Support procedures, user training, issue resolution.

Why not the other options?

B: To record root causes for problems arising out of the transition: While problem resolution is important, it's not the primary purpose of the go-live plan.

C: To establish a backup system for data recovery: Backups are essential, but they are a separate consideration from the go-live plan.

D: To conduct a comprehensive review of all project documents: This review should happen earlier in the project lifecycle.

NEW QUESTION # 39

What is the primary purpose of security threat modeling?

- **A. To identify potential threats and develop mitigations.**
- B. To manage the encryption key management process.
- C. To configure trusted IP address ranges in the system.
- D. To backup, restore and recover critical customer data.

Answer: A

Explanation:

The primary purpose of security threat modeling is to identify potential threats and develop mitigations. It involves:

Analyzing the System: Understanding the architecture, components, and data flows of the system.

Identifying Threats: Identifying potential security threats and vulnerabilities.

Assessing Risk: Evaluating the likelihood and impact of each threat.

Developing Mitigations: Designing and implementing security controls to reduce or eliminate the identified risks.

Why not the other options?

B: To manage the encryption key management process: This is a specific security activity, not the primary purpose of threat modeling.

C: To backup, restore and recover critical customer data: This is related to data protection and disaster recovery, not threat modeling.

D: To configure trusted IP address ranges in the system: This is a specific security control, not the overarching goal of threat modeling.

NEW QUESTION # 40

.....

We are committed to helping you pass the exam, and you can pass the exam just one time by using CTA exam materials of us. CTA exam braindumps contain both questions and answers, so that you can have a convenient check after finish practicing. And we offer you free demo for you to have a try before buying CTA Exam Materials, so that you can have a better understanding of what you are going to buy. In addition, we are pass guarantee and money back guarantee if you fail to pass the exam. We have online and offline service, and if you are bothered by any questions for CTA exam braindumps, you can consult us.
